<i>Preface</i>	<i>xii</i>
<i>List of Important Symbols</i>	<i>xiv</i>
<i>List of Important Abbreviations</i>	<i>xvi</i>
<i>Visual Walkthrough</i>	<i>xvii</i>
<b>1. Introduction to Metrology</b>	<b>1</b>
1.1 Definitions of Metrology	2
1.2 Types of Metrology	2
1.3 Need of Inspection	3
1.4 Metrological Terminologies	4
1.5 Principal Aspects of Measurement	7
1.6 Methods of Measurements	8
1.7 Measuring Instruments and their Selection	9
1.8 Errors in Measurement	10
1.9 Units of Measurement	14
1.10 Metric Units in Industry	19
<i>Review Questions</i>	21
<b>2. Measurement Standards</b>	<b>22</b>
2.1 Introduction	23
2.2 The New Era of Material Standards	24
2.3 Types of Standards	25
2.4 Subdivision of Standards	33
2.5 Calibration	34
<i>Review Questions</i>	45
<b>3. Linear Metrology</b>	<b>46</b>
3.1 Introduction	47
3.2 Steel Rule (Scale)	48
3.3 Calipers	49
3.4 Vernier Caliper	51
3.5 Vernier Height Gauge	56
3.6 Vernier Depth Gauge	58
3.7 Micrometers	59
3.8 Digital Measuring Instrument for External and Internal Dimensions	71
3.9 Digital Universal Caliper	72
<i>Review Questions</i>	73

**viii Contents**

<b>4. Straightness, Flatness, Squareness, Parallelism, Roundness, and Cylindricity Measurements</b>	<b>74</b>
4.1 Introduction	74
4.2 Straightness Measurement	75
4.3 Flatness Measurement	77
4.4 Parallelism	84
4.5 Squareness Measurement	87
4.6 Roundness Measurement	92
4.7 Cylindricity	100
4.8 Coaxiality	103
4.9 Eccentricity and Concentricity	104
4.10 Industrial Applications	104
<i>Review Questions</i>	106
<b>5. Metrology of Machine Tools</b>	<b>108</b>
5.1 Geometrical (Alignment Tests)	109
5.2 Performance Test (Practical Test)	110
5.3 Machine-Tool Testing	112
<i>Review Questions</i>	124
<b>6. Limits, Fits and Tolerances</b>	<b>126</b>
6.1 Introduction	127
6.2 Concept of Interchangeability	127
6.3 Selective Assembly	129
6.4 System's Terminologies	130
6.5 Limits and Tolerances	133
6.6 Fits	137
6.7 System of Fit	142
6.8 Indian Standards Specifications and Application	144
6.9 Geometrical Tolerances	159
6.10 Limit Gauges and Design of Limit Gauges	162
<i>Review Questions</i>	194
<b>7. Angular Metrology</b>	<b>196</b>
7.1 Introduction	196
7.2 Radians and Arc Length	197
7.3 Angle-Measuring Devices	198
<i>Review Questions</i>	219
<b>8. Interferometry</b>	<b>221</b>
8.1 Introduction	221
8.2 Monochromatic Light as the Basis of Interferometry	222
8.3 The Principle of Interference	222
8.4 Interference Bands using Optical Flat	224
8.5 Examples of Interference Patterns	227
8.6 NPL Flatness Interferometer	230
8.7 Gauge Length Interferometer	231
<i>Review Questions</i>	234

<b>9. Comparator</b>	<b>236</b>
9.1 Introduction	236
9.2 Desirable Features of Comparators	238
9.3 Classification of Comparators	238
<i>Review Questions</i>	264
<b>10. Metrology of Surface Finish</b>	<b>266</b>
10.1 Introduction	267
10.2 Terms Used in Surface-Roughness Measurement	267
10.3 Factors Affecting Surface Finish in Machining	272
10.4 Surface-Roughness Measurement Methods	276
10.5 Precautions for Surface-Roughness Measurement	281
10.6 Surface Texture Parameters	282
10.7 Pocket Surf	295
10.8 Specifying the Surface Finish	296
<i>Review Questions</i>	298
<b>11. Metrology of Screw Threads</b>	<b>300</b>
11.1 Understanding Quality Specifications of Screw Threads	300
11.2 Screw Thread Terminology	302
11.3 Types of Threads	305
11.4 Measurement of Screw Threads	307
11.5 Measurement of Thread Form Angle	316
11.6 Measurement of Internal Threads	318
<i>Review Questions</i>	322
<b>12. Metrology of Gears</b>	<b>324</b>
12.1 Introduction	324
12.2 Types of Gears	326
12.3 Spur Gear Terminology	328
12.4 Forms of Gears	330
12.5 Quality of (Spur) Gear	331
12.6 Errors in Spur Gear	332
12.7 Measurement and Checking of Spur Gear	334
12.8 Inspection of Shrinkage and Plastic Gears	349
12.9 Measurement Over Rollers	349
12.10 Recent Development in Gear Metrology	349
<i>Review Questions</i>	352
<b>13. Miscellaneous Measurements</b>	<b>354</b>
13.1 Measurement of Taper on One Side	354
13.2 Measurement of Internal Taper	355
13.3 Measurement of Included Angle of Internal Dovetail	356
13.4 Measurement of Radius	357
<i>Review Questions</i>	360
<b>14. Study of Advanced Measuring Machines</b>	<b>361</b>
14.1 Concept of Instrument Overlapping	362
14.2 Metrology Integration	362

**x Contents**

14.3	Universal Measuring Machine	363	
14.4	Use of Numerical Control for Measurement	367	
14.5	Optical 3D Measuring Instruments: Laser Vision	376	
14.6	In-process Gauging	380	
14.7	Form Testing: Case Study	382	
14.8	Improvement Opportunities	384	
	<i>Review Questions</i>	384	
<b>15.</b>	<b>Introduction to Measurement Systems</b>		<b>386</b>
15.1	Definition of Measurement	386	
15.2	Methods of Measurement	387	
15.3	Classification of Measuring Instruments	388	
15.4	Generalized Measurement System	389	
15.5	Performance Characteristics of Measuring Devices	391	
15.6	Types of Errors	397	
	<i>Review Questions</i>	398	
<b>16.</b>	<b>Intermediate Modifying and Terminating Devices</b>		<b>400</b>
16.1	Transducers	400	
16.2	Use of Transducers for Displacement Measurement	406	
16.3	Introduction to Intermediate Modifying Devices	408	
16.4	Signal-Conditioning Systems	411	
16.5	Introduction to Terminating Devices	425	
	<i>Review Questions</i>	431	
<b>17.</b>	<b>Force and Torque Measurement</b>		<b>433</b>
17.1	SI Units of Force and Torque	434	
17.2	Force-measurement System	436	
17.3	Force and Load Sensors	439	
17.4	Dynamic Force Measurement	445	
17.5	Torque Measurement	448	
17.6	Motor and Engine-testing Dynamometers	453	
17.7	Strain Gauges	456	
	<i>Review Questions</i>	459	
<b>18.</b>	<b>Vibration Measurements</b>		<b>460</b>
18.1	Vibration-Measurement System	461	
18.2	Modeling Vibration System	461	
18.3	Concept of Equation of Motion: Natural Frequency	461	
18.4	Vibration-Measurement System Elements	463	
	<i>Review Questions</i>	471	
<b>19.</b>	<b>Pressure Measurement</b>		<b>472</b>
19.1	Zero Reference for Pressure Measurement	473	
19.2	Interesting Development of Pressure Measurement	474	
19.3	Mechanical Analog Pressure Gauges	476	
19.4	Low Pressure (Vacuum) Measurement	482	
19.5	Digital Pressure Gauges	486	
19.6	Pressure Transmitters	487	

19.7 Measuring Pressure at High Temperatures	487
19.8 Impact	488
19.9 Case Study of Pressure Measurement and Monitoring	489
<i>Review Questions</i>	491
<b>20. Temperature Measurement</b>	<b>493</b>
20.1 Temperature Scales	493
20.2 Temperature-Measuring Devices	495
20.3 Thermometer	496
20.4 Thermocouple	498
20.5 Resistance Temperature Detectors (RTD)	503
20.6 Thermistor	509
20.7 Pyrometers	511
<i>Review Questions</i>	517
<b>21. Strain Measurement</b>	<b>518</b>
21.1 Bonded Gauge	519
21.2 Unbonded Strain Gauge	519
21.3 Resistance of a Conductor	519
21.4 Wheatstone's Bridge Circuit	523
21.5 Strain-Gauge Installation	529
21.6 Axial, Bending and Torsional Strain Measurement	529
21.7 Gauge-Selection Criteria	532
<i>Review Questions</i>	533
<b>22. Flow Measurement</b>	<b>534</b>
22.1 Types of Flowmeters	534
22.2 Selection of a Flowmeter	535
22.3 Installation of a Flowmeter	535
22.4 Classification of Flowmeters	536
<i>Review Questions</i>	553
<b>Index</b>	<b>554</b>
