## SECTION I

### Role of Production and Operations Management in a Changing Business World

<b>1. Production and Operations Management Function</b>	<b>1.4</b>
Definition	1.4
Criteria of Performance for the Production and Operations Management System	1.6
Jobs/Decisions of Production/Operations Management	1.6
Classification of Decision Areas	1.7
New Ways of Looking at the Decision Areas	1.10
Brief History of the Production and Operations Management Function	1.11
Service and Relationships Era	1.13
Lessons from History	1.13
<i>Questions for Discussion</i>	1.14
<b>2. Operations Strategy</b>	<b>2.1</b>
Strategic Management Process	2.1
What is Operations/Manufacturing Strategy?	2.2
Meaningful Differentiation	2.3
Flexibility	2.3
Comparison: Traditional vs. New Approaches	2.4
Cost Leadership	2.5
Operations Strategies	2.6
Key Success Factors	2.6
Strengths, Weaknesses, Opportunities and Threats (SWOT) Analysis	2.7
Five Forces Model	2.9
Operations Strategic Action and its Relationship with Other Functional Areas of Management	2.10
Operation Function's Role: A New Concept	2.11
Globalisation	2.13
<i>Questions for Discussion</i>	2.15
<b>3. Services</b>	<b>3.1</b>
Services in Indian Economy	3.1
What is Service?	3.4
Moments of Truth	3.9

Manpower Implications	3.10
Service Matrix and Implications for Operations Policy	3.11
Capacity Management	3.12
Methods to Deal Fluctuating Demand	3.13
The Links between Customer, Service Strategy, Service Providers and the Service System	3.14
Service Quality	3.15
Globalisation of Services	3.16
Manufacturing and Services	3.18
<i>Questions for Discussion</i>	3.18

## SECTION II

### Useful Basic Tools

<b>4. Relevant Cost Concepts</b>	<b>4.3</b>
Distinction between Fixed and Variable Costs	4.3
Opportunity Costs and Their Use	4.5
Sunk Costs	4.6
Direct and Indirect Costs	4.6
Overheads	4.6
Controllable and Non-Controllable Costs	4.7
Relevant Costs as Different from Accounting Costs	4.7
<i>Questions for Discussion</i>	4.10
<b>5. Linear Programming</b>	<b>5.1</b>
Definition	5.1
Formulation of a Linear Programming Problem	5.2
Mathematical Procedures and Computer Software Packages	5.4
Assumptions	5.5
Other Related Methods	5.5
Application of Linear Programming	5.5
Computer Solution of the Problem	5.6
Sensitivity Analysis, Slack Variables and Shadow Prices	5.6
Validity of the Solution	5.7
Care in Formulation of the Problem	5.7
A Decision-Making Tool	5.8
<i>Questions for Discussion</i>	5.8
<b>6. Capital Budgeting</b>	<b>6.1</b>
Criteria for Appraisal of Investment Opportunities	6.1
Mutually Exclusive Projects	6.5
Capital Rationing	6.5
Considerations of Risk in the Appraisal of Projects	6.7
<i>Questions for Discussion</i>	6.13
<i>Appendix: Present Value Tables</i>	6.13

<b>7. Queueing Theory</b>	<b>7.1</b>
Features 7.1	
Design 7.3	
Types of Queueing Systems 7.4	
Analysis 7.4	
Characteristics of Single Channel Single Service Queueing System 7.4	
Arrival from a Finite Population 7.6	
Characteristics of a Multiple Channel Single Service Queueing System 7.6	
Use of Simulation 7.8	
<i>Questions for Discussion</i> 7.9	
<i>Appendix: Random Number Table</i> 7.11	
<b>8. Forecasting</b>	<b>8.1</b>
What is Forecasting 8.1	
Elements of Forecasting 8.2	
Methods of Forecasting 8.2	
Other Time-Series Methods 8.4	
Limitation of Time-Series Method 8.7	
Forecast Error Monitoring 8.9	
Causal Model of Forecasting 8.10	
Multiple Regression Model 8.10	
Input-Output Analysis 8.11	
Life Cycle Analysis 8.12	
Delphi Method of Opinion Gathering and Analysis 8.12	
End Use Analysis 8.12	
Market Surveys and Similar Techniques 8.12	
A Complete Forecasting Programme for a Company 8.12	
Prerequisites and Pitfalls in Forecasting 8.13	
Range of Forecast 8.15	
Different Scenarios 8.15	
Precision in Forecasting 8.15	
Forecasting and the Indian Scenario 8.15	
<i>Questions for Discussion</i> 8.16	
<i>Appendix: Technology Forecasting</i> 8.18	

### SECTION III

#### Imperatives of Quality and Productivity

<b>9. Quality Management—I</b>	<b>9.3</b>
Quality as a Corporate Strategy 9.3	
What is Quality? 9.3	
Statistical Methods 9.4	
Statistical Process Control 9.5	
Control Charts 9.7	

Diagnostic Value of Control Charts	9.13	
Conclusion	9.13	
<i>Questions for Discussion</i>	9.14	
<i>Appendix: Factors for Computing Control Chart Lines</i>	9.18	
<b>10. Quality Management—II</b>		<b>10.1</b>
Acceptance Sampling	10.1	
Acceptance Sampling Plan	10.2	
Concept of Average Outgoing Quality Limit (AOQL)	10.5	
Managing Quality	10.10	
Cost of Quality	10.14	
<i>Questions for Discussion</i>	10.15	
<i>Appendix I: Values of <math>np'_1</math> and <math>c</math> for Constructing Single Sampling Plans whose OC Curve is Required to Pass through the Two Points <math>(p'_1, 1 - \alpha)</math> and <math>(p'_2, \beta)</math></i>	10.18	
<i>Appendix II: Example of Dodge-Romig Single Sampling Lot Tolerance Tables</i>	10.20	
<i>Appendix III: Example of Dodge-Romig AOQL Tables—Single Sampling</i>	10.21	
<i>Appendix IV: Example of Dodge-Romig Double Sampling AOQL Tables</i>		
<i>Appendix V: Example of Dodge-Romig Double Sampling Lot Tolerance Tables</i>		
<b>11. New Quality Concepts and Initiatives, Total Quality Management and Six Sigma</b>		<b>11.1</b>
Taguchi Philosophy	11.2	
Design of Experiments (DOE)	11.3	
Robust Design	11.4	
Ishikawa Diagram	11.5	
Quality Function Deployments (QFD)	11.5	
ISO 9000	11.11	
ISO 14000: Global Environmental Management Standards	11.13	
Kaizen	11.13	
Contribution of Deming	11.15	
Motivation in Quality Management	11.18	
Service Quality	11.21	
Managerial Implications	11.23	
What is TQM	11.24	
Roadmap for TQM	11.29	
Points of Caution in TQM Implementation	11.29	
Criticism of TQM	11.31	
Six Sigma	11.32	
<i>Highlight: TQM at TVS Motor Company</i>	11.40	
<i>Questions for Discussion</i>	11.42	
<b>12. Product Design</b>		<b>12.1</b>
Purpose of a Product Design	12.1	
Product Design for Organisational Competitiveness	12.3	

---

Design for Manufacture (DFM)	12.10	
<i>Questions for Discussion</i>	12.16	
<b>13. Maintenance Management—I</b>		<b>13.1</b>
Primary Objective of Maintenance Management:		
Availability of the Operations System	13.2	
Importance of Statistics of Failure	13.3	
Types of Probability Distributions	13.3	
Preventive Maintenance	13.11	
Maintenance Policy	13.18	
Supportive Organisational Conditions for Better Maintenance Management	13.19	
Work Study for Maintenance	13.21	
Manpower Planning for Skilled Technicians	13.22	
Total Productive Maintenance (TPM)	13.22	
<i>Questions for Discussion</i>	13.24	
<b>14. Maintenance Management—II (Spare Parts Management)</b>		<b>14.1</b>
Characteristics of Spare Parts	14.1	
Conventional Classification	14.1	
Codification Concept	14.2	
Classification of Spares for Stocking Policy Analysis	14.3	
Maintenance or Breakdown spares	14.3	
Capital Spares	14.4	
Insurance Spares	14.7	
Rotable Spares	14.7	
<i>Questions for Discussion</i>	14.9	
<i>Appendix: Table of Poisson Distribution</i>	14.10	
<b>15. Work Study</b>		<b>15.1</b>
Method Study and Time Study	15.1	
Foundation of Work Study	15.1	
Main Components of Method Study	15.6	
Time Study Standards	15.6	
Involvement of Workers' Unions	15.11	
Predetermined Motion Time Systems (PMTS)	15.12	
Work Sampling	15.17	
Application of Work Study to Office Work	15.19	
<i>Questions for Discussion</i>	15.20	
<i>Appendix: Methods-Time Measurement MTM-1 Application Data</i>	15.22	
<b>16. Job Evaluation</b>		<b>16.1</b>
What is Job Evaluation and What it is Not	16.1	
Need for Job Evaluation	16.1	
Basic Systems	16.2	
Other System of Job Evaluation	16.10	

Human Element in Job Evaluation	16.11	
Inherent Limitations of Job Evaluation	16.11	
<i>Questions for Discussion</i>	16.11	
<b>17. Incentive Schemes</b>		<b>17.1</b>
Types of Incentive Schemes	17.1	
Individual Incentive Schemes	17.1	
Company-wide Bonus Schemes	17.7	
Behavioural Aspects of Incentives	17.8	
Financial Incentives	17.9	
<i>Questions for Discussion</i>	17.10	
<i>Appendix: Example of Piece-Rate Calculations for the Weaving Department of a Textile Company</i>	17.11	
<b>18. Job Redesign</b>		<b>18.1</b>
Need for Job Redesign	18.1	
Human Resource Development	18.3	
<i>Questions for Discussion</i>	18.3	
<b>19. Productivity</b>		<b>19.1</b>
What is Output?	19.2	
Different Inputs and Productivity Measures	19.3	
Other Partial and Indirect Measures	19.4	
Multifactor Productivity	19.5	
Productivity in India	19.6	
Efficiency and Effectiveness	19.7	
Quantity Orientation	19.8	
Business Process Reengineering	19.9	
Benchmarking	19.11	
Measure to Increase Productivity	19.13	
Transforming the Ordinary to the Extraordinary	19.13	
Pursuit of Excellence	19.14	
<i>Highlight: A Journey to Excellence: Tata Business Excellence Model</i>	19.15	
<i>Questions for Discussion</i>	19.16	

## SECTION IV

### Supply Chain Management

<b>20. Purchasing</b>		<b>20.3</b>
Prime Function	20.3	
Links with Other Organizational Functions	20.3	
Objectives	20.4	
Management of Supply: An Integrated Approach	20.5	
Bayesian Analysis	20.5	

---

Value Analysis/Value Engineering	20.7	
Purchasing Research	20.9	
Vendor Relations	20.9	
Negotiations: A Part of Purchaser's Routine	20.12	
Price Forecasting	20.14	
Forward Buying: Is it Ethical or Not?	20.15	
Make or Buy	20.15	
<i>Questions for Discussion</i>	20.16	
<i>Appendix: Learning Curves: Table of Unit Values</i>	20.18	
<b>21. Inventory Models and Safety Stocks</b>		<b>21.1</b>
What is Inventory Management?	21.1	
Basic Function	21.1	
Relevant Costs	21.2	
Behaviour of Costs in Relation to Level of Inventory	21.3	
Optimal Order Quantity	21.3	
Assumptions of the Economic Order Quantity (EOQ) Formula	21.5	
Economic Manufacturing Batch Size	21.7	
Economic Batch Quantity	21.8	
Joint Cycle for Multiple Products	21.11	
Inventory Model with Purchase Discounts	21.13	
Consideration of Uncertainties	21.16	
Approaches to Determine Buffer Stock	21.16	
Protection Methods Against Usage Rate Variations and Supply Lead Time Variations	21.23	
Fixed Order Period Models	21.28	
<i>Questions for Discussion</i>	21.32	
<i>Appendix I: Considerations of Inflation in the Economic Order Quantity Calculations</i>	21.34	
<i>Appendix II: Areas Under the Standard Normal Probability Distribution</i>	21.37	
<b>22. ABC and Other Classifications of Materials</b>		<b>22.1</b>
Selective Management Control	22.1	
Periodic Revision of Classification	22.3	
VED Analysis	22.4	
Combination of ABC and VED Analysis	22.4	
Purpose of Classification	22.5	
Other Classifications	22.6	
<i>Questions for Discussion</i>	22.6	
<b>23. Materials Requirement Planning</b>		<b>23.1</b>
Drawbacks of Service Levels and Safety Stock Computations	23.1	
Materials Requirement Planning (MRP)	23.2	
MRP Calculations—An Illustration	23.3	
Genesis	23.5	
Prerequisites	23.5	

Handling Uncertainties	23.6	
Combining Good Points of EOQ with MRP	23.6	
Evolution of MRP into MRP II	23.7	
Further Evolution to Enterprise Resource Planning (ERP)	23.8	
Electronic Commerce	23.13	
<i>Questions for Discussion</i>	23.16	
<b>24. Other Aspects of Materials Management</b>		<b>24.1</b>
Codification	24.1	
Characteristics of a Good Coding System	24.4	
Standardisation	24.5	
Materials Handling	24.6	
Stores Management	24.9	
<i>Questions for Discussion</i>	24.12	
<b>25. Physical Distribution Management</b>		<b>25.1</b>
Optimal Location of Warehouse	25.2	
Transportation Problem	25.9	
Problem of Route Scheduling	25.17	
Logistics Management and its Links with Inventory Control and Other Areas	25.21	
Supply Chains and Physical Distribution Management (PDM)	25.22	
<i>Questions for Discussion</i>	25.24	
<b>26. Materials Management—An Integrated View</b>		<b>26.1</b>
Adaptability Considerations	26.2	
Inventory as a Part of Production Strategy	26.2	
Organization Effectiveness	26.3	
A Multi-Level Interactive Process	26.3	
<i>Questions for Discussion</i>	26.4	
<b>27. Supply Chain Management</b>		
Supplies on a War Footing	27.1	
Competition on the Basis of Time and Quality Makes a Closer Co-ordination Essential	27.2	
Supply Chain and ‘Keiretsu’	27.3	
Core Competence of Companies, Comparative Advantage of Nations and Outsourcing	27.4	
Marketplace Uncertainties and Channel Relationships	27.5	
Building a Supply Chain	27.5	
POM Objectives and Supply Chain	27.7	
Orientation and Implementation of Supply Chain Principles Within a Company	27.8	
Purchasing Function and Supply Chain Management	27.10	
Single Source versus Multiple Sources	27.13	
Leadership: Need of the Hour	27.16	
<i>Highlight: Application of Supply Chain Principles at Titan Industries Ltd.</i>	27.17	
<i>Questions for Discussion</i>	27.19	

## SECTION V

### Spatial Decisions in Production and Operations Management

<b>28. Plant Layout</b>	<b>28.3</b>
Features	28.3
Basic Principles	28.4
Costs	28.6
Basic Types of Layout	28.6
Merits and Demerits	28.8
Optimisation in a Product/Line Layout	28.10
Optimisation in a Process Layout	28.10
CRAFT: Computer Programme to Solve Process Layout Problems	28.13
Use of Miniature 3-D Models	28.16
Application in Service Industries	28.16
<i>Questions for Discussion</i>	28.19
<i>Appendix: Multi-Objective Approach to Facilities Layout Problem</i>	28.21
<b>29. Cellular Manufacturing</b>	<b>29.1</b>
Demerits of Process and Product Layouts	29.2
Cellular Manufacturing as a Solution to the Conventional Layout Problems	29.3
How are 'Cells' Formed?	29.5
Limitations of Cellular Manufacturing	29.12
A Broader Concept of Group Technology	29.13
<i>Questions for Discussion</i>	29.14
<b>30. Location of Facilities</b>	<b>30.1</b>
Nature of Location Decision	30.1
Location Decision: An Integral Part of Organisational Strategies	30.1
Situations that Influence Location Decision	30.2
Case of the Already Established Organisation	30.4
Location Choice For the First Time	30.5
Choice of a Site Within a Region	30.6
Backward Areas and Industrial Policy	30.10
Global Location	30.11
Reasons for a Foreign Location	30.12
Models for Location of Service Facilities	30.14
<i>Questions for Discussion</i>	30.17

## SECTION VI

### Timing Decisions

<b>31. Production Planning and Control</b>	<b>31.4</b>
What is Production Planning	31.4

Production Planning as an Integral Part of the Corporate Planning Process	31.4	
What is Production Control	31.8	
Integrative Nature of Production Plans	31.8	
Centralisation and Decentralisation	31.9	
<i>Questions for Discussion</i>	31.10	
<b>32. Aggregate Planning</b>		<b>32.1</b>
What is Aggregate Planning	32.1	
Strategies and Costs	32.2	
Assembly Line Balancing	32.12	
<i>Questions for Discussion</i>	32.20	
<b>33. Scheduling</b>		<b>33.1</b>
Job-shop Type Production	33.1	
Shop Loading Methods	33.2	
Sequencing or Prioritization	33.7	
Use of Computer for Scheduling	33.20	
Scheduling in Mass, Continuous and Project Type Production Systems	33.21	
Line Of Balance (LOB) Technique	33.21	
Issues of Flexibility in Planning and Scheduling	33.25	
<i>Questions for Discussion</i>	33.27	
<b>34. Project Management—I</b>		<b>34.1</b>
What is a Project	34.1	
Elements	34.1	
Project Management in India	34.2	
Elements of Feasibility Analysis	34.2	
Detailed Evaluation	34.4	
Social Cost-Benefit Analysis	34.5	
Project Formulation	34.7	
<i>Appendix: A Case Study on Social Cost-Benefit Analysis</i>	34.15	
<b>35. Project Management—II</b>		<b>35.1</b>
Time Analysis	35.1	
Critical Path	35.2	
Uses of Different Floats	35.5	
Resource Analysis	35.6	
Application of Network Technique in Practice	35.10	
Technical Limitation of PERT/CPM	35.13	
Precedence Networking	35.14	
Project Evaluation and Post-Implementation Analysis	35.15	
<i>Highlight: Reliance Petroleum Refinery at Jamnagar</i>	35.18	
<i>Questions for Discussion</i>	35.21	
<i>Appendix: PERT System of Networking</i>	35.23	

---

<b>36. Just-In-Time Production</b>	<b>36.1</b>
Single Unit Production and Conveyance	36.1
Yō-i-don and Standardization	36.2
Kanban Production Information System	36.4
Impetus to Quality Production	36.6
Differences between J-I-T and MRP	36.8
J-I-T as a Business Philosophy	36.8
The Indian Response	36.9
<i>Questions for Discussion</i>	36.10
<b>Epilogue</b>	<b>E.1</b>
Flexible Manufacturing System (FMS)	E.2
Robotics	E.3
Computer Integrated Manufacturing (CIM)	E.4
Strategy for Technological Change	E.5
Service Orientation and Customer Focus	E.6
Responsibility Towards Environment and Ecology	E.7
<i>Questions for Discussion</i>	E.10
<b>Supplement: Reports of the Tandon Committee and Chore Committee</b>	<b>S.1</b>
History	S.1
Norms for Inventories and Receivable	S.2
Methods of Computing Ceiling on Bank Finance	S.5
Monitoring and Control by Banks	S.5
Chore Committee Recommendations	S.7
<i>Questions for Discussion</i>	S.8
<i>Appendix: Forms for Quarterly Information System</i>	S.9
<i>Bibliography</i>	<b>B.1</b>
<i>Index</i>	<b>I.1</b>
