Preface to the Second Edition xiii

Preface to the First Edition xv

Acknowledgements xvii

1. Introduction 1

- 1.1 Machine Design 1
- 1.2 Basic Procedure of Machine Design 2
- 1.3 Basic Requirements of Machine Elements 4
- 1.4 Design of Machine Elements 5
- 1.5 Traditional Design Methods 8
- 1.6 Design Synthesis 9
- 1.7 Use of Standards in Design 10
- 1.8 Selection of Preferred Sizes 11
- 1.9 Aesthetic Considerations in Design 15
- 1.10 Ergonomic Considerations in Design 16
- 1.11 Concurrent Engineering 19
 - Short Answer Questions* 20
 - Problems for Practice* 21

2. Engineering Materials 22

- 2.1 Stress-strain Diagrams 22
- 2.2 Mechanical Properties of Engineering Materials 25
- 2.3 Cast Iron 28
- 2.4 B.I.S. System of Designation of Steels 31
- 2.5 Plain Carbon Steels 33

- 2.6 Free Cutting Steels 35
- 2.7 Alloy Steels 36
- 2.8 Overseas Standards 39
- 2.9 Heat Treatment of Steels 41
- 2.10 Case Hardening of Steels 42
- 2.11 Cast Steel 43
- 2.12 Aluminium Alloys 44
- 2.13 Copper Alloys 48
- 2.14 Die Casting Alloys 49
- 2.15 Ceramics 49
- 2.16 Plastics 50
- 2.17 Fibre Reinforced Plastics 54
- 2.18 Natural and Synthetic Rubbers 55
- 2.19 Creep 56
- 2.20 Selection of Material 56
- 2.21 Weighted Point Method 57
 - Short Answer Questions* 59
 - Answers to Questions with Short Questions* 62

3. Manufacturing Considerations in Design 63

- 3.1 Selection of Manufacturing Method 63
- 3.2 Design Considerations of Castings 65
- 3.3 Design Considerations of Forgings 68
- 3.4 Design Considerations of Machined Parts 70

- 3.5 Hot and Cold Working of Metals 71
 - 3.6 Design Considerations of Welded Assemblies 71
 - 3.7 Design For Manufacture and Assembly (DFMA) 74
 - 3.8 Tolerances 76
 - 3.9 Types of Fits 76
 - 3.10 B.I.S. System of Fits and Tolerances 77
 - 3.11 Selection of Fits 78
 - 3.12 Tolerances and Manufacturing Methods 81
 - 3.13 Selective Assembly 82
 - 3.14 Tolerances for Bolt Spacing 83
 - 3.15 Surface Roughness 84
 - Short Answer Questions* 85
 - Problems for Practice* 87
 - Answers to Questions with Short Questions* 88
- 4. Design against Static Load 89**
- 4.1 Modes of Failure 89
 - 4.2 Factor of Safety 90
 - 4.3 Stress-Strain Relationship 92
 - 4.4 Shear Stress and Shear Strain 93
 - 4.5 Stresses due to Bending Moment 94
 - 4.6 Stresses due to Torsional Moment 96
 - 4.7 Eccentric Axial Loading 97
 - 4.8 Design of Simple Machine Parts 98
 - 4.9 Cotter Joint 99
 - 4.10 Design Procedure for Cotter Joint 104
 - 4.11 Knuckle Joint 108
 - 4.12 Design Procedure for Knuckle Joint 113
 - 4.13 Principal Stresses 118
 - 4.14 Theories of Elastic Failure 120
 - 4.15 Maximum Principal Stress Theory 121
 - 4.16 Maximum Shear Stress Theory 122
 - 4.17 Distortion-Energy Theory 125
 - 4.18 Selection and use of Failure Theories 127
 - 4.19 Levers 131
 - 4.20 Design of Levers 133
 - 4.21 Fracture Mechanics 143
 - 4.22 Curved Beams 145
 - 4.23 Thermal Stresses 149
 - 4.24 Residual Stresses 151
 - Short Answer Questions* 152
 - Problems for Practice* 153
- 5. Design against Fluctuating Load 156**
- 5.1 Stress Concentration 156
 - 5.2 Stress Concentration Factors 157
 - 5.3 Reduction of Stress Concentration 160
 - 5.4 Fluctuating Stresses 165
 - 5.5 Fatigue Failure 166
 - 5.6 Endurance Limit 168
 - 5.7 Low Cycle and High Cycle Fatigue 170
 - 5.8 Notch Sensitivity 170
 - 5.9 Endurance Limit-Approximate Estimation 172
 - 5.10 Reversed Stresses-Design for Finite and Infinite Life 176
 - 5.11 Cumulative Damage in Fatigue 182
 - 5.12 Soderberg and Goodman Lines 184
 - 5.13 Modified Goodman Diagrams 185
 - 5.14 Gerber Equation 192
 - 5.15 Fatigue Design under Combined Stresses 194
 - 5.16 Impact Stresses 196
 - Short Answer Questions* 199
 - Problems for Practice* 200
- 6. Power Screws 202**
- 6.1 Power Screws 202
 - 6.2 Forms of Threads 203
 - 6.3 Multiple Threaded Screws 205
 - 6.4 Terminology of Power Screw 206
 - 6.5 Torque Requirement—Lifting Load 207
 - 6.6 Torque Requirement—Lowering Load 207
 - 6.7 Self Locking Screw 208
 - 6.8 Efficiency of Square Threaded Screw 209
 - 6.9 Efficiency of Self-Locking Screw 211
 - 6.10 Trapezoidal and Acme

- Threads 211
- 6.11 Collar Friction Torque 212
- 6.12 Overall Efficiency 213
- 6.13 Coefficient of Friction 213
- 6.14 Design of Screw and Nut 214
- 6.15 Design of Screw Jack 224
- 6.16 Differential and Compound Screws 233
- 6.17 Recirculating Ball Screw 234
- Short Answer Questions* 235
- Problems for Practice* 237
- 7. Threaded Joints 238**
- 7.1 Threaded Joints 238
- 7.2 Basic Types of Screw Fastening 239
- 7.3 Cap Screws 241
- 7.4 Setscrews 243
- 7.5 Bolt of Uniform Strength 244
- 7.6 Locking Devices 245
- 7.7 Terminology of Screw Threads 247
- 7.8 ISO Metric Screw Threads 248
- 7.9 Materials and Manufacture 251
- 7.10 Bolted Joint— Simple Analysis 251
- 7.11 Eccentrically Loaded Bolted Joints in Shear 253
- 7.12 Eccentric Load Perpendicular to Axis of Bolt 256
- 7.13 Eccentric Load on Circular Base 262
- 7.14 Torque Requirement for Bolt Tightening 268
- 7.15 Dimensions of Fasteners 269
- 7.16 Design of Turnbuckle 271
- 7.17 Elastic Analysis of Bolted Joints 274
- 7.18 Bolted Joint under Fluctuating Load 277
- Short Answer Questions* 289
- Problems for Practice* 290
- 8. Welded Joints 293**
- 8.1 Welded Joints 293
- 8.2 Welding Processes 294
- 8.3 Stress Relieving of Welded Joints 295
- 8.4 Butt Joints 296
- 8.5 Fillet Joints 297
- 8.6 Strength of Butt Welds 298
- 8.7 Strength of Parallel Fillet Welds 299
- 8.8 Strength of Transverse Fillet Welds 300
- 8.9 Maximum Shear Stress in Parallel Fillet Weld 302
- 8.10 Maximum Shear Stress in Transverse Fillet Weld 303
- 8.11 Axially Loaded Unsymmetrical Welded Joints 305
- 8.12 Eccentric Load in Plane of Welds 306
- 8.13 Welded Joint Subjected to Bending Moment 312
- 8.14 Welded Joint Subjected to Torsional Moment 315
- 8.15 Strength of Welded Joints 316
- 8.16 Welded Joints Subjected to Fluctuating Forces 317
- 8.17 Welding Symbols 318
- 8.18 Weld Inspection 319
- Short Answer Questions* 320
- Problems for Practice* 320
- 9. Shafts, Keys and Couplings 323**
- 9.1 Transmission Shafts 323
- 9.2 Shaft Design on Strength Basis 325
- 9.3 Shaft Design on Torsional Rigidity Basis 327
- 9.4 ASME Code for Shaft Design 327
- 9.5 Design of Hollow Shaft on Strength Basis 336
- 9.6 Design of Hollow Shaft on Torsional Rigidity Basis 338
- 9.7 Flexible Shafts 340
- 9.8 Keys 340
- 9.9 Saddle Keys 341
- 9.10 Sunk Keys 341
- 9.11 Feather Key 343
- 9.12 Woodruff Key 343

- 9.13 Design of Square And Flat Keys 344
- 9.14 Design of Kennedy Key 346
- 9.15 Splines 348
- 9.16 Couplings 350
- 9.17 Muff Coupling 351
- 9.18 Design Procedure for Muff Coupling 352
- 9.19 Clamp Coupling 353
- 9.20 Design Procedure for Clamp Coupling 355
- 9.21 Rigid Flange Couplings 356
- 9.22 Design Procedure for Rigid Flange Coupling 359
- 9.23 Bushed-pin Flexible Coupling 362
- 9.24 Design Procedure for Flexible Coupling 365
- 9.25 Design for Lateral Rigidity 370
- 9.26 Castigliano's Theorem 375
- 9.27 Area Moment Method 377
- 9.28 Graphical Integration Method 377
- 9.29 Critical Speed of Shafts 380
Short Answer Questions 383
Problems for Practice 385
- 10. Springs 389**
- 10.1 Springs 389
- 10.2 Types of Spring 389
- 10.3 Terminology of Helical Spring 391
- 10.4 Styles of End 393
- 10.5 Stress and Deflection Equations 393
- 10.6 Series and Parallel Connections 396
- 10.7 Spring Materials 397
- 10.8 Design of Helical Springs 399
- 10.9 Spring Design — Trial and Error Method 401
- 10.10 Design Against Fluctuating Load 402
- 10.11 Concentric Springs 422
- 10.12 Optimum Design of Helical Spring 426
- 10.13 Surge in Spring 428
- 10.14 Helical Torsion Springs 429
- 10.15 Spiral Springs 431
- 10.16 Multi-leaf Spring 433
- 10.17 Nipping of Leaf Springs 435
- 10.18 Belleville Spring 437
- 10.19 Shot Peening 439
Short Answer Questions 439
Problems for Practice 440
- 11. Friction Clutches 444**
- 11.1 Clutches 444
- 11.2 Torque Transmitting Capacity 446
- 11.3 Multi-disk Clutches 452
- 11.4 Friction Materials 455
- 11.5 Cone Clutches 457
- 11.6 Centrifugal Clutches 461
- 11.7 Energy Equation 463
- 11.8 Thermal Considerations 465
Short Answer Questions 467
Problems for Practice 467
- 12. Brakes 469**
- 12.1 Brakes 469
- 12.2 Energy Equations 469
- 12.3 Block Brake with Short Shoe 472
- 12.4 Block Brake with Long Shoe 477
- 12.5 Pivoted Block Brake with Long Shoe 479
- 12.6 Internal Expanding Brake 481
- 12.7 Band Brakes 487
- 12.8 Disk Brakes 490
- 12.9 Thermal Considerations 493
Short Answer Questions 494
Problems for Practice 495
- 13. Belt Driver 497**
- 13.1 Belt Drives 497
- 13.2 Belt Constructions 499
- 13.3 Geometrical Relationships 501
- 13.4 Analysis of Belt Tensions 502
- 13.5 Condition for Maximum Power 505
- 13.6 Condition for Maximum Power (Alternative Approach) 506
- 13.7 Characteristics of Belt Drives 507
- 13.8 Selection of Flat-Belts from Manufacturer's Catalogue 512
- 13.9 Pulleys for Flat Belts 515
- 13.10 Arms of Cast Iron Pulley 519

- 13.11 V-Belts 522
- 13.12 Selection of V-Belts 535
- 13.13 V- Grooved Pulley 536
- 13.14 Belt Tensioning Methods 540
- 13.15 Ribbed V Belts 540
 - Short Answer Questions* 542
 - Problems for Practice* 543
- 14. Chain Drives 545**
 - 14.1 Chain Drives 545
 - 14.2 Roller Chains 547
 - 14.3 Geometric Relationships 549
 - 14.4 Polygonal Effect 550
 - 14.5 Power Rating of Roller Chains 511
 - 14.6 Sprocket Wheels 553
 - 14.7 Design of Chain Drive 555
 - 14.8 Chain Lubrication 557
 - 14.9 Silent Chain 564
 - Short Answer Questions* 564
 - Problems for Practice* 565
- 15. Rolling Contact Bearings 566**
 - 15.1 Bearings 566
 - 15.2 Types of Rolling Contact Bearing 567
 - 15.3 Principle of Self-Aligning Bearing 570
 - 15.4 Selection of Bearing-Type 571
 - 15.5 Static Load Carrying Capacity 571
 - 15.6 Stribeck's Equation 572
 - 15.7 Dynamic Load Carrying Capacity 573
 - 15.8 Equivalent Bearing Load 574
 - 15.9 Load-Life Relationship 574
 - 15.10 Selection of Bearing Life 575
 - 15.11 Load Factor 576
 - 15.12 Selection of Bearing From Manufacturer's Catalogue 576
 - 15.13 Selection of Taper Roller Bearings 584
 - 15.14 Design for Cyclic Loads and Speeds 592
 - 15.15 Bearing With A Probability of Survival Other than 90 Per Cent 596
 - 15.16 Needle Bearings 599
 - 15.17 Bearing Failure-causes and Remedies 600
 - 15.18 Lubrication of Rolling Contact Bearings 600
 - 15.19 Mounting of Bearing 601
 - Short Answer Questions* 603
 - Problems for Practice* 604
- 16. Sliding Contact Bearings 606**
 - 16.1 Basic Modes of Lubrication 606
 - 16.2 Viscosity 609
 - 16.3 Measurement of Viscosity 610
 - 16.4 Viscosity Index 610
 - 16.5 Petroff's Equation 611
 - 16.6 Mckee's Investigation 612
 - 16.7 Viscous Flow through Rectangular Slot 614
 - 16.8 Hydrostatic Step Bearing 615
 - 16.9 Energy Losses in Hydrostatic Bearing 616
 - 16.10 Reynold's Equation 624
 - 16.11 Raimondi and Boyd Method 627
 - 16.12 Temperature Rise 630
 - 16.13 Bearing Design—Selection of Parameters 630
 - 16.14 Bearing Constructions 639
 - 16.15 Bearing Materials 640
 - 16.16 Sintered Metal Bearings 641
 - 16.17 Lubricating Oils 642
 - 16.18 Additives for Mineral Oils 643
 - 16.19 Selection of Lubricants 645
 - 16.20 Greases 646
 - 16.21 Bearing Failure—Causes and Remedies 646
 - 16.22 Comparison of Rolling and Sliding Contact Bearings 647
 - Short Answer Questions* 648
 - Problems for Practice* 650
- 17. Spur Gears 653**
 - 17.1 Mechanical Drives 653
 - 17.2 Gear Drives 654
 - 17.3 Classification of Gears 654
 - 17.4 Selection of Type of Gears 656

- 17.5 Law of Gearing 656
- 17.6 Terminology of Spur Gear 657
- 17.7 Standard Systems of Gear Tooth 660
- 17.8 Gear Trains 664
- 17.9 Interference and Undercutting 665
- 17.10 Backlash 666
- 17.11 Force Analysis 666
- 17.12 Gear Tooth Failures 673
- 17.13 Selection of Material 674
- 17.14 Gear Blank Design 675
- 17.15 Number of Teeth 679
- 17.16 Face Width 679
- 17.17 Beam Strength of Gear Tooth 680
- 17.18 Permissible Bending Stress 682
- 17.19 Effective Load on Gear Tooth 683
- 17.20 Estimation of Module Based on Beam Strength 686
- 17.21 Wear Strength of Gear Tooth 687
- 17.22 Estimation of Module Based on Wear Strength 689
- 17.23 Internal Gears 697
- 17.24 Gear Lubrication 698
Short Answer Questions 698
Problems for Practice 700
- 18. Helical Gears 703**
- 18.1 Helical Gears 703
- 18.2 Terminology of Helical Gears 703
- 18.3 Virtual Number of Teeth 704
- 18.4 Tooth Proportions 705
- 18.5 Force Analysis 706
- 18.6 Beam Strength of Helical Gears 710
- 18.7 Effective Load on Gear Tooth 711
- 18.8 Wear Strength of Helical Gears 712
- 18.9 Herringbone Gears 715
- 18.10 Crossed Helical Gears 716
Short Answer Questions 718
Problems for Practice 719
- 19. Bevel Gears 720**
- 19.1 Bevel Gears 720
- 19.2 Terminology of Bevel Gears 722
- 19.3 Force analysis 724
- 19.4 Beam Strength of Bevel Gears 729
- 19.5 Wear Strength of Bevel Gears 731
- 19.6 Effective Load on Gear Tooth 732
- 19.7 Spiral Bevel Gears 736
Short Answer Questions 737
Problems for Practice 738
- 20. Worm Gears 740**
- 20.1 Worm Gears 740
- 20.2 Terminology of Worm Gears 741
- 20.3 Proportions of Worm Gears 743
- 20.4 Force Analysis 745
- 20.5 Friction in Worm Gears 748
- 20.6 Selection of Materials 752
- 20.7 Strength Rating of Worm Gears 752
- 20.8 Wear Rating of Worm Gears 755
- 20.9 Thermal Considerations 757
Short Answer Questions 758
Problems for Practice 759
- 21. Flywheel 761**
- 21.1 Flywheel 761
- 21.2 Flywheel and Governor 762
- 21.3 Flywheel Materials 763
- 21.4 Torque Analysis 763
- 21.5 Coefficient of Fluctuation of Energy 765
- 21.6 Solid Disk Flywheel 766
- 21.7 Rimmed Flywheel 767
- 21.8 Stresses in Rimmed Flywheel 768
Short Answer Questions 778
Problems for Practice 778
- 22. Cylinders and Pressure Vessels 779**
- 22.1 Thin Cylinders 779
- 22.2 Thin Spherical Vessels 780
- 22.3 Thick Cylinders—Principal Stresses 781
- 22.4 Lame's Equation 782
- 22.5 Clavarino's and Birnie's Equations 783
- 22.6 Cylinders with External Pressure 785
- 22.7 Autofrettage 785
- 22.8 Compound Cylinder 786
- 22.9 Gaskets 790
- 22.10 Gasketed Joint 790
- 22.11 Unfired Pressure Vessels 793
- 22.12 Thickness of Cylindrical and Spherical Shells 795

22.13	End Closures	796	24.3	Measures of Central Tendency and Dispersion	827
22.14	Openings in Pressure Vessel	801	24.4	Probability	829
	<i>Short Answer Questions</i>	804	24.5	Probability Distribution	829
	<i>Problems for Practice</i>	805	24.6	Normal Curve	831
23.	Miscellaneous Machine Elements	807	24.7	Population Combinations	833
23.1	Oil Seals	807	24.8	Design and Natural Tolerances	835
23.2	Wire Ropes	808	24.9	Reliability	839
23.3	Stresses in Wire Ropes	811	24.10	Probabilistic Approach to Design	840
23.4	Rope Sheaves and Drums	815		<i>Short Answer Questions</i>	849
23.5	Buckling of Columns	816		<i>Problems for Practice</i>	850
	<i>Short Answer Questions</i>	822		References	853
	<i>Problems for Practice</i>	823		Index	857
24.	Statistical Considerations in Design	824			
24.1	Frequency Distribution	824			
24.2	Characteristics of Frequency Curves	826
