

Allen, John L. 1997. *Student Atlas of Environmental Issues*. Guilford, CT: Dushkin Publishers. A comprehensive overview of environmental issues.

Ayres, Ed. 2003. "Mapping the Nature of Diversity." *World-Watch* 16 (2): 30-35. A landmark project reveals a correspondence between indigenous land use and the survival of natural areas.

Bales, Kevin. 2002. "The Social Psychology of Modern Slavery." *Scientific American* 286(4): 80-88. Contrary to conventional beliefs, slavery in various guises survives around the world.

Barkham, J.P. 1995. "Environmental needs and social justice." *Biodiversity and Conservation* 4 (8): 857-868. Material consumption in the North causes environmental degradation in poor countries of the South.

Berkes, Fikret, Johan Colding and Carl Folke (eds). 2002. *Navigating Social-Ecological Systems: Building Resilience for Complexity and Change*. Cambridge University Press. Describes how resilient human and ecological systems provide capacity for renewal and innovation in the face of rapid transformation and crisis.

Berkes, Fikret and Carl Folke (eds). 2000. *Linking Social and Ecological Systems : Management Practices and Social Mechanisms for Building Resilience*. Cambridge University Press. An interdisciplinary approach to the problems of environmental management and sustainable development.

Berry, Wendell. 2000. "The Case for a Local Economy." *Worldwatch* 13 (5): 29-33. Argues that the basis of a sustainable economy is the vitality of local economies.

Blair, Tony. 2003. "Meeting the Sustainable Development Challenge." *Environment* 45 (4): 20-28. The British Prime Minister argues that we haven't been bold enough in addressing poverty and environmental degradation and pledges a 60% reduction in greenhouse gases at a reasonable cost.

Blaustein, Andrew R. and Pieter T. Johnson. 2003. "Explaining Frog Deformities" *Scientific American* 288(2): 60-65. Discusses three prime suspects in frog abnormalities.

Botkin, Daniel B. 2000. *No Man's Garden: Thoreau and a New Vision for Civilization and Nature*. Covelo, CA: Island Press. A new interpretation of Thoreau and his writings.

Bright, Chris. 1999. "The Nemesis Effect." *Worldwatch*. May/June 1999. Warns of rapid, unexpected decline in the world's ecosystems as a result of overlapping stresses.

Brower, David (with Steve Chaplle). 1995. *Let the Mountains Talk, Let the Rivers Run: A Call To Those Who Would Save the Earth*. San Francisco: Harper Collins.

- Brower, David. 1990. *For Earth's sake: The Life and Times of David Brower*. Peregrine Smith Books. A fascinating biography by one of the world's premier conservationists.
- Brower, David. 1991. *Work in Progress*. Salt Lake City: Peregrine Books. A follow-up to *For Earth's Sake* in the story of a fascinating career in conservation.
- Brown, Lester. 2003. *Plan B: Rescuing a Planet under Stress and a Civilization in Trouble*. W.W. Norton. Plan A, "business as usual," isn't working. What could we do differently?
- Brown, L., et al. 2002. *Vital Signs 2002: the trends That Are Shaping Our Future*. Washington, DC: Worldwatch Institute. A brief synopsis of each of the major environmental issues we face.
- Brown, Rosemary J. 1997. "The Shirts Off Their Backs," *Co-op America Quarterly* 42(Summer 1997): 14-17. A shocking expose about sweatshops and child labor in developing countries.
- Brulle, Robert J. 2000. *Agency, democracy, and Nature: The U.S. Environmental Movement from a Critical Theory Perspective*. Cambridge, MA: MIT Press. An analysis of the theory and effectiveness of U. S. environmental groups.
- Brush, Stephen B. and Doren Stabinsky. 1995. *Valuing Local Knowledge: Indigenous People and Intellectual Property Rights*. Island Press. Recognizing local systems of knowledge can promote cultural survival and environmental protection.
- Bryant, Bunyan (ed). 1995. *Environmental Justice: Issues, Policies, and Solutions*. Island Press. Essays on social justice and environmental protection.
- Butler, C. D. 1997.. "The consumption bomb." *Medical Conflict and Survival* Argues that rising consumption rates are now a greater threat to human society and the environment than population growth.
- Carley, Michael and Philippe Spapens. 1998. *Sharing the World: Sustainable Living and Global Equity in the 21st Century*. London: Earthscan. Addresses links between over-consumption and declining quality of life in industrialized countries with poverty and inequality in developing countries.
- Carpenter SR. 2002. Ecological futures: building an ecology of the long now. *Ecology* 83: 2069-83.
- Carson, Rachael. 1962. *Silent Spring*. Riverside Press. Regarded by many as the wellspring of modern environmentalism.

Chapman, Audrey R., et al. (eds). 1999. *Consumption, Population, and Sustainability: Perspectives from Science and Religion*. More than 250 scientists and religious people discuss the environmental impact of consumption patterns and population trends.

Clay, Rebecca A. 2001. "Green is good for you." *Monitor on Psychology* 32 (4): published on line at <http://www.apa.org/monitor/apr01/greengood.html>. Psychologists' research explains the mental and physical restoration we get from nature--and has important implications for how we build our homes, work environments and cities.

Colchester, M. 2000. "Self-determination or environmental determinism for indigenous peoples in tropical forest conservation." *Conservation Biology* 14(5): 1365-1367. Local knowledge and cooperation are important in conservation.

Cronon, William. 1984. *Changes in the Land Indians Colonists and the Ecology of New England*. Hill and Wang. A ground-breaking environmental history that shows how New England landscapes were altered by native Americans.

d'Aluisio, Faith and Peter Menzel. 1997. *Women in the Material World*. San Francisco: Sierra Club Press. Hopes, dreams, disappointments and life experiences of women from 20 countries.

da Fonseca, Gustavo A.B. 2003. Conservation Science and NGOs. *Conservation Biology* 17(2): 345-347. NGOs have an important role to play in conserving nature.

Daily, G.C., Anne H. Ehrlich, and Paul R. Ehrlich. 1995. "Socioeconomic equity—a critical element in sustainability." *Ambio* 24 (1): 58-59. Recognizes the importance of social justice in sustainability.

Diamond, Jared. 1999. *Guns, Germs, and Steel: The Fates of Human Societies*. W.W. Norton & Co. A brilliant exposition on the role of biogeography and technology on the history of civilization.

Diamond, Jared. 2003. "The Last Americans: Environmental collapse and the end of civilization." *Harper's* 306 (1837): 43-51. Explores evidence that environmental problems have led to the demise of great civilizations.

Doppelt, Bob. 2003. *Leading Change Toward Sustainability*. Greenleaf Publishing. Describes corporations and agencies around the world that are trying to make themselves sustainable.

Dubos, René. 1968. *So Human an Animal*. Scribner. An inspiring proclamation of environmental humanism.

Earth Island Journal. 2001. "A Tribute to David Brower" *Earth Island Journal* 16(1) Special Center Section celebrating the life of the father of the modern environmental movement.

Easterbrook, Greg. 1995. *A Moment in the Sun: The coming age of environmental optimism*. New York: Viking Press. An determinedly optimistic appraisal of current environmental conditions.

Economist, The. 2002. "How Many Planets: A Survey of the Global Environment," *The Economist* (July 6, 2002) (find at www.economist.com)

Eisenstadter, Ingrid. 2002. "Abbey's Picnic." *Sierra* 87 (5): 48—50, 76. A memoir of a famous wilderness author by his muse.

Esterbrook, Greg. 1995. *A Moment on the Earth: The Coming Age of Optimism*. Penguin Books. A highly optimistic view of our future.

Farber, Paul Lawrence. 2000. *Finding Order in Nature: The Naturalist Tradition from Linnaeus to E. O. Wilson*. Baltimore: Johns Hopkins UP. A historical review of natural history.

Folke, Carl, et. al, 2002. *Resilience and Sustainable Development: Building Adaptive Capacity in a World of Transformations* (International Council for Science, 2002) (available online at www.icgu.org/library/WSSD-REP/vol3.pdf)

Fox, Stephen. 1986. *The American Conservation Movement John Muir and His Legacy*. Univ. of Wisconsin Press. A masterful history spanning from John Muir to David Brower.

Fox, Stephen. 2002. "Molded by Mountains." *Sierra* 87(1): 28-31. First article in a special issue celebrating the 100th birthday of photographer Ansel Adams.

Gardner, Gary., et al. 2003. *State of the World 2003*. Washington, DC: Worldwatch Institute. A good overview of the current state of our global environment.

Gewin, V. 2002 "Ecosystem health: The state of the planet." *Nature*, 417, 112 – 113. An ambitious attempt to assess the impact of factors such as shifts in land use and loss of biodiversity on the Earth's ecosystems.

Gibbs, David. 2002. *Local Economic Development and Environmental Sustainability*. Routledge. Describes how we might integrate economic and environmental policies at the local and regional scale.

Gibbs, W. W. 2002. "Saving Dying Languages." *Scientific American* 287 (2): 78—86. Thousands of languages face extinction, and with them indigenous knowledge is disappearing.

Gorbachev, Mikhail. 2001. "Nature Will Not Wait." *World Watch* 14(2):4-5. The former president of the Soviet Union argues that we need a new system of values that recognizes

the organic unity between humans and nature and promotes an ethic of global responsibility.

Goudie, Andrew. 2000. *The Human Impact on the Natural Environment*. Oxford, UK: Oxford University Press. A comprehensive textbook of human impacts on the environment.

Grinberg, Kate. 2002. "Sustainability indicators built on principles of natural capitalism." *Business and the Environment* Oct 2002 v13 i10 p10(1). A new corporate audit system uses the principles of natural capitalism to measure a company's success.

Grove, Richard H. 1995. *Green Imperialism: Colonial Expansion, Tropical Edens, and the Origins of Environmentalism*. Cambridge University Press. Colonialism brought social and environmental destruction.

Gua, Ramachandra. 2000. "The Paradox of Global Environmentalism." *Current History* November 2000. Argues that misguided attempts to defend nature by richer, northern countries often results in environmental degradation in the South.

Gutman, Pablo. 2003. "What did 2002 World Summit on Sustainable Development Accomplish? A Non-Governmental Agency Perspective." *Environment* 45 (2): 20-29. Although few official agreements were reached, NGOs had a chance to network and present their views.

Halweil, Brian, et al. 2004. *State of the World*. W.W. Norton/Worldwatch Institute. A good summary of current environmental issues.

Harmer, Tom. 2003. *What I've Always Known: Living in Full Awareness of the Earth*. Harmony Books. A Native American perspective on nature.

Hayes, Denis. 2000. *The Official Earth Day Guide to Planet Repair*. Washington, DC: Island Press. A call to arms from the chair of the Earth Day Network.

International Federation of Red Cross and Red Crescent Societies. 1996. *World Disasters Report, 1996*. New York: Oxford University Press. Annual review of natural disasters.

International Council for Science, 2002. *Report of the Scientific and Technological Community to the World Summit on Sustainable Development* (available at www.sustainabilityscience.org/keydocs/). A report on the science of sustainability prepared for the World Summit on Sustainable Development.

Isenberg, Andrew C. 2001. *The Destruction of the Bison : An Environmental History, 1750-1920*. Cambridge University Press. Examines the ecosocial factors that led to the destruction of 30 million American bison in the late 19th century.

Jaiteh M, et al. 2002. "The Human Footprint and the Last of the Wild" In Sappington, N (ed). *ESRI Map Book: Geography and GIS --Sustaining our World*. Volume 17. ESRI: USA.

Kane, Hal. June, 1995. "The Hour of Departure: Forces that Create Refugees and Migrants," *Worldwatch Paper 125*. Worldwatch Institute. Important analysis of the causes and effects of environmental refugees.

Kates, Robert W., et. al., 2001. "Sustainability Science," *Science* 27 April 2001, pp 741-642 Explains the scientific basis for sustainability.

Kiesecker, Joseph M, et al. 2001. "Complex causes of amphibian population declines." *Nature* 410 (6829) 681 – 684. Climate change, UV exposure, parasites, and diseases may all be interconnected in amphibian declines around the world.

King, Michael D. and David D. Herring. 2000. "Monitoring Earth's Vital Signs." *Scientific American*. 282 (4): 92-97. Satellites in the Earth Observing System diagnose the planet's health from the sky.

Lear, Linda. 1997. *Rachel Carson: Witness for Nature*. New York: Henry Holt. A new biography of this conservation pioneer.

Lomborg, Bjorn. 2001. *The Skeptical Environmentalist*. Cambridge, UK: Cambridge Univ. Press. A Danish statistician and political scientist paints a rosy picture of our environmental condition. (see rebuttal by Stephen Schneider, et al in *Scientific American* 286(1): 61-71.

Lowenthal, David. 2000. *George Perkins Marsh : Prophet of Conservation*. Univ. of Washington Press. A new biography of America's pioneer conservationist.

Lubchenco, Jane. 1997. "Entering the Century of the Environment: A New Social Contract for Science," *Science* (1997) (available at www.sciencemag.org/cgi/content/full/279/5350/491).

Luoma, John, 1997. "Vanishing frogs," *Audubon* 99 (3): 60-69. Amphibians are declining all over the world, from California to India.

Mabogunje, Akin L. 2002. "Poverty and Environmental Degradation: Challenges Within the Global Economy." *Environment* January/February 2002, pp 8-18. Implementing the Rio Agenda 21 will require work and cooperation from all nations.

Margolis, R. M. & Kammen, D. M. 1999. "Underinvestment: The Energy Technology and R&D Policy Challenge." *Science*, 285, 690 - 692 (1999). We need funding to study sustainability.

Marsh, George Perkins. 1864. *Man and Nature: or Physical Geography as Modified by Human Action*. Charles Scribner. The wellspring of the American conservation movement. Reprinted in 1965 by Harvard University Press.

Maser, Chris. 1995. *Resolving Environmental Conflict: Towards Sustainable Community Development*. Delray Beach, FL: St. Lucie Press. A guidebook to conflict resolution and facilitated community decision-making.

Mastny, Lisa. 2000. "Coming to Terms with the Arctic." *Worldwatch* 13 (11): 24-36. Describes how the modern world intrudes on traditional arctic cultures.

Matton, Ashley. 2000. "Why the Amphibians?" *World Watch* 13(4):12-23. Why are amphibians disappearing around the world?

McCoy, D., et al. 2003. "Global Equity Gauge Alliance: Reflections on Early Experiences." *Journal of Health, Population and Nutrition* 21 (3): 273-287. Traces the evolution and working of the Global Equity Gauge Alliance and its efforts to promote health equity around the world.

McNeill, J. R. 2000. "Ideas Matter: A Political History of the Twentieth-Century Environment." *Current History* November 2000. A good survey of recent environmental history.

McPhee, John. 1971. *Encounters with the Archdruid*. Farrar Straus Giroux. David Brower, founder of the modern Sierra Club debates three of his archenemies on wilderness trips

Meine, Curt, Ed. 1997. *Wallace Stegner and the Continental Vision: Essays on Literature, History, and Landscape*. Covelo, CA: Island Press. An interesting example of ecocriticism, a new field of literary analysis from an environmental perspective.

Merchant, Carolyn. 1994. *Ecology (Key Concepts in Critical Theory)* Prometheus Books. Brings deep ecology, ecofeminism, social justice, critical theory, social ecology, spirituality, and postmodern science to bear on environmental issues.

Merwin, W.S. 2004. *The Ends of the Earth*. Shoemaker & Hoard. Essays on places and species that are threatened by human activities.

Meyers, Norman. 1984. *Gaia: An Atlas of Planet Management*. Anchor Doubleday. Innovative graphics and sobering statistics about the state of the planet.

Milbrath, Lester W., Tom Toles (Illustrator), and David T. Suzuki. 1996. *Learning to Think Environmentally: While There is Still Time*. Wicked cartoons and earnest warnings from some original thinkers.

Miller, Char. 2001. *Gifford Pinchot and the Making of Modern Environmentalism*. Island Press. A new biography of a founding father of conservation.

Miller, Gordon L.(ed). 2000. *Nature's Fading Chorus: Classic and Contemporary Writings on Amphibians*. Covelo, CA: Island Press. An anthology of articles on amphibians throughout history.

Mitchell, John G. 1990. "A perfect day for earth." *Audubon* 92 (2): 108-123. What really happened on April 22, 1970? What did it mean?

Moore, J. L. et al. 2001. "The distribution of cultural and biological diversity in Africa." *Proceedings of the Royal Society B*, published online doi: 10.1098/rspb.2002.2075 (2001). Cultural and biological diversity are highest in the same places.

Motavalli, J. 1999. "Tough Choices for Planet Earth," *E Magazine* vol X(1):28-35. The world stands at the crossroads at the start of a new millennium. What will our direction be?

Myers, Norman, 1995. "Environmental Unknowns," *Science* (July 21, 1995) p. 358-360. How do we plan for unknown unknowns?

Nash, Hugh (ed). 1976. *Progress As If Survival Mattered: A Handbook for a Conserver Society*. Friends of the Earth. A good anthology of arguments for sustainable development.

National Wildlife Federation. 2000. "How Conservation Grew from a Whisper to a Roar." *National Wildlife* 38 (1): 22-44. A special report on the history of conservation.

National Wildlife Federation. 2002. *Conservation Directory 2003: The Guide to Worldwide Environmental Organizations*. Island Press. A comprehensive listing of 4,000 government agencies, nongovernmental organizations, and colleges and universities, as well as more than 18,000 officials concerned with environmental conservation, education, and natural resource use and management.

Niller, Eric. 2001."The Trouble with Turtles." *Scientific American* 285(2): 80-85, Despite efforts to protect beach nesting sites and reduce fishing by-catch mortality, green turtle populations continue to decline.

Olafsson, Gudmundur Pall. 2003. *Iceland the Enchanted*. A magnificent collection of photographs, maps and essays on Icelandic nature including discussion of the Karahnjukar hydroelectric project.

Orr, David. 2003. "Walking North on a Southbound Train." *Conservation Biology* 17 (2): 348-351. An interesting reflection on environmental politics.

Paehlke, Robert, ed. 1997. *Conservation and Environmentalism: An Encyclopedia* New York: Garland Publishing. A comprehensive encyclopedia on conservation and environmentalism by a leading scholar on environmental policy.

Pimm, S. L..2001. *The World According to Pimm: A Scientist Audits the Earth*, McGraw-Hill, New York. Calculates that humans now consume 40% of all terrestrial biomass,

between a quarter and a third of marine resources and about 50% of the planet's accessible fresh water

Pimentel, David, Laura Westra, and Reed F. Noss. 2000. *Ecological Integrity: Integrating Environment, Conservation, and Health*. Island Press. Results of a project that brought together thinkers from around the world to examine the problems of ecological degradation, human health, and sustainability.

Pointing, Clive. 1991. *A Green History of the World: The Environment and the Collapse of Great Civilizations*. Penguin Books. Argues that environmental abuse has led to collapse of nations.

Pounds, Alan J. 2001. "Climate and amphibian declines." *Nature* 410 (6829): 639-640. Various reasons have been proposed for the falling numbers of amphibians in many parts of the world. Changing climate is likely to be a key factor — but with complicated links to the immediate causes of these population declines.

Prescott-Allen, Robert. 2001. *The Wellbeing of Nations: A Country-by-country Index of Quality of Life and the Environment*. Covelo, CA: Island Press. Combines 39 indicators of health, population, wealth, etc into a Human Wellbeing Index and 39 similar indicators of biodiversity, water quality, etc into an Ecosystem Wellbeing Index.

Prugh, Thomas and Erik Assadourian. 2003. "What Is Sustainability, Anyway?" *World-Watch* 16 (5): 10-21. Suggests ways we could measure real progress in well-being.

Prugh, Thomas, Robert Costanza, and Herman Daly. 2000. *The Local Politics of Global Sustainability*. Covelo, CA: Island Press. Three leading ecological economists discuss sustainability.

Raskin P., et al. 1998. *Bending the curve: toward global sustainability*. Stockholm: Stockholm Environment Institute.

Raven, Peter H. 2002. "Science, Sustainability and the Human Prospect," *Science*; 297: 954-958 (9 August 2002). Presidential address on the state of the world.

Reid, David. 1995. *Sustainable Development: An Introductory Guide*. EarthScan. An introduction to sustainability.

Relyea, R. A. & Mills, N. 2001. "Predator-induced stress makes the pesticide carbaryl more deadly to gray treefrog tadpoles (*Hyla versicolor*)". *Proceeding of the National Academy of Sciences USA* 98, 2491–2496 (2001).

Renner, Michael. 1997. *Fighting for Survival: Environmental Decline, Social Conflict and the New Age of Insecurity*. Earthscan. Paying attention to social, economic, and environmental problems may contribute more to security than will military spending.

Robertson, David P. and R. Bruce Hull. 2001. Beyond Biology: toward a More Public Ecology for Conservation. *Conservation Biology* 15(4): 970-979.

Sachs, Aaron. 1997. "A Planet Unfree," *Sierra* 82(6):64-68. You can't save the world without liberating its people.

Sachs, Aaron. 1996. "Upholding human rights and environmental justice." *Worldwatch Paper #127*. Worldwatch Institute. Human rights and environmental protection.

Sachs, Jeffery, Andrew d. Mellinger and John L. Gallup. 2001. "The Geography of Poverty and Wealth." *Scientific American* 284(3): 70-73. Can geography and climate explain wealth and productivity?

Sale, Kikpatrick. 1993. *The Green Revolution: The American Environmental Movement, 1962-1992*. Hill & Wang. A brief but effective survey of American environmentalism.

Sanderson EW, Jaiteh M, Levy MA, Redford KH, Wannebo AV, and Woolmer G. 2002. "The Human Footprint and the Last of the Wild." *Bioscience* 52 (10):891-904. A human footprint map indicates that 83% of the land's surface is influenced by human activities.

Schneider, Stephen, John P. Holdren, Joh Bongaarts, and Thomas Loejoy. 2002. "Misleading Math about the Earth." *Scientific American* 286(1): 61-71. An angry rebuttal of Bjorn Lomborg's rosy picture of environmental conditions.

Schor, Juliet and Betsy Taylor, (eds). 2002. *Sustainable Planet: Solutions for the Twenty-first Century*. Beacon Press. A collection of 16 essays by leading scholars of sustainability.

Schumacher, E. F. 1973. *Small is Beautiful: Economics as if people mattered*. Blond & Briggs. An enormously influential book that weaves together philosophy from Gandhi to Galbraith and from Buddha to Adam Smith.

Sen. G. 1995. "Creating common ground between environmentalists and women—thinking locally, acting globally." *Ambio* 24 (1): 64-65. Social justice and environmental protection.

Shabecoff, Phillip. 1994. *A Fierce Green Fire: The American Environmental Movement*. Hill and Wang. Traces the conservation movement from G.P. Marsh to Aldo Leopold and David Brower.

Shiva, Vandana (ed). 1994. *Close to Home: Women Reconnect Ecology, Health and Development Worldwide*. New Society Publishers. An ecofeminist view of sustainability.

Shiva, Vandana. 1988. *Staying Alive: Women, Ecology, and Development*. Zed Books. An important work in ecofeminism based on the Chiko Andalan movement in India.

Shutkin, William A. 2000. *The Land that Could Be: Environmentalism and Democracy in the Twenty-First Century*. MIT Press. Shows how social justice and environmental protection go together.

Socolow, R. H., et al. (eds). 1994. *Industrial Ecology and Global Change*. Cambridge University Press. Describes how we can more fully industrialize our society without overwhelming the Earth's natural systems

Solnit, Rebecca. 2002. "In Photography Is the Preservation of the World." *Sierra* 87 (5): 28-35. An illustrated biography of renown nature photographer Eliot Porter.

Soulé, Michael E. and Gordon H. Orians (eds). 2001. *Conservation Biology: Research Priorities for the Next Decade*. Leaders of conservation biology discuss where the field now stands and what its priorities should be.

Speath, J. G. 2004. *Red Sky at Morning*. Yale Univ. Press. The Dean of the Yale University School of Forestry and Environmental Studies, sounds the alarm on the seriousness of the global environmental crisis.

Steffen, W., et al. 2004. *Global Change and the Earth System: A Planet Under Pressure*. Springer Verlag. A sobering picture of how we are changing our environment.

Steiner, Frederick. 2002. *Human Ecology: Following Nature's Lead*. Island Press. A noted landscape planner presents a historical and analytical examination of how humans interact with each other as well as with other organisms and their surroundings.

Stewart, D. et al. 2000. "How Conservation Grew From a Whisper to a Roar," *National Wildlife* 38(1): 22-44. An illustrated history of conservation in the United States.

Swan, Jon 2004. "The Icelandic Rift." *Orion* 23 (2): 60-69. A description of Iceland's Karahnjukar Dam and its political and environmental consequences.

Terborgh, John. 1999. *Requiem for Nature*. Island Press. A brutally honest look at the social, economic, and political barriers to tropical conservation

Thomas, William, Carl Sauer, Marston Bates, and Lewis Mumford. 1956. *Man's Role in Changing the Face of the Earth*. University of Chicago Press. The first large scale evaluation of our impacts on the planet.

Thomashow, Mitchell. 2001. *Bringing the Biosphere Home: Learning to Perceive Global Environmental Change*. MIT Press. Shows how to make global environmental problems more tangible, so they become an integral part of everyday awareness.

Uhl, Christopher. 1998. "Conservation Biology in Your Own Front Yard" *Conservation Biology*, Vol. 12, No. 6. (Dec., 1998), pp. 1175-1177. There are opportunities for environmental education close to home.

United Nations Development Programme. 2002. *Human Development Report: Deepening Democracy in a Fragmented World*. New York: Cambridge University Press. The most comprehensive and up-to-date data on human development.

United Nations Development Programme. 2000. *Human Development Report*. New York: Oxford University Press. Source of the annual human development index and other economic and development statistics.

United Nations Environment Programme. 2002. *Global Environment Outlook 3*. New York: Earthscan Publications. A region-by-region survey of the state of the world's environment.

Vaitheeswaran, Vijay. 2002. "How Many Planets?: A Survey of the Global Environment." *The Economist* July 6, 2002, pp. 3-18.

Vilsack, Tom. 2002. *Conservation in the Internet Age: Threats and Opportunities*. Island Press. The Governor of Iowa discusses land and wildlife conservation in modern times.

Wackernagel, Mathis, et al. 2002. "Tracking the ecological overshoot of the human economy." *Proc. Natl. Acad. Sci. USA*, Vol. 99, Issue 14, 9266-9271, July 9, 2002. The human demand on the environment for the production of food and other goods, together with the absorption of wastes corresponded to 70% of the capacity of the global biosphere in 1961, and grew to 120% in 1999.

Wall, Derek. 1994. *Green History: A Reader in Environmental Literature, Philosophy and Politics*. Routledge. A classic in social ecology.

Ward, Barbara and Rene Dubos. 1972. *Only One Earth: The Care and Maintenance of a Small Planet*. Norton & Co. A manifesto for the 1972 UN Conference on the Human Environment and the foundation of concern poverty and our environment.

White, Lynn Jr. 1967. "The Historical Roots of Our Ecologic Crisis." *Science* 155 (3767): 1203-1207. An extremely influential account of how religious worldviews shape our treatment of the environment.

Wilson, E. O. 2002. "The Bottleneck." *Scientific American* 286(2): 82-91. A distinguished ecologist looks at how we might provide a satisfying and sustainable life for everyone.

Wirth, Timothy E. 1995. "The Human Factor," *Sierra* 80(5):76. National Security used to be about war and readiness; now it's also about population and overconsumption.

World Bank. 2000. *World Development Report 2000/2001: Attacking Poverty*. The World Bank. . A comprehensive report on living conditions around the world.

World Commission on Environment and Development. 1987. *Our Common Future*. The Oxford University Press. Commonly called the Brundtland Report, this book coined the most widely accepted definition of sustainable development.

World Resources Institute. 2003. *World Resources 2002-2004: Decisions for the Earth: Balance, voice, and power*. New York: Oxford University Press. An excellent summary of world environment and resources. Prepared in collaboration with the United Nations Environment Programme and the United Nations Development Program.

Zimmerman, M. 1995. *Science, Non-science, and Nonsense: Approaching Environmental Literacy*. Johns Hopkins University Press. How does science differ from non-science?
