Preface vii

## Chapter 1 Introduction to Electronic Communication 1

---

- |   |   |
|---|---|
| 1-1 The Significance of Human Communication 3 | 1-5 The Electromagnetic Spectrum 12                   |
| 1-2 Communication Systems 3                   | 1-6 Bandwidth 18                                      |
| 1-3 Types of Electronic Communication 6       | 1-7 A Survey of Communication Applications 22         |
| 1-4 Modulation and Multiplexing 8             | 1-8 Jobs and Careers in the Communication Industry 24 |

## Chapter 2 The Fundamentals of Electronics: A Review 30

---

- |  |                       |
|--|-----------------------|
| 2-1 Gain, Attenuation, and Decibels 31 | 2-3 Filters 56        |
| 2-2 Tuned Circuits 41                  | 2-4 Fourier Theory 78 |

## Chapter 3 Amplitude Modulation Fundamentals 93

---

- |  |   |
|--|---|
| 3-1 AM Concepts 94                                   | 3-4 AM Power 105                          |
| 3-2 Modulation Index and Percentage of Modulation 96 | 3-5 Single-Sideband Modulation 109        |
| 3-3 Sidebands and the Frequency Domain 99            | 3-6 Classification of Radio Emissions 114 |

## Chapter 4 Amplitude Modulator and Demodulator Circuits 118

---

- |  |                             |
|--|-----------------------------|
| 4-1 Basic Principles of Amplitude Modulation 119 | 4-4 Balanced Modulators 136 |
| 4-2 Amplitude Modulators 122                     | 4-5 SSB Circuits 143        |
| 4-3 Amplitude Demodulators 131                   |                             |

## **Chapter 5** Fundamentals of Frequency Modulation 152

---

- |   |   |
|---|---|
| <b>5-1</b> Basic Principles of Frequency Modulation 153 | <b>5-4</b> Noise-Suppression Effects of FM 165                  |
| <b>5-2</b> Principles of Phase Modulation 155           | <b>5-5</b> Frequency Modulation versus Amplitude Modulation 169 |
| <b>5-3</b> Modulation Index and Sidebands 158           |   |

## **Chapter 6** FM Circuits 174

---

- |                                       |
|---------------------------------------|
| <b>6-1</b> Frequency Modulators 175   |
| <b>6-2</b> Phase Modulators 183       |
| <b>6-3</b> Frequency Demodulators 189 |

## **Chapter 7** Digital Communication Techniques 199

---

- |   |  |
|---|--|
| <b>7-1</b> Digital Transmission of Data 200     | <b>7-4</b> Pulse Modulation 229          |
| <b>7-2</b> Parallel and Serial Transmission 203 | <b>7-5</b> Digital Signal Processing 235 |
| <b>7-3</b> Data Conversion 205                  |  |

## **Chapter 8** Radio Transmitters 243

---

- |   |   |
|---|---|
| <b>8-1</b> Transmitter Fundamentals 244 | <b>8-4</b> Impedance-Matching Networks 280  |
| <b>8-2</b> Carrier Generators 248       | <b>8-5</b> Typical Transmitter Circuits 290 |
| <b>8-3</b> Power Amplifiers 265         |   |

## **Chapter 9** Communication Receivers 297

---

- |  |   |
|--|---|
| <b>9-1</b> Basic Principles of Signal Reproduction 298 | <b>9-5</b> Noise 321                      |
| <b>9-2</b> Superheterodyne Receivers 303               | <b>9-6</b> Typical Receiver Circuits 332  |
| <b>9-3</b> Frequency Conversion 305                    | <b>9-7</b> Receivers and Transceivers 346 |
| <b>9-4</b> Intermediate Frequency and Images 314       |   |

## **Chapter 10** Multiplexing and Demultiplexing 357

---

- |   |                                       |
|---|---------------------------------------|
| <b>10-1</b> Multiplexing Principles 358         | <b>10-4</b> Pulse-Code Modulation 376 |
| <b>10-2</b> Frequency-Division Multiplexing 359 | <b>10-5</b> Duplexing 382             |
| <b>10-3</b> Time-Division Multiplexing 368      |                                       |

## **Chapter 11** The Transmission of Binary Data in Communication Systems 385

---

- |  |  |
|--|--|
| <b>11-1</b> Digital Codes 386                      | <b>11-5</b> Wideband Modulation 414            |
| <b>11-2</b> Principles of Digital Transmission 389 | <b>11-6</b> Broadband Modem Techniques 423     |
| <b>11-3</b> Transmission Efficiency 394            | <b>11-7</b> Error Detection and Correction 430 |
| <b>11-4</b> Modem Concepts and Methods 400         | <b>11-8</b> Protocols 438                      |

## **Chapter 12** Introduction to Networking and Local-Area Networks 447

---

- |                                      |                                |
|--------------------------------------|--------------------------------|
| <b>12-1</b> Network Fundamentals 448 | <b>12-3</b> Ethernet LANs 463  |
| <b>12-2</b> LAN Hardware 455         | <b>12-4</b> Token-Ring LAN 474 |

## **Chapter 13** Transmission Lines 480

---

- |  |  |
|--|--|
| <b>13-1</b> Transmission Line Basics 481 | <b>13-3</b> Transmission Lines as Circuit Elements 503 |
| <b>13-2</b> Standing Waves 494           | <b>13-4</b> The Smith Chart 508                        |

## **Chapter 14** Antennas and Wave Propagation 522

---

- |                                      |  |
|--------------------------------------|--|
| <b>14-1</b> Antenna Fundamentals 523 | <b>14-3</b> Radio Wave Propagation 557 |
| <b>14-2</b> Common Antenna Types 531 |  |

## **Chapter 15** Internet Technologies 574

---

- |   |                                       |
|---|---------------------------------------|
| <b>15-1</b> Internet Applications 575         | <b>15-3</b> Storage-Area Networks 593 |
| <b>15-2</b> Internet Transmission Systems 578 | <b>15-4</b> Internet Security 596     |

## **Chapter 16** Microwave Communication 604

---

- |  |  |
|--|--|
| <b>16-1</b> Microwave Concepts 605               | <b>16-5</b> Microwave Tubes 636        |
| <b>16-2</b> Microwave Lines and Devices 611      | <b>16-6</b> Microwave Antennas 641     |
| <b>16-3</b> Waveguides and Cavity Resonators 620 | <b>16-7</b> Microwave Applications 658 |
| <b>16-4</b> Microwave Semiconductor Diodes 632   |  |

## Chapter 17 Satellite Communication 670

---

- |      |                                 |     |      |                           |     |
|------|---------------------------------|-----|------|---------------------------|-----|
| 17-1 | Satellite Orbits                | 671 | 17-4 | Ground Stations           | 688 |
| 17-2 | Satellite Communication Systems | 678 | 17-5 | Satellite Applications    | 695 |
| 17-3 | Satellite Subsystems            | 682 | 17-6 | Global Positioning System | 699 |

## Chapter 18 Telecommunication Systems 709

---

- |      |                  |     |      |                    |     |
|------|------------------|-----|------|--------------------|-----|
| 18-1 | Telephones       | 710 | 18-4 | Paging Systems     | 738 |
| 18-2 | Telephone System | 725 | 18-5 | Internet Telephony | 743 |
| 18-3 | Facsimile        | 732 |      |                    |     |

## Chapter 19 Optical Communication 749

---

- |      |                                    |     |      |                                  |     |
|------|------------------------------------|-----|------|----------------------------------|-----|
| 19-1 | Optical Principles                 | 750 | 19-5 | Wavelength-Division Multiplexing | 783 |
| 19-2 | Optical Communication Systems      | 754 | 19-6 | Passive Optical Networks         | 785 |
| 19-3 | Fiber-Optic Cables                 | 759 |      |                                  |     |
| 19-4 | Optical Transmitters and Receivers | 769 |      |                                  |     |

## Chapter 20 Cell Phone Technologies 792

---

- |      |                                     |     |
|------|-------------------------------------|-----|
| 20-1 | Cellular Telephone Systems          | 793 |
| 20-2 | Advanced Mobile Phone System (AMPS) | 798 |
| 20-3 | Digital Cell Phone System           | 803 |

## Chapter 21 Wireless Technologies 823

---

- |      |   |     |      |  |     |
|------|---|-----|------|--|-----|
| 21-1 | Wireless LAN                                  | 825 | 21-5 | Infrared Wireless  | 835 |
| 21-2 | PANs and Bluetooth                            | 829 | 21-6 | Radio-Frequency Identification and Near-Field Communications | 840 |
| 21-3 | ZigBee and Mesh Wireless Networks             | 831 | 21-7 | Ultrawideband Wireless                                       | 845 |
| 21-4 | WiMAX and Wireless Metropolitan-Area Networks | 833 |      |  |     |

Answers to Selected Problems 852
