

Appendix F

Student's *t* Distribution

Example: With $df = 9$ and .10 area in the upper tail, $t = 1.383$

Confidence Intervals						
	80%	90%	95%	98%	99%	99.9%
Level of Significance for One-Tailed Test						
<i>df</i>	0.100	0.050	0.025	0.010	0.005	0.0005
Level of Significance for Two-Tailed Test						
	0.20	0.10	0.05	0.02	0.01	0.001
1	3.078	6.314	12.706	31.821	63.657	636.619
2	1.886	2.920	4.303	6.965	9.925	31.599
3	1.638	2.353	3.182	4.541	5.841	12.924
4	1.533	2.132	2.776	3.747	4.604	8.610
5	1.476	2.015	2.571	3.365	4.032	6.869
6	1.440	1.943	2.447	3.143	3.707	5.959
7	1.415	1.895	2.365	2.998	3.499	5.408
8	1.397	1.860	2.306	2.896	3.355	5.041
9	1.383	1.833	2.262	2.821	3.250	4.781
