Table of Contents

CHAPTER 1 Web-Based Systems 1
The Web 1
Web Applications 2
Let's Introduce a Case Study 3
Are WebApps Really Computer Software? 4
Are the Attributes of WebApps Different from the Attributes of Conventional Software? 4
What Categories Are Encountered as a WebApp Evolves? 7
WebApps—A Philosophical View 10

CHAPTER 2 Web Engineering 12
What Is Web Engineering? 12
What Is Meant by Agile? 12
What Is a WebE Framework? 13
What Principles Should You Follow as You Adapt the Framework? 15
Is There Any Merit in an Old-School Approach? 16
The Components of Web Engineering 16
How Does Software Engineering Come into Play? 17
Why Is WebE Process Agility So Important? 18
What WebE Methods Reside within the Process Framework? 19
Isn't Web Engineering All about Tools and Technology? 19
Web Engineering Best Practices 21
Where We've Been . . . Where We're Going 23

CHAPTER 3 A Web Engineering Process 24
Defining the Framework 24
Incremental Process Flow 27
How Are Framework Activities Conducted? 28
How Is the Framework Refined? 30
Generic Actions and Tasks for the WebE Framework 32
How Should the Communication Activity Be Refined? 32
What Tasks Are Required to Develop an Increment Plan? 33
What Is Modeling? 35
What Analysis Modeling Tasks Can Be Applied? 35
What Are the Elements of a Design Model? 37
What Design Modeling Tasks Can Be Applied? 38
What Construction Tasks Should Be Applied? 40
How Is a WebApp Increment Deployed? 41
Umbrella Activities 42
How Should a WebE Team Manage Change? 42
How Is the Quality of an Increment Ensured? 43
How Is Risk Managed? 43
How Should the Work Be Managed? 44
Where We've Been . . . Where We're Going 44

CHAPTER 4 Communication 46
The Communication Activity 46
Formulation 47
Who Should We Communicate With? 48
What Techniques Can You Use for Communication? 48
Won't There Be Different Viewpoints? 49
What Questions Should We Ask? 49
How Do We Encourage Collaboration? 51
Elicitation 53
What Happens Before an Elicitation Session? 53
How Do Stakeholders Prepare? 54
What Tasks Are Performed During an Elicitation Session? 55
What Are the User Categories for the WebApp? 56
How Are Content and Functional Requirements Identified? 57
How Are Constraints and Performance Issues Isolated? 58
What Are Usage Scenarios? 58
What Are Use Cases? 60
How Is a Use Case Created? 60
Identifying WebApp Increments 65
Negotiation 67
Where We've Been . . . Where We're Going 68

CHAPTER 5 Planning 70
Understanding Scope 70
What Communication Work Products Are Relevant? 71
What if Further Details Are Required to Understand the Increment? 71
What if Gaps Still Exist in Your Understanding? 73
Refining Framework Activities 73
What Actions and Tasks Are Required? 74
What Work Products Will Be Produced? 76
What Is the Appropriate Way to Assess Quality? 77
How Should Change Be Managed? 78
Building a WebE Team 79
How Do We Recognize a "Good" WebE Team? 79
Why Don't Teams Jell and What Can Be Done to Help? 80
Can a WebE Team Manage Itself? 81
How Do We Build a Successful Team? 82
What Are the Characteristics of a Good Team Leader? 83
Managing Risk 84
How Do We Identify Risks? 84
How Do We Evaluate Risks? 85
How Do We Develop Contingency Plans? 86
Developing a Schedule 88
What Is Macroscopic Scheduling? 88
What Is Increment Scheduling? 89
How Do We Estimate Effort and Time? 91
How Do We Represent Task Interdependencies? 93

Managing Quality 94
What Quality Assurance Mechanisms Can the Team Use? 95
What Are the Mechanics of a Pair Walkthrough? 95
What Are the Mechanics of a Team Walkthrough? 96
Do Criteria for Quality Exist for WebApps? 97
Managing Change 98
How Should Criticality and Impact of a Change Be Assessed? 99
When Do We Delay Making the Change? 99
Should Changes Be Made to All Related Work Products? 102
Tracking the Project 103
Are There Any Macroscopic Indicators of Progress Problems? 103
What Criteria Are Used to Track Progress? 104
Outsourcing WebE Work 104
How Do We Initiate an Outsourced Project? 105
How Do We Select Candidate Outsourcing Vendors? 106
How Can We Assess the Validity of Price Quotes and the Reliability of Estimates? 106
What Level of Project Management Will Be Needed? 106
How Do We Assess the Schedule and Manage Scope? 107
Where We've Been . . . Where We're Going 107

CHAPTER 6 The Modeling Activity 109
Modeling as a Concept 110
How Do We Judge the Usefulness of a Model? 110
Can Models Be Used to Understand Business Constraints? 111
The Models We Create 112
What Does the Process Tell Us About Modeling? 113
What Does the WebApp Tell Us About Modeling? 113
Modeling Frameworks 114
Is There a Modeling Framework for the Web? 115
How Does Modeling Relate to the WebE Process? 116
Modeling Languages 119
What Capabilities Should Exist to Model Functionality? 120
What Capabilities Should Exist to Model Information Content? 121
What Generic Capabilities Should Exist in a Modeling Language? 122
Existing Modeling Approaches 124
Where We've Been . . . Where We're Going 126

CHAPTER 7 Analysis Modeling for WebApps 129
Understanding Analysis in the Context of WebE 129
How Much Analysis Is Enough? 130
Can We Analyze Using a Prototype? 130
Is Analysis Distinct from Design? 132
Analysis Modeling for WebApps 133
What Are the Inputs to Analysis Modeling? 133

What Are the Outputs from Analysis? 135
What Analysis Tasks Can and Should We Carry Out? 135
What Tools Can We Use to Help Us Model? 136
How Do We Decide Whether Modeling Is Necessary and Which Approach Is Best? 136
Understanding the Users 138
Why Is It Necessary to Revisit the User Hierarchy? 139
Do We Apply Usage Scenarios As Is? 141
The Content Model 144
What Are the Structural Elements of the Content Model? 144
What Is an Information Exchange and How Is It Represented? 145
How Are Content Objects Defined? 146
Is There a Simple Way to Depict Content Relationships and Content Hierarchy? 150
How Do We Select and Represent Analysis Classes for WebApps? 151
The Interaction Model 152
Where Do Use Cases Come into Play? 152
What Are Sequence Diagrams and When Should They Be Developed? 153
How Do State Diagrams Represent the Behavior of a WebApp? 154
Do We Really Need Use Cases, Sequence Diagrams, and State Diagrams to Fully Describe the Interaction Model? 154
Why Is It a Good Idea to Build an Interface Prototype? 155
The Functional Model 156
The Configuration Model 158
Relationship-Navigation Analysis 159
How Do We Establish Relationships Between Content Objects and Functionality? 160
How Do We Analyze Navigational Requirements? 161
Where We've Been . . . Where We're Going 163

CHAPTER 8 WebApp Design 165
Design for WebApps 165
What Does a WebApp Designer Need to Know? 166
What Is Logical Design? 167
What Is Physical Design? 167
What Information Is Created as a Consequence of Design? 168
Design Goals 168
Design and WebApp Quality 171
How Do Users Perceive Quality? 171
Is There a User-Centric Model for Assessing Design Quality? 172
What Is a Quality Framework? 175
Is There a Way to Assess Content Quality? 178
Is There a Single Quality Checklist I Can Use? 178
The Design Process 180
What Are the Elements of WebApp Design? 180

What Are the Characteristics of the Design Process? 183
What Does an Incremental WebE Process Imply for the Design Activity? 184
Initial Design of the Conceptual Architecture 185
Initial Design of the Technical Architecture 188
Where We've Been . . . Where We're Going 190

CHAPTER 9 Interaction Design 193
Interface Design Principles and Guidelines 194
What Principles Do We Apply to Design Effective Interfaces? 194
What About Some Pragmatic Design Guidelines? 200
Interface Design Workflow 200
Interface Design Preliminaries 202
How Do We Understand the Characteristics of WebApp Users? 203
How Do We Elaborate the Content Objects That Are Identified? 204
What Tasks Do the Users Perform? 206
How Do We Elaborate the Tasks That Are Identified? 208
How Do We Design for Different Users with Different Roles? 209
How Is Content Integrated into the Interface Description? 211
Interface Design Steps 212
How Are Interface Objects and Actions Translated into a Layout? 212
What About the Design of Navigation Mechanisms for the Interface? 215
Why Is Interface Consistency So Important? 218
Aesthetic Design 218
How Do We Create an Aesthetically Pleasing Layout? 219
What Leads to an Effective Graphic Design? 221
Usability 222
Design Issues 223
What Factors Affect Response Time and What Can We Do to Improve It? 223
How Should We Design "Help" Facilities? 224
How Should the Interface Handle Errors? 225
What Is "Accessibility" and How Does It Apply to Interface Design? 226
What Is "Internationalization" and How Does It Apply to WebApps? 227
Where We've Been . . . Where We're Going 228

CHAPTER 10 Information Design 230
Information Architecture 231
What Is an Information Architecture? 231
What Are the Elements of an Information Architecture? 233

What Are the Characteristics of a Good Information Architecture? 233
How Do We Develop an Information Architecture? 236
Organizing Content 237
Structuring the Information Space 238
What Information Structures Are Possible? 239
What Makes a Good Structure? 242
Blueprints: Adding Detail to a Structure 245
What Form Does a Blueprint Take? 245
Accessing Information 247
How Do We Ensure That the User Understands the Context and Doesn't Get Lost? 247
How Do We Help the User Move Through the Information Structure? 249
What Guidelines Are Available for Implementing Searching Mechanisms? 250
Can Searching Mechanisms Lead to Problems? 252
Wireframe Models 252
Navigation Design: Creating the Detailed Structure 254
How Have Information Design and Navigation Design Models Evolved? 254
How Is the RMM Model Used for Navigation Design? 256
How Can WebML Be Used to Create a Navigation Design? 259
Is It Possible to Create Models That Link Content and Functionality? 259
Does the Structure of the Web Itself Have an Impact? 262
Summarizing the Design Process 262
Where We've Been . . . Where We're Going 265

CHAPTER 11 Functional Design 268
WebApp Functionality 268
The Nature of WebApp Functionality 269
What Are Typical Examples of Functionality? 270
Can Functionality Be Categorized? 270
Is It Always Possible to Distinguish Between Information and Function? 272
Functional Design in the Design Process 274
What Are the Elements of a Functional Design Process? 274
How Much Functional Design Is Enough? 276
How Would Initial Functional Design Be Conducted for SafeHomeAssured.com? 277
Functional Architecture 279
What Does a Functional Architecture Look Like? 280
How Do We Develop the Functional Architecture? 280
What About Functionality for Exception Handling? 282
Can Architectural Patterns Be Used During Functional Design? 284

Detailed Functional Design 286
How Can WAE Modeling Be Used for Detailed Design? 286
Why Is WebML Appropriate for Workflow Modeling? 287
State Modeling 291
Where We've Been . . . Where We're Going 294

CHAPTER 12 Construction and Deployment 296
Construction and Deployment within the WebE Process 297
What Is the Interplay Between Construction and Deployment? 297
What Role Do Deployment Environments Play? 299
Construction 302
Is There a Generic Set of Construction Tasks? 303
What Is *Refactoring* and How Should It Be Applied? 303
Construction Principles and Concepts 305
Deployment 308
Is There a Generic Set of Deployment Tasks? 308
What Deployment Principles Should Guide the WebE Team? 309
How Are Version Control and CMS Used? 311
Construction and the Use of Components 312
What Is a Generic Component? 313
How Is an Object-Oriented Component Defined? 313
How Is a Conventional Component Defined? 315
What Are the Characteristics of a "Good" Component? 316
Component-Level Design Guidelines 318
Component Design Steps 320
Where We've Been . . . Where We're Going 323

CHAPTER 13 Design Patterns 326
Patterns: Understanding the Concept 326
What Exactly Is a Pattern? 327
What Does a Pattern Look Like? 328
WebApp Patterns: Design Focus and Granularity 329
How Is Design Focus Used to Identify Patterns? 329
Why Is Granularity an Important Characteristic of a Pattern? 330
Pattern Repositories 331
What Is a Patterns Repository? 331
What Patterns Sources Are Available for Web Engineers? 331
Can a WebE Team Create Its Own Set of Patterns? 332
How Do We Find and Use Patterns? 334
Example Patterns 336
Is It Possible to Define Patterns That Address Problems at the Business Level? 336
Since Interaction Is Pervasive, There Must Be Many Interaction Patterns. True? 336
What Navigation Patterns Are Available? 341
Where Do Content and Presentation Patterns Fit In? 344
Where We've Been . . . Where We're Going 347

CHAPTER 14 Technologies and Tools 348
General Issues 348
How Does Separation of Concerns Impact Tools and Technologies? 349
Which Technology—Open Source or Proprietary? 350
What Is the Impact of Application Categories on WebE Technology? 351
Implementation Tools and Technologies 352
What Are Application Frameworks? 353
How Are Content Management Systems and Version Control Technologies Applied? 354
What If a Search Capability Must Be Provided with Our WebApp? 354
Development Tools and Technologies 355
Can I Acquire Tools That Will Help Me with the Modeling Activity? 355
Are There Testing Tools That Focus Specifically on WebApps? 356
Are There Tools That Can Assist with the Management of the WebE Process? 357
Where We've Been . . . Where We're Going 358

CHAPTER 15 Testing WebApps 359
Testing Concepts 359
What Are the "Dimensions" of Quality? 360
What Types of Errors Occur within a WebApp Environment? 361
What Testing Strategy Should We Apply? 361
How Much Test Planning Is Necessary? 362
The Testing Process—An Overview 363
Content Testing 367
What Are the Objectives of Content Testing? 367
How Is Database Testing Used to Validate Content? 368
User Interface Testing 370
Is There a Viable Interface Testing Strategy? 371
How Do We Test Specific Interface Mechanisms? 371
How Do We Test Interface Semantics? 374
Usability Testing 375
Compatibility Testing 378
Component-Level Testing 379
Navigation Testing 381
How Do We Test Navigation Syntax? 381
How Do We Test Navigation Semantics? 382
Configuration Testing 384
How Do We Test the Server Side? 385
How Do We Test the Client Side? 386
Security and Performance Testing 386

How Do We Determine if the WebApp Is Secure? 387
How Should We Test WebApp Performance? 389
What Are the Objectives of Performance Testing? 390
How Does Load Testing Assess Performance? 390
How Does Stress Testing Assess Performance? 391
Where We've Been . . . Where We're Going 396

CHAPTER 16 Change and Content Management 397
Change 397
What Are the Attributes of a "Change"? 398
Why Are Changes Requested? 398
What Elements of the WebApp Change? 399
Change Management for Web Engineering 399
Why Do We Need Change Management? 400
What Issues Should We Consider? 400
What Is the Basic Change Management Activity? 402
How Should We Identify the Objects That Will Change? 402
How Should We Control a Change That Is About to Be Made? 403
How Do We Manage Different Versions of the WebApp or Its Components? 406
How Can a WebE Team Ensure That a Change Has Been Properly Implemented? 407
How Do We Let Stakeholders Know What Changes Have Been Made? 407
Content Management 408
How Is a Content Management System Used? 408
What Are the Major Elements of a CMS? 409
Criteria for Implementing a CMS 412
How Does Volume Affect Content Management? 413
Does the Population of Content Creators Have an Effect on CMS? 414
How Does the Change Volume Affect the Formality of Change Management? 415
How Does Publication Volume Affect Content Management Formality? 415
Where We've Been . . . Where We're Going 419

CHAPTER 17 Future Directions 419
The Changing Nature of the Web and WebApps 419
How Will Delivery of Web-Based Content and Functionality Change? 420
How Will WebApps Change? 420
What Will Web Engineers Have to Do to Accommodate These Changes? 421
Can the Web Serve as a Platform for Application Software? 422

Can the Future Web Be an OS? 423
How Will the "Semantic Web" Change Things? 424
Evolving Web Technologies and Web 2.0 425
What Is Web 2.0? 425
What Technologies Support Web 2.0? 427
What Are Some Key Issues That Should Be Considered as Technology Evolves? 431
What's Next for Web 2.0? 432
One View of the Future 433
The Changing Nature of Web Engineering 435
