## Circles

1. Early mathematicians thought that $\pi$ could be written as a fraction $(\pi=3.141592654)$.

We now know that this is not possible.
For example, $\frac{22}{7}=3.142857 \ldots$ is close to $\pi$ but not equal to it.
Use your calculator to find other fractions that are close to $\pi$.
 The more decimal places that match 3.141592654 , the better!
2. Keep track of your activites and how much time you spend doing each one for a week. Organize your activities into 7 to 10 categories, such as eating, sleeping, hanging out with friends, playing sports, etc.
Make a table and circle graph to show your activities.

| Activity | Time Spent (minutes) | Percent of Total | Percent Expressed as a Decimal | Central <br> Angle |
| :---: | :---: | :---: | :---: | :---: |
|  |  | $=\begin{aligned} & \square \\ & =\text { Total } \times 100 \\ & =\square \end{aligned}$ |  | $360^{\circ} \times$ $=$ |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |
| Total |  |  |  |  |

3. At the bottom of the Circles project ideas page on the MathLinks 7 Adapted Web site, there is a link to the Toronto Blue Jays Web site. Click on it.
Find information about Hitting Stats.
Choose a player with interesting statistics.
Of all the times at bat ( AB ), find out how many times the player had a

- two-base hit (2B)
- three-base hit (3B)
- home run (HR)
- strikeout (SO)

Show your results in a table and a circle graph.
For explanations of the terms, click on Stats Abbreviations on the lower left side of the page on the Blue Jays' Web site.

|  | Number | Percent of Total | Percent Expressed as a Decimal | Central Angle |
| :---: | :---: | :---: | :---: | :---: |
| 2B |  | $=\begin{aligned} & \div \mathrm{AB} \times 100 \\ & =\square \end{aligned} \div 100$ |  | $\begin{aligned} & 360^{\circ} \times \\ & = \end{aligned}$ |
| 3B |  |  |  |  |
| HR |  |  |  |  |
| SO |  |  |  |  |
| Total |  |  |  |  |
