

Development Team

A Message from the Author Team

MathLinks is a totally new resource that meets the outcomes of the 2006 WNCPC Common Curriculum Framework for 7-9 Mathematics.

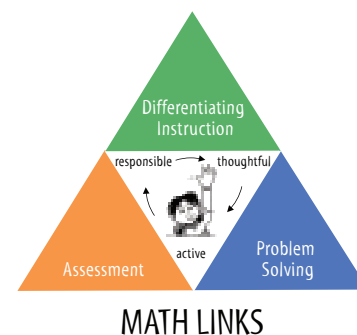

We used **current educational research and practical classroom experience** to help us design a resource to **meet the needs of Western Canadian students and teachers**. Success for students was paramount in the development process. We continually asked ourselves two key questions:

- ✧ *Will this help students in learning mathematics?*
- ✧ *Will this support teachers in implementing the new curriculum?*

Our instructional model includes a **variety of instructional and assessment techniques** that accommodates the diverse needs of both students and teachers.

We would like to take this opportunity to thank the over 300 educators and 900 students who provided valuable feedback and insight during the development of this mathematics program.

We hope that you will enjoy using this product as much as we enjoyed developing it!

— *The Author Team*

... Linking to Grade 7-9 Learners

An exceptional team of classroom teachers and consultants committed to helping all learners develop a strong foundation in mathematics
