Chapter 2 Laboratory Exercise

Prelab Assignment

Your instructor should provide a handout describing the system you are expected to use to complete this exercise.

1. What is the name of the Java compiler that you will be using?

2. What is the name of the Java interpreter that you will be using?

3. Write a Java program that displays your name in an OutputBox.

4. Write a Java program that draws a blue rectangle in a DrawingBox.

Chapter 2 Laboratory Exercise

1. Write and test a Java application program that displays a note from your mother to your instructor explaining why your homework was late.

2. Write and test a Java application program that draws a picture of a house (made up of a rectangles and triangles) and the sun (drawn as a yellow circle).

3. Write and test a Java application program that draws your initials in a DrawingBox.

Chapter 2 Laboratory Exercise

Postlab Questions

1. What was the most difficult part of this lab?

2. Was there any information on writing these programs that was not found in the textbook?

3. Were you able to get printed hardcopy of your program output? Is so, how?

4. Did you make back-up copies of your programs?
