Preface xiii

New Features in the Third Edition xiv
Features xv
Walk Through xx
Book Organization xxvi
Acknowledgments xxviii
My Story xxix

0 Introduction to Computers and Programming Languages 1

0.1 A History of Computers 2
0.2 Computer Architecture 4
0.3 Programming Languages 10
0.4 Java 12
Summary 12
Key Concepts 13
Exercises 13

1 Introduction to Object-Oriented Programming and Software Development 15

1.1 Classes and Objects 16
1.2 Messages and Methods 18
1.3 Class and Instance Data Values 20
1.4 Inheritance 23

1.5 Software Engineering and Software Life Cycle 25
Summary 27
Key Concepts 27
Exercises 28

2 Getting Started with Java 31

2.1 The First Java Program 32
2.2 Program Components 41
2.3 Edit-Compile-Run Cycle 55
2.4 Sample Java Standard Classes 57
2.5 Sample Development: Printing the Initials 71
Summary 78
Key Concepts 79
Exercises 79

3 Numerical Data 85

3.1 Variables 86
3.2 Arithmetic Expressions 93
3.3 Constants 98
3.4 Getting Numerical Input Values 100
3.5 Standard Output 105
3.6 Standard Input 109
3.7 The **Math** Class 113
3.8 The **GregorianCalendar** Class 118
3.9 Sample Development: Loan Calculator 123
3.10 Numerical Representation (Optional) 135
Summary 138
Key Concepts 139
Exercises 139

4 Defining Your Own Classes 149

4.1 Defining Instantiable Classes 151
4.2 Instantiable Classes and Constructors 162
4.3 Information Hiding and Visibility Modifiers 166

4.4 Local Variables, Return Values, and Parameter Passing 171
4.5 Accessors, Mutators, and Overloaded Methods 179
4.6 Passing and Returning Objects 189
4.7 Modularizing the Input Routine Functionality 200
4.8 (Optional) Organizing Classes into a Package 203
4.9 Sample Development: Defining and Using Instantiable Classes 204
4.10 Making an Instantiable Class the Main Class 222
Summary 223
Key Concepts 224
Exercises 225

5 Selection Statements 233

5.1 The **if** Statement 234
5.2 Boolean Expressions and Variables 244
5.3 Nested-**if** Statements 254
5.4 Comparing Objects 265
5.5 The **switch** Statement 269
5.6 Drawing Graphics 274
5.7 Sample Development: Drawing Shapes 281
Summary 305
Key Concepts 305
Exercises 306

6 Repetition Statements 315

6.1 The **while** Statement 316
6.2 Pitfalls in Writing Repetition Statements 322
6.3 The **do–while** Statement 327
6.4 Loop-and-a-Half Repetition Control 331
6.5 Confirmation Dialog 334
6.6 The **for** Statement 335
6.7 Nested-**for** Statements 340
6.8 Formatting Output 343
6.9 Loan Tables 348
6.10 Random Number Generation 350
6.11 Sample Program: Hi-Lo Game 356

6.12 (Optional) Recursive Methods 366
Summary 370
Key Concepts 371
Exercises 371

7 Event-Driven Programming and Basic GUI Objects 381

7.1 Creating a Subclass of **JFrame** 385
7.2 Placing Buttons on the Content Pane of a Frame 391
7.3 Handling Button Events 394
7.4 **JLabel, JTextField,** and **JTextArea** Classes 402
7.5 Menus 412
7.6 Sample Development: HiLo Game with GUI 417
Summary 454
Key Concepts 455
Exercises 455

8 Exceptions and Assertions 461

8.1 Catching Exceptions 462
8.2 Throwing Exceptions 469
8.3 Propagating Exceptions 473
8.4 Types of Exceptions 481
8.5 Programmer-Defined Exceptions 484
8.6 Assertions 486
8.7 Supervisor-Subordinate Design Pattern 492
8.8 Sample Development: Keyless Entry System 494
Summary 511
Key Concepts 512
Exercises 512

9 Characters and Strings 515

9.1 Characters 516
9.2 Strings 519
9.3 Pattern Matching and Regular Expression 530

9.4 The **Pattern** and **Matcher** Classes 537
9.5 Comparing Strings 541
9.6 **StringBuffer** 543
9.7 Sample Development: Building Word Concordance 548
Summary 562
Key Concepts 562
Exercises 562

10 Arrays 569

10.1 Array Basics 570
10.2 Arrays of Objects 581
10.3 Passing Arrays to Methods 591
10.4 Sample Development: The Address Book 598
10.5 Two-Dimensional Arrays 615
10.6 Lists and Maps 622
Summary 631
Key Concepts 631
Exercises 631

11 Sorting and Searching 637

11.1 Searching 638
11.2 Sorting 642
11.3 Heapsort 650
11.4 Sample Program: Sorting an **AddressBook** 663
Summary 684
Key Concepts 684
Exercises 685

12 File Input and Output 689

12.1 **File** and **JFileChooser** Objects 690
12.2 Low-Level File I/O 701
12.3 High-Level File I/O 706
12.4 Object I/O 714

12.5 Sample Development: Saving an **AddressBook** Object 721
Summary 729
Key Concepts 730
Exercises 730

13 Inheritance and Polymorphism 733

13.1 Defining Classes with Inheritance 734
13.2 Using Classes Effectively with Polymorphism 738
13.3 Inheritance and Member Accessibility 741
13.4 Inheritance and Constructors 746
13.5 Abstract Superclasses and Abstract Methods 750
13.6 Inheritance versus Interface 755
13.7 Sample Development: Computing Course Grades 756
Summary 777
Key Concepts 777
Exercises 778

14 Advanced GUI 783

14.1 Handling Mouse Events 784
14.2 Layout Managers and Panels 792
14.3 Effective Use of Nested Panels 800
14.4 Other GUI Components 809
14.5 Sample Development: TicTacToe 827
Summary 846
Key Concepts 847
Exercises 848

15 Recursive Algorithms 855

15.1 Basic Elements of Recursion 856
15.2 Directory Listing 857
15.3 Anagram 859
15.4 Towers of Hanoi 862
15.5 Quicksort 864

15.6 When Not to Use Recursion 869
Summary 871
Key Concepts 872
Exercises 872

A How to Run Java Programs 875

B Sample Programs 885

C Standard Classes and Interfaces 907

D UML Diagrams 929

Index 937
