

Detailed Contents

<i>Preface</i>	<i>xix</i>
<i>Acknowledgements</i>	<i>xxi</i>
<i>List of Abbreviations</i>	<i>xxiii</i>

PART I: INTRODUCTION TO DIGITAL COMMUNICATION

1. Introduction	3
1.1 Historical Development	3
1.2 Digital Communication System: An overview	7
1.2.1 Functional Description	7
1.2.2 Communication Channel Classification	9
1.2.3 Performance Measure of Communication Systems	10
1.3 Further Reading	12
<i>Bibliography</i>	12
<i>Problems</i>	14
2. Signals and Systems: Some Fundamental Concepts	15
2.1 Geometrical Representation of Signals	15
2.1.1 Gram-Schmidt Orthogonalisation Procedure (GSOP)	20
2.2 Bandwidth	25
2.2.1 Bandwidth Definition	25
2.2.2 Bandwidth of Digital Signal or Data	26
2.3 Mathematical Models of Communication Channel	29
2.3.1 Additive Noise Channel	29
2.3.2 Linear Filter Channel	30
2.3.3 Linear Time-Variant Filter Channel	30
2.4 A Probabilistic View of Communication Signals and Systems	31
2.4.1 Statistical Parameters of Random Variables	32
2.4.2 Probability Models of Random Variables	45
2.4.3 Statistical Averages of Random Processes	59
2.4.4 Stationarity of Random Processes	61

- 2.4.5 Ergodicity of Random Processes 71
- 2.4.6 Complex-valued Random Process 76
- 2.4.7 Systems with Random Signal Input 77
- 2.4.8 Discrete Random Signals and Systems 81
- 2.5 Bandpass Signals and Systems 86
 - 2.5.1 Hilbert Transform 86
 - 2.5.2 Pre-Envelope 89
 - 2.5.3 Complex Envelope 90
- 2.6 Further Reading 99
- Bibliography* 100
- Problems* 100

PART II: BASEBAND SYSTEMS

- 3. Baseband Transmission Techniques: Formatting** **109**
 - 3.1 Formatting Text 110
 - 3.2 Sampling 111
 - 3.2.1 Impulse Sampling 111
 - 3.2.2 Natural Sampling 113
 - 3.2.3 Sampler Implementation 115
 - 3.3 Quantisation 118
 - 3.3.1 Uniform Quantisation 119
 - 3.3.2 Non-Uniform Quantisation 122
 - 3.4 Encoding Techniques for Analog Sources 124
 - 3.4.1 Temporal Waveform Encoding 125
 - 3.4.2 Spectral Waveform Encoding 167
 - 3.4.3 Model-Based Encoding 169
 - 3.4.4 Comparison of Speech Encoding Methods 174
 - 3.5 Further Reading 175
 - Bibliography* 175
 - Problems* 176
- 4. Baseband Transmission Techniques: Coding** **178**
 - 4.1 Source Coding Techniques for Digital Signal 178
 - 4.1.1 Information 178
 - 4.1.2 Entropy 180
 - 4.1.3 Source Coding for a Discrete Memoryless Source 184

4.1.4	Compact Code	190
4.2	Channel Coding	198
4.2.1	Error Control Codes	199
4.3	Information Transfer from Transmitter to Receiver	238
4.3.1	Concept of Error Free Communication	238
4.3.2	Mutual Information	240
4.3.3	Discrete Channel Capacity	247
4.3.4	Channel Capacity for Continuous Channels	254
4.4	Line Codes	265
4.4.1	Classification of Line Codes	265
4.4.2	Desirable Properties of a Line Code	267
4.4.3	Power Spectra of Line Codes	268
4.5	Signal Space Representation of Baseband Signals	280
4.5.1	M-ary Baseband	280
4.5.2	M-ary Orthogonal	282
4.5.3	M-ary Biorthogonal	282
4.5.4	M-ary Simplex	283
4.6	Further Reading	285
	<i>Bibliography</i>	285
	<i>Problems</i>	286

5. Baseband Reception Techniques

293

5.1	Noise in Communication Systems	294
5.2	Receiving Filter	296
5.2.1	Correlator Type Receiving Filter	296
5.2.2	Matched-Filter Type Receiving Filter	302
5.3	Equalising Filter	310
5.3.1	Signal and System Design for Avoiding ISI	311
5.3.2	Implementation of Equalising Filter	328
5.3.3	Graphical Display of ISI: Eye Pattern	336
5.4	Sampler	337
5.4.1	Synchronisation	337
5.5	Detector	341
5.5.1	Maximum Likelihood Detector	343
5.5.2	Error Probability	346
5.5.3	Figure-of-merit for Digital Detection	359
5.6	Further Reading	360
	<i>Bibliography</i>	360
	<i>Problems</i>	361

PART III: BANDPASS SYSTEMS

6. Bandpass Signal Transmission	371
6.1 Representation of Digital Modulated Signal	372
6.1.1 Memoryless Modulation Methods	373
6.1.2 Nonlinear Modulation Methods with Memory	394
6.2 Spectral Characteristics of Digitally Modulated Signals	405
6.2.1 Linearly Modulated Signals	405
6.2.2 Nonlinearly Modulated Signals	414
6.3 Further Reading	420
<i>Bibliography</i>	420
<i>Problems</i>	421
7. Bandpass Signal Reception	425
7.1 Synchronisation	426
7.1.1 Phase Jitter in Symbol Synchronisation	426
7.1.2 Carrier Synchronisation	429
7.2 Bandpass Receiving Filter	435
7.3 Error Performance of Bandpass Systems	436
7.3.1 Coherent Detection Systems	437
7.3.2 Non-coherent Detection Systems	454
7.4 Performance Evaluation of Communication Systems	475
7.4.1 Amplitude Modulation	477
7.4.2 Frequency Modulation	477
7.4.3 Binary Baseband Digital Transmission	478
7.4.4 M-ary Baseband Digital Transmission	479
7.4.5 PCM	480
7.4.6 Digital Bandpass Modulation	482
7.5 Further Reading	484
<i>Bibliography</i>	485
<i>Problems</i>	486
<i>Appendices</i>	489
<i>Q and Error Functions</i>	489
<i>Continuous Phase Modulation (CPM)</i>	492
<i>Decision-Directed Carrier Recovery</i>	503
<i>Index</i>	513
