

CONTENTS

CHAPTER 1::			
Introducing Computer Systems	2		
Chapter Contents	2		
Lesson 1A:			
Exploring Computers and Their Uses	3		
Overview: Computers in Our World	3		
The Computer Defined	4		
Computers for Individual Users	5		
Desktop Computers	5		
Workstations	6		
Notebook Computers	6		
Tablet PCs	7		
Handheld PCs	7		
Smart Phones	7		
Computers for Organizations	8		
Network Servers	8		
Mainframe Computers	9		
Minicomputers	10		
Supercomputers	10		
Computers in Society	11		
Productivity Tip: Choosing the Right Tool for the Job	12		
Why Are Computers So Important?	12		
Home	14		
Education	15		
Small Business	15		
Industry	16		
Government	17		
Health Care	18		
Norton Notebook: The Merging of Media and Meaning	18		
Lesson 1A Review	20		
Lesson 1B:			
Looking Inside the Computer System	24		
Overview: Dissecting the Ultimate Machine	24		
The Parts of a Computer System	25		
Hardware	25		
Software	25		
		Data	25
		Users	26
		The Information Processing Cycle	26
		Essential Computer Hardware	27
		Processing Devices	28
		Memory Devices	29
		<i>Random Access Memory</i>	29
		<i>Read-Only Memory</i>	29
		Input and Output Devices	30
		Storage Devices	31
		<i>Magnetic Storage</i>	31
		<i>Optical Storage</i>	32
		Software Brings the Machine to Life	32
		System Software	33
		Application Software	33
		Computer Data	34
		At Issue: Computerized Disease Management	36
		Computer Users	38
		The User's Role	38
		"Userless" Computers	39
		Computers In Your Career: Using Computers Outside of the IT Industry	40
		Lesson 1B Review	42
		Chapter Skills Review	46
		Chapter Labs	46
		Discussion Questions	47
		Research and Report	47
		Ethical Issues	47
		CHAPTER 2::	
		Interacting with Your Computer	48
		Chapter Contents	48
		Lesson 2A:	
		Using the Keyboard and Mouse	49
		Overview: The Keyboard and Mouse	49
		The Keyboard	50
		The Standard Keyboard Layout	50
		<i>The Alphanumeric Keys</i>	50
		<i>The Modifier Keys</i>	50

<i>The Numeric Keypad</i>	51	Chapter Labs	84
<i>The Function Keys</i>	51	Discussion Questions	85
<i>The Cursor-Movement Keys</i>	52	Research and Report	85
<i>Special-Purpose Keys</i>	52	Ethical Issues	85
How the Computer Accepts Input from the Keyboard	53	CHAPTER 3::	
The Mouse	54	Seeing, Hearing, and Printing Data	86
Using the Mouse	56	Chapter Contents	86
Mouse Button Configurations	58	Lesson 3A:	
Variants of the Mouse	58	Video and Sound	87
Trackballs	59	Overview: Reaching Our Senses with Sight and Sound	87
Trackpads	59	Monitors	88
Pointers in the Keyboard		CRT Monitors	89
Productivity Tip: Saving Time With Keyboard		Flat-Panel Monitors	90
Shortcuts	60	Other Types of Monitors	92
Ergonomics and Input Devices	60	Comparing Monitors	93
Repetitive Stress Injuries	61	<i>Size</i>	94
Avoiding Keyboard-Related Injuries	62	<i>Resolution</i>	94
At Issue: Computer Voting—Is It a Good Thing?	62	<i>Refresh Rate</i>	95
Lesson 2A Review	65	<i>Dot Pitch</i>	96
Lesson 2B:		Video Cards	96
Inputting Data in Other Ways	68	Ergonomics and Monitors	97
Overview: Options for Every Need and Preference	68	Eyestrain	97
Devices for the Hand	69	Norton Notebook: Flat Video Is Anything But	98
Pens	69	Electromagnetic Fields	98
Touch Screens	70	Data Projectors	100
Game Controllers	70	Sound Systems	100
Optical Input Devices	71	Sound Cards	100
Bar Code Readers	71	Headphones and Headsets	102
Image Scanners and Optical Character Recognition (OCR)	72	At Issue: Call of the Wild: Bioacoustic Research	102
Norton Notebook: Speech Recognition	74	Lesson 3A Review	104
Audiovisual Input Devices	74	Lesson 3B:	
Microphones	74	Printing	107
Other Types of Audio Input	76	Overview: Putting Digital Content in Your Hands	107
Video Input	77	Commonly Used Printers	108
Digital Cameras	77	Dot Matrix Printers	108
Computers In Your Career: Hardware Technician	78	Ink Jet Printers	110
Lesson 2B Review	80	Laser Printers	111
Chapter Skills Review	84	All-in-One Peripherals	112

Comparing Printers	112	The Computer's Internal Clock	136
High-Quality Printers	113	The Bus	136
Photo Printers	113	<i>The Data Bus</i>	136
Productivity Tip: The Care and Feeding of Printers	114	<i>The Address Bus</i>	137
Thermal-Wax Printers	114	<i>Bus Standards</i>	137
Dye-Sublimation Printers	115	Cache Memory	138
Plotters	116	Productivity Tip: Do You Need More RAM?	140
Computers In Your Career: Computer Training Specialist	116	Lesson 4A Review	142
Lesson 3B Review	118	Lesson 4B:	
Chapter Skills Review	122	Modern CPUs	146
Chapter Labs	122	Overview: The Race for the Desktop	146
Discussion Questions	123	A Look inside the Processor	147
Research and Report	123	Microcomputer Processors	147
Ethical Issues	123	Intel Processors	148
		Advanced Micro Devices (AMD) Processors	148
		Freescale Processors	149
		IBM Processors	149
		Comparing Processors	150
		Norton Notebook: What Is a Computer Chip?	150
		RISC Processors	151
		Parallel Processing	151
		Extending the Processor's Power to Other Devices	152
		Standard Computer Ports	152
		Serial and Parallel Ports	153
		Specialized Expansion Ports	154
		<i>SCSI</i>	154
		<i>USB</i>	154
		<i>IEEE 1394 (FireWire)</i>	155
		<i>Musical Instrument Digital Interface (MIDI)</i>	155
		Expansion Slots and Boards	155
		Computers In Your Career: Computer Sales Professional	156
		<i>PC Cards</i>	156
		<i>Plug and Play</i>	157
		Lesson 4B Review	158
		Chapter Skills Review	162
		Chapter Labs	162
		Discussion Questions	163
		Research and Report	163
		Ethical Issues	163
CHAPTER 4 ::			
Processing Data	124		
Chapter Contents	124		
Lesson 4A:			
Transforming Data into Information	125		
Overview: The Difference between Data and Information	125		
How Computers Represent Data	126		
Number Systems	126		
Bits and Bytes	127		
Text Codes	127		
How Computers Process Data	128		
The CPU	130		
<i>The Control Unit</i>	130		
<i>The Arithmetic Logic Unit</i>	130		
Machine Cycles	130		
Memory	131		
<i>Nonvolatile Memory</i>	132		
<i>Flash Memory</i>	132		
<i>Volatile Memory</i>	132		
Factors Affecting Processing Speed	133		
Registers	133		
At Issue: Cyborgs Among Us: Wearable Technology	134		
Memory and Computing Power	134		

CHAPTER 5::

Storing Data

Chapter Contents

Lesson 5A:

Types of Storage Devices

Overview: An Ever-Growing Need

Categorizing Storage Devices

Magnetic Storage Devices

How Data Is Stored on a Disk

How Data Is Organized on a Magnetic Disk

Tracks and Sectors

How the Operating System Finds Data on a Disk

Diskettes (Floppy Disks)

Hard Disks

Removable High-Capacity Magnetic Disks

Tape Drives

Productivity Tip: Backing Up Your Data

Optical Storage Devices

CD-ROM

DVD-ROM

Recordable Optical Technologies

Solid-State Storage Devices

Flash Memory

Norton Notebook: Looking Back, Moving Forward

Smart Cards

Solid-State Disks

Lesson 5A Review

Lesson 5B:

Measuring and Improving Drive Performance

Overview: The Need for Speed

Average Access Time

Data Transfer Rate

Optimizing Disk Performance

Cleaning Up Unneeded Files

Scanning a Disk for Errors

Defragmenting a Disk

File Compression

164

CHAPTER 6::

Using Operating Systems

Chapter Contents

Lesson 6A:

Operating System Basics

Overview: The Purpose of Operating Systems

Types of Operating Systems

Real-Time Operating Systems

Single-User/Single-Tasking Operating Systems

Single-User/Multitasking Operating Systems

Multi-User/Multitasking Operating Systems

Providing a User Interface

Graphical User Interfaces

Command-Line Interfaces

Running Programs

Sharing Information

Productivity Tip: Do-It-Yourself Tech Support

Managing Hardware

Processing Interrupts

Working with Device Drivers

Enhancing an OS with Utility Software

Backup Utilities

Antivirus

Firewall

Intrusion Detection

Screen Savers

Norton Notebook: Changing Your PC's Operating System	218	Overview: Sharing Data Anywhere, Anytime	243
Lesson 6A Review	220	The Uses of a Network	244
		Simultaneous Access	244
		Shared Peripheral Devices	245
		Personal Communications	246
		Easier Data Backup	247
Lesson 6B:		Common Types of Networks	248
Survey of PC and Network Operating Systems	224	Local Area Networks (LANs)	248
Overview: Operating Systems Yesterday and Today	224	Wide Area Networks (WANs)	248
PC Operating Systems	225	Hybrid Networks	248
DOS	225	Campus Area Networks (CANs)	249
Windows NT Workstation	225	Metropolitan Area Networks (MANs)	249
Windows 9x	226	Home Area Networks (HANs)	249
Windows 2000 Professional	228	Intranets and Extranets	249
Windows XP	228	How Networks Are Structured	250
The Macintosh Operating System	229	Server-Based Networks	250
UNIX for the Desktop	229	Client/Server Networks	250
Linux for the Desktop	229	Peer-to-Peer Networks	251
At Issue: Controlling Computers with the Mind	230	At Issue: Catching "Cyberslackers" on the Job	252
Network Operating Systems	230	Network Topologies and Protocols	253
Windows NT Server	231	Network Media	255
Windows 2000 Server	232	Wire-Based Media	255
Windows Server 2003	232	Wireless Media	256
Novell NetWare	232	Network Hardware	256
UNIX for Servers	233	Network Interface Cards (NICs)	256
Linux for Servers	233	Network Linking Devices	256
Embedded Operating Systems	233	Cabling Equipment	258
Computers In Your Career: Help Desk and Technical Support Specialists	234	Norton Notebook: Fighting Hackers	260
Lesson 6B Review	236	Protocols	261
Chapter Skills Review	240	Lesson 7A Review	263
Chapter Labs	240		
Discussion Questions	241	Lesson 7B:	
Research and Report	241	Data Communications	267
Ethical Issues	241	Overview: The Local and Global Reach of Networks	267
		Data Communications with Standard Telephone Lines and Modems	268
		Modems	268
		Uses for a Modem	270
		Productivity Tip: The Telecommuter's Checklist	270
		Using Digital Data Connections	271
		Broadband Connections	272
CHAPTER 7::			
Networks	242		
Chapter Contents	242		
Lesson 7A:			
Networking Basics	243		

DSL Technologies	272	Getting Help with Your Browser	299
Cable Modem Connections	273	Searching the Web	299
ATM	274	Using a Directory	301
Wireless Networks	274	Using a Search Engine	301
Wireless: 802.11	275	<i>Using Boolean Operators in Your Searches</i>	302
Wireless Access Point	275	<i>Using Advanced Search Options</i>	303
Wireless Adapter	275	Productivity Tip: Evaluating the Reliability of	
Computers In Your Career: Careers in Networking	276	Search Results and Web Sites	304
Lesson 7B Review	278	Using a Metasearch Engine	306
Chapter Skills Review	282	Sponsored versus Nonsponsored Links	306
Chapter Labs	282	Using Site-Specific Search Tools	307
Discussion Questions	283	Lesson 8A Review	308
Research and Report	283	Lesson 8B:	
Ethical Issues	283	E-Mail and Other Internet Services	312
		Overview: Communicating Through the Internet	312
CHAPTER 8::		Using E-Mail	313
Presenting the Internet	284	Understanding E-Mail	313
Chapter Contents	284	<i>E-Mail Addresses</i>	313
		<i>Listserv Systems</i>	314
Lesson 8A:		Using an E-Mail Program	314
The Internet and the World Wide Web	285	<i>Creating a Message</i>	314
Overview: What Is the Internet?	285	<i>Receiving and Reading a Message</i>	315
The Internet's History	286	At Issue: Stomping Out Spam	316
The Beginning: A "Network of Networks"	286	Using Web-Based E-Mail Services	317
Today: Still Growing	287	More Features of the Internet	317
The Internet's Major Services	288	News	317
Understanding the World Wide Web	288	FTP	319
How the Web Works	289	Internet Relay Chat (IRC) and Web-Based Chat	320
Web Browsers and HTML Tags	290	Instant Messaging	321
URLs	291	Online Services	321
Helper Applications and Multimedia Content	292	Peer-to-Peer Services	322
Norton Notebook: Internet Time Travel:		Computers In Your Career: Documentation and	
The Wayback Machine	294	Online Help System Designer	322
Using Your Browser and the World Wide Web	295	Lesson 8B Review	324
Launching Your Browser	296	Chapter Skills Review	328
Navigating the Web	296	Chapter Labs	328
<i>Using URLs</i>	296	Discussion Questions	329
<i>Using Hyperlinks</i>	297	Research and Report	329
<i>Using the Browser's Navigation Tools</i>	298	Ethical Issues	329
Closing Your Browser	298		

CHAPTER 9::			
Working in the Online World	330		
Chapter Contents	330		
Lesson 9A:			
Connecting to the Internet	331		
Overview: Joining the Internet Phenomenon	331		
Connecting to the Internet through Wires	332		
Dial-up Connections	332		
High-Speed Broadband Connections	332		
<i>Integrated Services Digital Network (ISDN) Service</i>	333		
<i>Digital Subscriber Line (DSL) Services</i>	333		
<i>Cable Modem Service</i>	334		
How PC Applications Access the Internet	334		
Connecting to the Internet Wirelessly	335		
Wireless WAN (WWAN) Connections	335		
At Issue: On the Beat with Techno-Cops	336		
Satellite Services	336		
WLAN Connections	338		
Productivity Tip: Sharing an Internet Connection	340		
Lesson 9A Review	342		
Lesson 9B:			
Doing Business in the Online World	345		
Overview: Commerce on the World Wide Web	345		
E-Commerce at the Consumer Level	346		
Online Shopping	346		
<i>Online Stores versus Physical Locations</i>	347		
<i>Using Online Catalogs</i>	347		
<i>Paying for Purchases</i>	348		
<i>Getting Customer Service</i>	349		
Online Banking and Finance	349		
<i>Online Banking</i>	350		
<i>Online Finance</i>	350		
E-Commerce at the Business Level	350		
Business-to-Business (B2B) Transactions	350		
Intranets and Extranets	351		
Norton Notebook: Business, the Internet and Everything	352		
Telecommuters	352		
Computers In Your Career: Career Opportunities and the Internet	354		
Security	354		
Lesson 9B Review	356		
Chapter Skills Review	360		
Chapter Labs	360		
Discussion Questions	361		
Research and Report	361		
Ethical Issues	361		
CHAPTER 10::			
Working with Application Software	362		
Chapter Contents	362		
Lesson 10A:			
Productivity Software	363		
Overview: Software to Accomplish the Work of Life	363		
Acquiring Software	364		
Commercial Software	364		
Freeware and Public Domain Software	364		
Open-Source Software	365		
Word Processing Programs	365		
The Word Processor's Interface	366		
Entering and Editing Text	366		
Formatting Text	367		
Spreadsheet Programs	368		
The Spreadsheet's Interface	368		
Entering Data in a Worksheet	369		
Presentation Programs	371		
At Issue: Who Really Owns the Software on Your PC?	372		
The Presentation Program's Interface	372		
Creating a Presentation	374		
Presenting Slide Shows	375		
Productivity Tip: Automating Your Work with Macros	376		
Personal Information Managers	376		
Lesson 10A Review	379		
Lesson 10B:			
Graphics and Multimedia	383		
Overview: Graphics, Graphics Everywhere	383		
Understanding Graphics File Formats	384		

Bitmap and Vector Graphics	384	At Issue: Play Ball! Baseball Enters the	
File Formats and Compatibility Issues	384	Information Age	414
Getting Images into Your Computer	386	Lesson 11A Review	416
Graphics Software	386		
Paint Programs	387	Lesson 11B:	
Draw Programs	387	Survey of Database Systems	420
Photo-Editing Programs	387	Overview: When Applications Grow Huge	420
Computer-Aided Design Programs	388	Enterprise Software	421
3-D and Animation Software	389	Meeting the Needs of Many Users	421
Norton Notebook: Why Own When You Can Rent?	390	Databases at Work	423
Multimedia Basics	390	Databases in Business	423
Computers In Your Career: Careers in Multimedia	392	Databases on the Internet	425
Lesson 10B Review	394	Databases for Individuals	425
Chapter Skills Review	397	Productivity Tip: Database Macros	426
Chapter Labs	397	Common Corporate Database Management Systems	428
Discussion Questions	397	Oracle	428
Research and Report	398	DB2	429
Ethical Issues	398	SQL Server	429
		MySQL	429
		Computers In Your Career: Database Careers	430
		Lesson 11B Review	432
		Chapter Skills Review	436
		Chapter Labs	436
		Discussion Questions	436
		Research and Report	437
		Ethical Issues	437
CHAPTER 11::			
Database Management	400	CHAPTER 12::	
Chapter Contents	400	Software Programming and	
		Development	438
Lesson 11A:		Chapter Contents	438
Database Management Systems	401		
Overview: The Mother of All Computer Applications	401	Lesson 12A:	
Databases and Database Management Systems	402	Creating Computer Programs	439
The Database	402	Overview: What Is a Computer Program?	439
<i>Flat-File and Relational Database Structures</i>	405	What Is a Computer Program?	440
The DBMS	405	Hardware/Software Interaction	441
Norton Notebook: Data Warehouses	406	Code	441
Working with a Database	406	Machine Code	442
Creating Database Tables	407	Programming Languages	442
<i>Understanding Field Types</i>	407		
<i>Entering Data in a Table</i>	409		
Viewing Records	409		
Sorting Records	410		
Querying a Database	412		
Generating Reports	413		

Compilers and Interpreters	443	Chapter Contents	476
Planning a Computer Program	444	Lesson 13A:	
How Programs Solve Problems	445	Understanding the Need for Security Measures	477
Program Control Flow	445	Overview: The Need for Computer Security	477
Algorithms	445	Basic Security Concepts	478
Heuristics	446	Threats	478
Productivity Tip: Finding Faster Algorithms	448	Degrees of Harm	478
Structured and Object-Oriented Programming	448	Countermeasures	478
Programming Structures	449	Threats to Users	479
At Issue: Hot and Oh-So-Cool: Technology		Identity Theft	479
Forecasts the Weather	450	Loss of Privacy	480
Object-Oriented Programming	450	<i>Public Records on the Internet</i>	480
Lesson 12A Review	452	<i>Internet Monitoring, Profiling, and Spying</i>	481
Lesson 12B:		Online Spying Tools	481
Programming Languages and the Programming Process	456	<i>Cookies</i>	481
Overview: The Keys to Successful Programming	456	<i>Web Bugs</i>	482
The Evolution of Programming Languages	457	<i>Spyware</i>	482
Categories of Programming Languages	457	Spam	483
Machine and Assembly Languages	458	Computer-Related Injuries	484
Higher-Level Languages	458	Threats to Hardware	484
<i>Third-Generation Languages</i>	459	Power-Related Threats	485
<i>Fourth-Generation Languages</i>	460	Theft and Vandalism	485
<i>Fifth-Generation Languages</i>	461	Natural Disasters	486
World Wide Web Development Languages	461	Productivity Tip: Keeping Your PC Up to Date	486
Scripting Languages	464	Threats to Data	488
The Systems Development Life Cycle for Programming	465	Malware, Viruses, and Malicious Programs	488
Norton Notebook: Artificial Intelligence:		Cybercrime	488
Will Computers Ever Think?	466	<i>Hacking</i>	489
Computers In Your Career: Careers in Programming	468	<i>Common Hacking Methods</i>	489
Lesson 12B Review	470	At Issue: Software Piracy	490
Chapter Skills Review	474	Cyberterrorism	492
Chapter Labs	474	Lesson 13A Review	493
Discussion Questions	475	Lesson 13B:	
Research and Report	475	Taking Protective Measures	497
Ethical Issues	475	Overview: Keeping Your System Safe	497
		Protecting Yourself	498
		Avoiding Identity Theft	498
		<i>Managing Your Papers</i>	498
		<i>Guarding Personal Information</i>	499
CHAPTER 13::			
Protecting Your Privacy, Your Computer, and Your Data	476		

<i>Looking at the Big Picture</i>	499	Lesson 13B Review	512
Protecting Your Privacy	499	Chapter Skills Review	516
<i>Keeping Marketers at Bay</i>	499	Chapter Labs	516
<i>Knowing Your Rights</i>	500	Discussion Questions	516
Managing Cookies, Spyware, and Other “Bugs”	501	Research and Report	517
<i>Dealing with Cookies</i>	501	Ethical Issues	517
<i>Removing Web Bugs and Spyware</i>	502	Appendix A:	
Evading Spam	502	Creating Your Own Web Page	518
Keeping Your Data Secure	503	Appendix B:	
Restricting Access to Your System	504	Buying Your First Computer	526
<i>Limiting Physical Access</i>	504	Appendix C:	
<i>Using a Firewall</i>	505	Computer Viruses	532
Backing Up Data	505	Appendix D:
