## **PART I QUALITATIVE THEORY OF SEMICONDUCTORS, P–N JUNCTIONS AND P–N JUNCTION TRANSISTORS**

<b>Chapter 1 Qualitative Semiconductor Theory</b>	<b>1</b>
1.1 Introduction	1
1.2 Search for a Solid State Amplifier	3
1.3 Current Carriers in Semiconductors	4
1.4 The Atomistic Picture of Silicon and Germanium	9
1.5 Electric Current, Free Electron Density and Mobility in a Semiconductor	21
1.6 Current Due to Holes in a Semiconductor	32
1.7 ‘Pure’ and ‘Impure’ Semiconductors	42
1.8 Effect of Doping on the Minority Carrier Density in Semiconductors	46
1.9 Degeneracy of Semiconductors Due to Excessive Doping	52
1.10 More About Temperature Dependence of Conductivity	55
1.11 Charge Neutrality and Space Charge in Semiconductors	59
1.12 Diffusion of Current Carriers	61
1.13 History of Development of a Semiconductor Amplifier	63
1.14 Possibility of Changing the Carrier Density and Conductivity of a Semiconductor by Introducing into the Bulk (or Extracting from the Bulk) Majority Carriers	69
1.15 Current Components in a Conductor and a Semiconductor	72
References	73
<b>Chapter 2 Qualitative Theory of P–N Junctions and P–N Junction Transistors</b>	<b>75</b>
2.1 P–N Junction	75
2.2 The Bipolar Junction Transistor	93
Reference	112

---

**PART II QUANTITATIVE THEORY OF SEMICONDUCTORS,  
P–N JUNCTIONS, TRANSISTORS (BJTs AND FETs)  
AND TECHNOLOGY**

---

<b>Chapter 3</b>	<b>Quantitative Semiconductor Theory</b>	<b>113</b>
3.1	Introduction	113
3.2	Calculation of Free Electron Density, $n$ , and Hole Density, $p$ , in a Semiconductor	116
3.3	Determination of Position of Fermi Level for a given Semiconductor	122
3.4	Carrier Densities Expressed in Terms of Departure of Fermi Level from Intrinsic Fermi Level	128
3.5	Fermi Level in N-Type and P-Type Samples as Measured from Intrinsic Fermi Level	128
3.6	Very Lightly Doped and Moderately Heavily Doped Samples	130
3.7	Very Heavily Doped Samples—Degenerate Semiconductor	130
3.8	Representation of Energy Band Diagram in Terms of Potential, Instead of Explicitly in Terms of Energy	131
3.9	Equation Governing Potential Distribution in a Semiconductor	134
3.10	Equations Governing Distribution of Hole Density and Electron Density in a Region of a Semiconductor Device	136
3.11	The Five Equations of Semiconductor Theory	141
3.12	Principles of Calculating Currents in Semiconductor Devices	142
3.13	An Example—To Determine the Steady State Excess Hole Density Due to Light in an N-Type Semiconductor	143
3.14	An Alternative Interpretation of Lifetime	144
3.15	Concept of Quasi Fermi Level	146
	References	148
<b>Chapter 4</b>	<b>The PN Junction Under Forward and Reverse Bias</b>	<b>154</b>
4.1	Introduction	154
4.2	P-N Junction in Thermal Equilibrium	159
4.3	P-N Junction Under Forward Bias	166
4.4	P-N Junction Under Reverse Bias—Calculation of Carrier Densities and Current	188
4.5	Combined $V$ – $I$ Characteristics Under Forward as well as Reverse Bias	195
4.6	P-N Junction Behaviour in Terms of Minority Carrier Stored Charge	195
4.7	Calculation of Electric Field and Voltage Drop in the Bulk, Under Forward Bias	199
4.8	Effect of Generation within the Transition Region on the Reverse Saturation Current	202
	Reference	204
<b>Chapter 5</b>	<b>Bipolar Junction Transistors: D.C. and Low Frequency Properties under Idealized Conditions</b>	<b>212</b>
5.1	Introduction	212
5.2	Uniform Base PNP Transistor with Forward Biased Emitter Junction and Reverse Biased Collector Junction	214
5.3	Some Aspects of Transistor $V$ – $I$ Characteristics	230
5.4	Temperature Effects in Transistors	251
5.5	Effects of Device Geometry on the Transistor Performance	255
5.6	Ebers – Moll Equations	257

5.7 The Ebers – Moll Model	262
References	262
<b>Chapter 6 Junction Transition Capacitance and Junction Breakdown Voltages</b>	<b>269</b>
6.1 Introduction	269
6.2 Linearly Graded Junction	273
6.3 Abrupt Junction	280
6.4 More about Junction Breakdown Voltage of Plane-Parallel Junctions—Critical Field Required for Breakdown	289
6.5 Effect of Junction Curvature on Breakdown	292
6.6 Zener Breakdown	292
6.7 Breakdown Voltages in Transistors	296
References	299
<b>Chapter 7 Photodiodes, Phototransistors and PNP Structures: Basic Principles</b>	<b>302</b>
7.1 Introduction	302
7.2 Carrier Generation by Light in a Uniform Piece of Semiconductor	303
7.3 P-N Junction Photodiode for Light Detection	307
7.4 Phototransistor	323
7.5 Power Generation by Photodiodes— Solar Cells	335
7.6 Miscellaneous Photodetector Structures	346
7.7 PNP Structures	350
References	372
<b>Chapter 8 A.C. Properties of Devices</b>	<b>378</b>
8.1 Introduction	378
8.2 Incremental Resistance and Incremental Capacitance of a Forward-Biased Junction	379
8.3 Principles of Analysis of A.C. Properties by Solving the A.C. Continuity Equations	392
Reference	429
<b>Chapter 9 High Frequency Analysis using Complex Lifetime and Complex Stored Charge</b>	<b>430</b>
9.1 Calculation of A.C. Properties of Devices	436
9.2 Common-Emitter and Common-Base Current Gains and Cut-Off Frequencies of the Intrinsic Transistor (PNP Type)	447
9.3 Diffusion Admittances of the Intrinsic Transistor	453
9.4 High Frequency Equivalent Circuits of the Transistor	456
9.5 Diffusion Admittance for a Wide-Base Diode with $\sigma_{P\text{-Region}} \gg \sigma_{N\text{-Region}}$	462
9.6 Tackling Base Geometries which are not Simple	464
9.7 Transient Response using Generalized Complex Lifetime	469
9.8 Summary	471
References	471
<b>Chapter 10 Metal Semiconductor Contacts: Metal Semiconductor and Junction Field Effect Transistors</b>	<b>475</b>
10.1 Metal–Semiconductor (MS) Contacts	476

- 10.2 Current–Voltage Characteristics of Schottky Barrier Junctions 496
- 10.3 Non-Idealities in the  $I - V$  Characteristics of Schottky Barrier Diodes 502
- 10.4 Applications of MS Contacts 508
- 10.5 Metal–Semiconductor Field Effect Transistor (MESFET) 508
- 10.6 Junction Field Effect Transistor (JFET) 524
- 10.7 Relevance of Schottky Barrier Diodes and GaAs MESFET to the Present Day High Speed Logic Circuits 525
- References 526

**Chapter 11 Metal Oxide Semiconductor Field Effect Transistor (MOSFET) 529**

- 11.1 MOSFET Structure, Types and Modes of Operation 529
- 11.2 Ideal MOS Structure and Different Modes of Operation 532
- 11.3 Effects of Non-Idealities on the MOS Characteristics 545
- 11.4 MOSFET Operation 556
- 11.5 A.C. Properties, Transconductance and Cut-Off Frequency of MOSFET 569
- 11.6 Short Channel Effects on MOSFET Performance Parameters 573
- 11.7 Distinction between MESFET/JFET and MOSFET, and their Relevance to VLSI Technology 573
- References 574

**Chapter 12 Basic Principles of Device Fabrication and Integrated Circuits 577**

- 12.1 Silicon Planar Technology 578
- 12.2 BJT Structures and their Process Technology 590
- 12.3 MOSFET Process for Integrated Circuits 599
- 12.4 MOS Integrated Circuits 603
- References 614

**Chapter 13 Miscellaneous Devices and Effects 615**

- 13.1 Drift Transistor 615
- 13.2 Unijunction Transistor (UJT) 625
- 13.3 Tunnel Diode 627
- 13.4 MIS Tunnel Diode 630
- 13.5 Schottky Barrier and MIS Solar Cell 634
- 13.6 Light Emitting Diode 636
- 13.7 Laser Diode 638
- 13.8 Effect of Depletion Layer Generation/Recombination on the Current–Voltage Characteristics of P-N Junctions 640
- 13.9 Bidirectional Thyristors 643
- References 648

---

**PART III SIMPLE CIRCUIT APPLICATIONS OF BJTs**

---

**Chapter 14 Low Frequency Small Signal Analysis of Transistor Circuits 649**

- 14.1 P-N Junction Static Model 649
- 14.2 Small Signal Low Frequency Analysis of P-N Junctions 652
- 14.3 BJT Amplifier in Common-Base Configuration 654
- 14.4 BJT Amplifier in Common-Emitter Configuration 658
- 14.5 Biasing Circuit for CE Amplifier 666

14.6	Emitter Follower Circuit and the Common-Collector Amplifier	670
14.7	Choice of Operating Point and the Maximum A.C. Voltage Output without Clipping	672
14.8	<i>Summary</i>	676
<b>Appendix A: Quantum States, Energy Bands and Distribution of Quantum States in Energy</b>		<b>679</b>
A.1	Introduction	679
A.2	Simple Case of a Hydrogen Atom	681
A.3	Quantum Numbers to Represent Quantum States in a Solid	685
A.4	Distribution of Quantum States in Energy for the Fictitious Crystal	694
A.5	Quantum States and Electron Behaviour in an Actual Crystal	697
A.6	How Energy Bands Arise in a Solid	699
	<i>References</i>	704
<b>Appendix B: Surface Recombination</b>		<b>705</b>
B.1	Introduction	705
B.2	Surface Recombination	707
	<i>References</i>	708
<b>Appendix C: Multiple-Charge States, Deep Levels and Surface States</b>		<b>709</b>
C.1	Deep Levels	709
C.2	Impurities in Multiple Charge States	710
C.3	Surface States	712
	<i>References</i>	712
<b>Appendix D: Short Channel Effects on MOSFET Performance Parameters</b>		<b>713</b>
D.1	Threshold Voltage Lowering Effect	713
D.2	Channel Length Modulation	714
D.3	Velocity Saturation	714
D.4	Breakdown Voltage	715
D.5	Scaled Down MOSFET to Overcome Short Channel Effect	716
	<i>Index</i>	717
