PART I

CHAPTER 1	GETTING STARTED	3
1.1	The Operating System	4
1.2	The UNIX Operating System	5
1.3	Knowing Your Machine	6
1.4	A Brief Session	7
1.5	How It All Clicked	15
1.6	Linux and GNU	17
1.7	Conclusion	18
	<i>Wrap Up</i>	18
	<i>Test Your Understanding</i>	19
	<i>Flex Your Brain</i>	19
CHAPTER 2	THE UNIX ARCHITECTURE AND COMMAND USAGE	21
2.1	The UNIX Architecture	22
2.2	Features of UNIX	25
2.3	POSIX and the Single UNIX Specification	27
2.4	Locating Commands	28
2.5	Internal and External Commands	29
2.6	Command Structure	30
2.7	Flexibility of Command Usage	32
2.8	Man Browsing the Manual Pages On-line	33
2.9	Understanding the man Documentation	34
2.10	Further Help with man -k , apropos and what is	37
2.11	When Things Go Wrong	39
2.12	Conclusion	41
	<i>Wrap Up</i>	41
	<i>Test Your Understanding</i>	42
	<i>Flex Your Brain</i>	43

CHAPTER 3 GENERAL-PURPOSE UTILITIES 44

- 3.1 **cal**: The Calendar 45
- 3.2 **date**: Displaying the System Date 45
- 3.3 **echo**: Displaying a Message 46
- 3.4 **printf**: An Alternative to **echo** 48
- 3.5 **bc**: The Calculator 49
- 3.6 **script**: Recording Your Session 50
- 3.7 Email Basics 51
- 3.8 **mailx**: The Universal Mailer 52
- 3.9 **passwd**: Changing Your Password 55
- 3.10 **who**: Who Are the Users? 57
- 3.11 **uname**: Knowing Your Machine's Characteristics 58
- 3.12 **tty**: Knowing Your Terminal 59
- 3.13 **stty**: Displaying and Setting Terminal Characteristics 59
- 3.14 Conclusion 61
 - Wrap Up* 61
 - Test Your Understanding* 62
 - Flex Your Brain* 62

CHAPTER 4 THE FILE SYSTEM 64

- 4.1 The File 65
- 4.2 What's in a (File)name? 67
- 4.3 The Parent-Child Relationship 67
- 4.4 The HOME Variable: The Home Directory 68
- 4.5 **pwd**: Checking Your Current Directory 69
- 4.6 **cd**: Changing the Current Directory 69
- 4.7 **mkdir**: Making Directories 71
- 4.8 **rmdir**: Removing Directories 71
- 4.9 Absolute Pathnames 73
- 4.10 Relative Pathnames 74
- 4.11 **ls**: Listing Directory Contents 75
- 4.12 The UNIX File System 79
- 4.13 Conclusion 80
 - Wrap Up* 80
 - Test Your Understanding* 80
 - Flex Your Brain* 81

CHAPTER 5 HANDLING ORDINARY FILES 82

- 5.1 **cat**: Displaying and Creating Files 83
- 5.2 **cp**: Copying a File 84
- 5.3 **rm**: Deleting Files 85
- 5.4 **mv**: Renaming Files 87
- 5.5 **more**: Paging Output 88
- 5.6 The **lp** Subsystem: Printing a File 91
- 5.7 **file**: Knowing the File Types 92
- 5.8 **wc**: Counting Lines, Words and Characters 93
- 5.9 **od**: Displaying Data in Octal 94
- 5.10 **cmp**: Comparing Two Files 95
- 5.11 **comm**: What is Common? 95
- 5.12 **diff**: Converting One File to Other 96
- 5.13 **dos2unix** and **unix2dos**: Converting Between DOS and UNIX 97
- 5.14 Compressing and Archiving Files 98
- 5.15 **gzip** and **gunzip**: Compressing and Decompressing Files 99
- 5.16 **tar**: The Archival Program 100
- 5.17 **zip** and **unzip**: Compressing and Archiving Together 102
- 5.18 Conclusion 103
 - Wrap Up* 103
 - Test Your Understanding* 104
 - Flex Your Brain* 104

CHAPTER 6 BASIC FILE ATTRIBUTES 106

- 6.1 **ls -l**: Listing File Attributes 106
- 6.2 The **-d** Option: Listing Directory Attributes 108
- 6.3 File Ownership 109
- 6.4 File Permissions 109
- 6.5 **chmod**: Changing File Permissions 110
- 6.6 Directory Permissions 115
- 6.7 Changing File Ownership 116
- 6.8 Conclusion 117
 - Wrap Up* 117
 - Test Your Understanding* 118
 - Flex Your Brain* 119

CHAPTER 7 THE vi EDITOR 120

- 7.1 **vi** Basics 121
- 7.2 Input Mode—Entering and Replacing Text 124

- 7.3 Saving Text and Quitting—The ex Mode 128
- 7.4 Navigation 131
- 7.5 Editing Text 134
- 7.6 Undoing Last Editing Instructions (**U** and **U**) 137
- 7.7 Repeating the Last Command (.) 138
- 7.8 Searching for a Pattern (/ and ?) 138
- 7.9 Substitution—Search and Replace (:s) 140
- 7.10 Conclusion 141
 - Wrap Up* 141
 - Test Your Understanding* 142
 - Flex Your Brain* 143

CHAPTER 8 THE SHELL 145

- 8.1 The Shell's Interpretive Cycle 146
- 8.2 Shell Offerings 147
- 8.3 Pattern Matching—The Wild-cards 147
- 8.4 Escaping and Quoting 152
- 8.5 Redirection: The Three Standard Files 154
- 8.6 /dev/null and /dev/tty: Two Special Files 160
- 8.7 Pipes 161
- 8.8 **tee**: Creating a Tee 164
- 8.9 Command Substitution 165
- 8.10 Shell Variables 166
- 8.11 Conclusion 169
 - Wrap Up* 170
 - Test Your Understanding* 170
 - Flex Your Brain* 171

CHAPTER 9 THE PROCESS 173

- 9.1 Process Basics 174
- 9.2 **ps**: Process Status 176
- 9.3 System Processes (-e or -a) 178
- 9.4 Mechanism of Process Creation 179
- 9.5 Internal and External Commands 181
- 9.6 Process States and Zombies 181
- 9.7 Running Jobs in Background 182
- 9.8 **nice**: Job Execution with Low Priority 183
- 9.9 Killing Processes with Signals 184
- 9.10 Job Control 185

- 9.11 **at** and **batch**: Execute Later 187
- 9.12 **cron**: Running Jobs Periodically 188
- 9.13 **time**: Timing Processes 190
- 9.14 Conclusion 190
 - Wrap Up* 190
 - Test Your Understanding* 191
 - Flex Your Brain* 192

CHAPTER 10 CUSTOMIZING THE ENVIRONMENT 193

- 10.1 The Shells 194
- 10.2 Environment Variables 194
- 10.3 The Common Environment Variables 195
- 10.4 Aliases (**bash** and **ksh**) 199
- 10.5 Command History (**bash** and **ksh**) 200
- 10.6 In-line Command Editing (**bash** and **ksh**) 203
- 10.7 Miscellaneous Features (**bash** and **ksh**) 204
- 10.8 The Initialization Scripts 205
- 10.9 Conclusion 207
 - Wrap Up* 208
 - Test Your Understanding* 208
 - Flex Your Brain* 209

CHAPTER 11 MORE FILE ATTRIBUTES 210

- 11.1 File Systems and Inodes 211
- 11.2 Hard Links 212
- 11.3 Symbolic Links and **ln** 215
- 11.4 The Directory 216
- 11.5 **umask**: Default File and Directory Permissions 218
- 11.6 Modification and Access Times 218
- 11.7 **find**: Locating Files 220
- 11.8 Conclusion 224
 - Wrap Up* 224
 - Test Your Understanding* 225
 - Flex Your Brain* 226

CHAPTER 12 SIMPLE FILTERS 227

- 12.1 The Sample Database 228
- 12.2 **pr**: Paginating Files 229
- 12.3 **head**: Displaying the Beginning of a File 230
- 12.4 **tail**: Displaying the End of a File 231

- 12.5 **cut**: Slitting a File Vertically 231
- 12.6 **paste**: Pasting Files 233
- 12.7 **sort**: Ordering a File 234
- 12.8 **uniq**: Locate Repeated and Nonrepeated Lines 238
- 12.9 **tr**: Translating Characters 239
- 12.10 An Example: Displaying a Word-count List 241
- 12.11 Conclusion 242
 - Wrap Up* 242
 - Test Your Understanding* 243
 - Flex Your Brain* 243

CHAPTER 13 FILTERS USING REGULAR EXPRESSIONS—**grep** AND **sed** 245

- 13.1 **grep**: Searching for a Pattern 246
- 13.2 Basic Regular Expressions (BRE)—An Introduction 249
- 13.3 Extended Regular Expressions (ERE) and **egrep** 254
- 13.4 **sed**: The Stream Editor 255
- 13.5 Line Addressing 256
- 13.6 Using Multiple Instructions (-E and -F) 257
- 13.7 Context Addressing 258
- 13.8 Writing Selected Lines to a File (**w**) 258
- 13.9 Text Editing 259
- 13.10 Substitution (**s**) 260
- 13.11 Basic Regular Expressions Revisited 263
- 13.12 Conclusion 266
 - Wrap Up* 266
 - Test Your Understanding* 267
 - Flex Your Brain* 268

CHAPTER 14 ESSENTIAL SHELL PROGRAMMING 270

- 14.1 Shell Scripts 271
- 14.2 **read**: Making Scripts Interactive 272
- 14.3 Using Command Line Arguments 273
- 14.4 **exit** and Exit Status of Command 275
- 14.5 The Logical Operators **&&** and **||**—Conditional Execution 276
- 14.6 The **if** Conditional 277
- 14.7 Using **test** and **[]** to Evaluate Expressions 278
- 14.8 The **case** Conditional 283
- 14.9 **expr**: Computation and String Handling 285
- 14.10 **\$0**: Calling a Script by Different Names 288

- 14.11 **while**: Looping 289
- 14.12 **for**: Looping with a List 291
- 14.13 **set** and **shift**: Manipulating the Positional Parameters 294
- 14.14 The Here Document (<<) 296
- 14.15 **trap**: Interrupting a Program 297
- 14.16 Debugging Shell Scripts with **set -x** 298
- 14.17 Sample Validation and Data Entry Scripts 299
- 14.18 Conclusion 302
 - Wrap Up* 302
 - Test Your Understanding* 303
 - Flex Your Brain* 303

CHAPTER 15 ESSENTIAL SYSTEM ADMINISTRATION 305

- 15.1 root: The System Administrator's Login 306
- 15.2 The Administrator's Privileges 307
- 15.3 Maintaining Security 308
- 15.4 User Management 311
- 15.5 Startup and Shutdown 313
- 15.6 Managing Disk Space 315
- 15.7 Device Files 317
- 15.8 Handling Floppy Diskettes 319
- 15.9 **cpio**: A Backup Program 321
- 15.10 **tar**: The "Tape" Archive Program 325
- 15.11 Conclusion 328
 - Wrap Up* 328
 - Test Your Understanding* 329
 - Flex Your Brain* 330

PART II

CHAPTER 16 THE X WINDOW SYSTEM 333

- 16.1 X Basics 334
- 16.2 The Common Desktop Environment (CDE) 336
- 16.3 Starting and Quitting X 338
- 16.4 The Terminal Emulator 338
- 16.5 Cut-and-Paste Operations 339
- 16.6 Running X Clients Remotely 341
- 16.7 Command Line Options 343

- 16.8 Some Standard X Clients 344
- 16.9 The Startup Files 347
- 16.10 X Resources 348
- 16.11 Conclusion 349
 - Wrap Up* 349
 - Test Your Understanding* 350
 - Flex Your Brain* 350

CHAPTER 17 NETWORKING TOOLS

351

- 17.1 TCP/IP Basics 352
- 17.2 Resolving IP Addresses 354
- 17.3 The Applications 355
- 17.4 **ping**: Checking the Network 356
- 17.5 **telnet**: Remote Login 356
- 17.6 **ftp**: File Transfer Protocol 357
- 17.7 Cryptography Basics 360
- 17.8 SSH: The Secure Shell 362
- 17.9 The SSH Tools 366
- 17.10 The Domain Name System (DNS) 368
- 17.11 Internet Mail 370
- 17.12 MIME: Handling Binary Attachments in Mail 372
- 17.13 The World Wide Web 373
- 17.14 Multimedia on the Web: MIME Revisited 377
- 17.15 Conclusion 378
 - Wrap Up* 378
 - Test Your Understanding* 379
 - Flex Your Brain* 380

CHAPTER 18 **awk**—AN ADVANCED FILTER

381

- 18.1 Simple **awk** Filtering 382
- 18.2 Splitting a Line into Fields 383
- 18.3 **printf**: Formatting Output 384
- 18.4 Variables and Expressions 384
- 18.5 The Comparison Operators 385
- 18.6 Number Processing 388
- 18.7 Variables 388
- 18.8 The **-f** Option: Storing **awk** Programs in a File 388
- 18.9 The BEGIN and END Sections 389
- 18.10 Built-in Variables 390

- 18.11 Arrays 391
- 18.12 Functions 393
- 18.13 Control Flow—The **if** Statement 394
- 18.14 Looping with **for** 396
- 18.15 Looping with **while** 398
- 18.16 Conclusion 398
 - Wrap Up* 398
 - Test Your Understanding* 399
 - Flex Your Brain* 400

CHAPTER 19 **perl**—THE MASTER MANIPULATOR 401

- 19.1 **perl** Preliminaries 402
- 19.2 The **chop** Function: Removing the Last Character 403
- 19.3 Variables and Operators 404
- 19.4 The String Handling Functions 405
- 19.5 Specifying Filenames in Command Line 406
- 19.6 **\$_**: The Default Variable 407
- 19.7 Current Line Number (**\$.**) and the Range Operator (**..**) 408
- 19.8 Lists and Arrays 408
- 19.9 **foreach**: Looping Through a List 412
- 19.10 **split**: Splitting into a List or Array 413
- 19.11 **join**: Joining a List 415
- 19.12 **dec2bin.pl**: Converting a Decimal Number to Binary 416
- 19.13 **grep**: Searching an Array for a Pattern 416
- 19.14 Associative Arrays 417
- 19.15 Regular Expressions and Substitution 420
- 19.16 File Handling 423
- 19.17 File Tests 425
- 19.18 Subroutines 426
- 19.19 Conclusion 427
 - Wrap Up* 427
 - Test Your Understanding* 428
 - Flex Your Brain* 429

CHAPTER 20 **ADVANCED vi** 431

- 20.1 Operators 431
- 20.2 The **ex** Mode: Handling Multiple Files 435
- 20.3 Named Buffers: Storing Multiple Text Sections 437
- 20.4 Numbered Buffers: Undoing Multiple Line Deletions 438

- 20.5 Entering Control Characters (*[Ctrl-v]*) 439
- 20.6 Searching for a Character 439
- 20.7 Marking Text 440
- 20.8 Customizing **vi** 440
- 20.9 Conclusion 444
 - Wrap Up* 444
 - Test Your Understanding* 444
 - Flex Your Brain* 445

CHAPTER 21 ADVANCED SHELL PROGRAMMING

446

- 21.1 Shells and Sub-shells 447
- 21.2 () and {}: Sub-shell or Current Shell? 447
- 21.3 **export**: Exporting Shell Variables 448
- 21.4 Running a Script in the Current Shell: The **.** Command 449
- 21.5 **let**: Computation—a Second Look (Korn and Bash) 450
- 21.6 Arrays (Korn and Bash) 450
- 21.7 String Handling (Korn and Bash) 452
- 21.8 Conditional Parameter Substitution 453
- 21.9 Merging Streams 455
- 21.10 Shell Functions 456
- 21.11 **eval**: Evaluating Twice 459
- 21.12 The **exec** Statement 461
- 21.13 Conclusion 464
 - Wrap Up* 464
 - Test Your Understanding* 464
 - Flex Your Brain* 465

CHAPTER 22 PROGRAM DEVELOPMENT TOOLS

466

- 22.1 Handling Multisource C Applications 466
- 22.2 A Multisource Application 467
- 22.3 **make**: Keeping Programs Up-to-date 471
- 22.4 **ar**: Building a Library (Archive) 475
- 22.5 Static and Shared Libraries 477
- 22.6 Version Control With SCCS and RCS 478
- 22.7 An SCCS Session 479
- 22.8 Activity and History Information 483
- 22.9 Continuing Editing with SCCS 484
- 22.10 The Revision Control System (RCS) 486
- 22.11 Conclusion 490

Wrap Up 490
Test Your Understanding 490
Flex Your Brain 491

CHAPTER 23 SYSTEMS PROGRAMMING I—FILES 492

- 23.1 System Call Basics 493
 - 23.2 Opening and Closing a File 495
 - 23.3 Using the I/O Calls 497
 - 23.4 Buffered and Unbuffered I/O 502
 - 23.5 **umask**: Modifying File Permissions During Creation 503
 - 23.6 Handling Errors 504
 - 23.7 File Sharing 509
 - 23.8 Directory Navigation 512
 - 23.9 Reading a Directory 513
 - 23.10 Modifying Entries in Directory 514
 - 23.11 Reading the Inode: **stat** 516
 - 23.12 Checking a File's Access Rights 521
 - 23.13 Modifying File Attributes 526
 - 23.14 Conclusion 529
- Wrap Up* 530
Test Your Understanding 531
Flex Your Brain 532

CHAPTER 24 SYSTEMS PROGRAMMING II—PROCESS CONTROL 533

- 24.1 Process Abstractions 534
- 24.2 **process.c**: Looking Up Some Process Credentials 536
- 24.3 Creating a Process 537
- 24.4 **_exit** and **exit**: Process Termination 540
- 24.5 Waiting to Pick Up Child's Exit Status 542
- 24.6 Process Groups 545
- 24.7 Zombies and Orphans 545
- 24.8 **exec**: The Final Step in Process Creation 546
- 24.9 **shell.c**: A Program with a Shell-like Capability 551
- 24.10 File Descriptor Manipulation 553
- 24.11 **pipe**: Inter-process Communication 557
- 24.12 Signal Handling 560
- 24.13 **signal**: Installing a Signal Handler 563
- 24.14 **killprocess.c**: The Final Program Using **kill** 566
- 24.15 Conclusion 569

Wrap Up 569
Test Your Understanding 570
Flex Your Brain 571

CHAPTER 25 ADVANCED SYSTEM ADMINISTRATION 572

25.1 Maintaining Security 573
25.2 Partitions and File Systems 574
25.3 The Standard File Systems and Their Types 577
25.4 **fdisk**: Creating Partitions 578
25.5 **mkfs**: Creating a File System 580
25.6 Mounting and Unmounting File Systems 580
25.7 **fsck**: File System Checking 583
25.8 System Startup and **init** 585
25.9 Shutdown and the **sync** Operation 589
25.10 Backups 589
25.11 Conclusion 591
Wrap Up 591
Test Your Understanding 592
Flex Your Brain 593

Appendix A *The C Shell—Programming Constructs* 594
Appendix B *vi/vim Command Reference* 600
Appendix C *The HOWTO* 606
Appendix D *Solutions to Test Your Understanding* 611
Appendix E *Glossary* 632
Appendix F *Bibliography* 650
