<i>Foreword</i>	<i>xiii</i>
<i>Preface</i>	<i>xv</i>
<i>More Acknowledgements</i>	<i>xxiii</i>

Part I

Traces of History and A Neuroscience Briefer

1. Brain Style Computing: Origins and Issues	3
1.1 From the Greeks to the Renaissance	3
1.2 The Advent of Modern Neuroscience	6
1.3 On the Road to Artificial Intelligence	9
1.4 Classical AI and Neural Networks	12
1.5 Hybrid Intelligent Systems	14
<i>Chapter Summary</i>	15
<i>Bibliographic Remarks</i>	16
2. Lessons from Neuroscience	17
2.1 The Human Brain	17
2.2 Biological Neurons	23
<i>Chapter Summary</i>	37
<i>Bibliographic Remarks</i>	38

Part II

Feedforward Neural Networks and Supervised Learning

3. Artificial Neurons, Neural Networks and Architectures	41
3.1 Neuron Abstraction	41
3.2 Neuron Signal Functions	44
3.3 Mathematical Preliminaries	53
3.4 Neural Networks Defined	61
3.5 Architectures: Feedforward and Feedback	62
3.6 Salient Properties and Application Domains of Neural Networks	65
<i>Chapter Summary</i>	68

	<i>Bibliographic Remarks</i>	69	
	<i>Review Questions</i>	69	
4.	Geometry of Binary Threshold Neurons and Their Networks		72
4.1	Pattern Recognition and Data Classification	72	
4.2	Convex Sets, Convex Hulls and Linear Separability	76	
4.3	Space of Boolean Functions	78	
4.4	Binary Neurons are Pattern Dichotomizers	80	
4.5	Non-linearly Separable Problems	83	
4.6	Capacity of a Simple Threshold Logic Neuron	87	
4.7	Revisiting the XOR Problem	92	
4.8	Multilayer Networks	95	
4.9	How Many Hidden Nodes are Enough?	97	
	<i>Chapter Summary</i>	99	
	<i>Bibliographic Remarks</i>	100	
	<i>Review Questions</i>	100	
5.	Supervised Learning I: Perceptrons and LMS		104
5.1	Learning and Memory	104	
5.2	From Synapses to Behaviour: The Case of <i>Aplysia</i>	106	
5.3	Learning Algorithms	110	
5.4	Error Correction and Gradient Descent Rules	114	
5.5	The Learning Objective for TLNs	115	
5.6	Pattern Space and Weight Space	117	
5.7	Perceptron Learning Algorithm	119	
5.8	Perceptron Convergence Theorem	122	
5.9	A Handworked Example and MATLAB Simulation	125	
5.10	Perceptron Learning and Non-separable Sets	128	
5.11	Handling Linearly Non-separable Sets	130	
5.12	α -Least Mean Square Learning	132	
5.13	MSE Error Surface and its Geometry	137	
5.14	Steepest Descent Search with Exact Gradient Information	143	
5.15	μ -LMS: Approximate Gradient Descent	147	
5.16	Application of LMS to Noise Cancellation	152	
	<i>Chapter Summary</i>	156	
	<i>Bibliographic Remarks</i>	157	
	<i>Review Questions</i>	158	
6.	Supervised Learning II: Backpropagation and Beyond		164
6.1	Multilayered Network Architectures	164	
6.2	Backpropagation Learning Algorithm	167	
6.3	Handworked Example	177	
6.4	MATLAB Simulation Examples	181	
6.5	Practical Considerations in Implementing the BP Algorithm	187	
6.6	Structure Growing Algorithms	196	

6.7	Fast Relatives of Backpropagation	198	
6.8	Universal Function Approximation and Neural Networks	199	
6.9	Applications of Feedforward Neural Networks	201	
6.10	Reinforcement Learning: A Brief Review	205	
	<i>Chapter Summary</i>	212	
	<i>Bibliographic Remarks</i>	213	
	<i>Review Questions</i>	214	
7.	Neural Networks: A Statistical Pattern Recognition Perspective		218
7.1	Introduction	218	
7.2	Bayes' Theorem	219	
7.3	Two Instructive MATLAB Simulations	222	
7.4	Implementing Classification Decisions with Bayes' Theorem	227	
7.5	Probabilistic Interpretation of a Neuron Discriminant Function	230	
7.6	MATLAB Simulation: Plotting Bayesian Decision Boundaries	232	
7.7	Interpreting Neuron Signals as Probabilities	236	
7.8	Multilayered Networks, Error Functions and Posterior Probabilities	239	
7.9	Error Functions for Classification Problems	245	
	<i>Chapter Summary</i>	254	
	<i>Bibliographic Remarks</i>	255	
	<i>Review Questions</i>	255	
8.	Focussing on Generalization: Support Vector Machines and Radial Basis Function Networks		259
8.1	Learning From Examples and Generalization	259	
8.2	Statistical Learning Theory Briefer	264	
8.3	Support Vector Machines	273	
8.4	Radial Basis Function Networks	304	
8.5	Regularization Theory Route to RBFNs	314	
8.6	Generalized Radial Basis Function Network	323	
8.7	Learning in RBFN's	326	
8.8	Image Classification Application	329	
8.9	Other Models For Valid Generalization	334	
	<i>Chapter Summary</i>	339	
	<i>Bibliographic Remarks</i>	341	
	<i>Review Questions</i>	341	

Part III**Recurrent Neurodynamical Systems**

9.	Dynamical Systems Review		347
9.1	States, State Vectors and Dynamics	347	

9.2	State Equations	350	
9.3	Attractors and Stability	352	
9.4	Linear Dynamical Systems	354	
9.5	Non-linear Dynamical Systems	358	
9.6	Lyapunov Stability	363	
9.7	Neurodynamical Systems	369	
9.8	The Cohen-Grossberg Theorem	373	
	<i>Chapter Summary</i>	375	
	<i>Bibliographic Remarks</i>	376	
	<i>Review Questions</i>	376	
10.	Attractor Neural Networks		378
10.1	Introduction	378	
10.2	Associative Learning	379	
10.3	Attractor Neural Network Associative Memory	382	
10.4	Linear Associative Memory	386	
10.5	Hopfield Network	389	
10.6	Content Addressable Memory	397	
10.7	Two Handworked Examples	400	
10.8	Example of Recall of Memories in Continuous Time	404	
10.9	Spurious Attractors	405	
10.10	Error Correction with Bipolar Encoding	407	
10.11	Error Performance of Hopfield Networks	409	
10.12	Applications of Hopfield Networks	412	
10.13	Brain-State-in-a-Box Neural Network	419	
10.14	Simulated Annealing	426	
10.15	Boltzmann Machine	431	
10.16	Bidirectional Associative Memory	440	
10.17	Handworked Example	443	
10.18	BAM Stability Analysis	447	
10.19	Error Correction in BAMs	448	
10.20	Memory Annihilation of Structured Maps in BAMs	450	
10.21	Continuous BAMs	457	
10.22	Adaptive BAMs	458	
10.23	Application: Pattern Association	461	
	<i>Chapter Summary</i>	462	
	<i>Bibliographic Remarks</i>	464	
	<i>Review Questions</i>	464	
11.	Adaptive Resonance Theory		469
11.1	Noise-Saturation Dilemma	469	
11.2	Solving the Noise-Saturation Dilemma	471	
11.3	Recurrent On-center-Off-surround Networks	477	
11.4	Building Blocks of Adaptive Resonance	482	

11.5	Substrate of Resonance	487	
11.6	Structural Details of the Resonance Model	489	
11.7	Adaptive Resonance Theory I (ART I)	491	
11.8	Handworked Example	502	
11.9	MATLAB Code Description	504	
11.10	A Breezy Review of ART Operating Principles	506	
11.11	Neurophysiological Evidence for ART Mechanisms	507	
11.12	Applications	511	
	<i>Chapter Summary</i>	516	
	<i>Bibliographic Remarks</i>	517	
	<i>Review Questions</i>	518	
12.	Towards the Self-organizing Feature Map		521
12.1	Self-organization	521	
12.2	Maximal Eigenvector Filtering	522	
12.3	Extracting Principal Components: Sanger's Rule	530	
12.4	Generalized Learning Laws	532	
12.5	Competitive Learning Revisited	537	
12.6	Vector Quantization	540	
12.7	Mexican Hat Networks	546	
12.8	Self-organizing Feature Maps	552	
12.9	Applications of the Self Organizing Map	563	
	<i>Chapter Summary</i>	569	
	<i>Bibliographic Remarks</i>	570	
	<i>Review Questions</i>	571	
Part IV	Contemporary Topics		
13.	Pulsed Neuron Models: The New Generation		577
13.1	Introduction	577	
13.2	Spiking Neuron Model	578	
13.3	Integrate-and-Fire Neurons	586	
13.4	Conductance Based Models	594	
13.5	Computing with Spiking Neurons	608	
13.6	Reflections ...	616	
	<i>Chapter Summary</i>	617	
	<i>Bibliographic Remarks</i>	618	
14.	Fuzzy Sets, Fuzzy Systems and Applications		620
14.1	Need for Numeric and Linguistic Processing	620	
14.2	Fuzzy Uncertainty and the Linguistic Variable	621	
14.3	Fuzzy Set	622	
14.4	Membership Functions	624	

14.5	Geometry of Fuzzy Sets	627	
14.6	Simple Operations on Fuzzy Sets	628	
14.7	Fuzzy Rules for Approximate Reasoning	632	
14.8	Rule Composition and Defuzzification	634	
14.9	Fuzzy Engineering	638	
14.10	Applications	644	
	<i>Chapter Summary</i>	649	
	<i>Bibliographic Remarks</i>	650	
	<i>Review Questions</i>	650	
15.	Neural Networks and the Soft Computing Paradigm		652
15.1	Soft Computing = Neural + Fuzzy + Evolutionary	652	
15.2	Neural Networks: A Summary	654	
15.3	Fuzzy Sets and Systems: A Summary	656	
15.4	Genetic Algorithms	658	
15.5	Neural Networks and Fuzzy Logic	662	
15.6	Neuro-Fuzzy-Genetic Integration	671	
15.7	Integration Example: Subsethood-Product Based Fuzzy–Neural Inference System	675	
15.8	A Concluding Note	683	
	<i>Chapter Summary</i>	684	
	<i>Bibliographic Remarks</i>	685	
	Appendix A: Neural Network Hardware		686
A.1	Motivation and Issues	686	
A.2	Analog Building Blocks for Neuromorphic Networks	687	
A.3	Digital Techniques	691	
A.4	Bibliographic Remarks	692	
	Appendix B: Web Pointers		694
	<i>Bibliography</i>		697
	<i>Index</i>		729
