

An Introduction to the World's Oceans, 8/e

By Sverdrup/Duxbury/Duxbury

Contents

Chapter 1 The History of Oceanography

- 1.1 The Early Times
- 1.2 The Middle Ages
- 1.3 Voyages of Discovery
- 1.4 The Beginnings of Earth Science
- 1.5 The Importance of Charts and Navigational Information
- Boxed Reading: Marine Archaeology
- 1.6 Ocean Science Begins
- 1.7 The *Challenger* Expedition
- 1.8 Oceanography as Science
- 1.9 Oceanography in the Twentieth Century
- Field Notes box: Planning and Executing a Successful Oceanographic Expedition
- 1.10 The Recent Past, the Present, and the Future of Oceanography
- Summary

Chapter 2 The Water Planet

- 2.1 Beginnings
 - Origin of the Universe
 - Origin of Our Solar System
 - Extraterrestrial Oceans
 - Early Planet Earth
- Boxed Reading: Origin of the Oceans
- 2.2 Age and Time
 - Age of Earth
 - Geologic Time
 - Natural Time Periods
- 2.3 Shape of Earth
- 2.4 Location Systems
 - Latitude and Longitude
 - Chart Projections
 - Measuring Latitude
 - Longitude and Time
- 2.5 Modern Navigational Techniques
- 2.6 Earth: The Water Planet
 - Water on Earth's Surface
 - Hydrologic Cycle
 - Reservoirs and Residence Time
 - Distribution of Land and Water
 - Hypsographic Curve
- Summary

Chapter 3 Plate Tectonics

- 3.1 Interior of Earth
 - Investigating Earth's Structure
 - Internal Layers
- 3.2 Lithosphere and Asthenosphere

- The Layers
 - Isostasy
- 3.3 Movement of Continents
 - History of a Theory: Continental Drift
 - Evidence for a New Theory: Seafloor Spreading
 - Evidence for Crustal Motion
 - Polar Wandering Curves
- 3.4 Plate Tectonics
 - Plates and Their Boundaries
 - Divergent Boundaries
 - Transform Boundaries
 - Convergent Boundaries
 - Continental Margins
- 3.5 Motion of the Plates
 - Mechanisms of Motion
- Field Notes box: Exploring the Oceans on Earth and Elsewhere
 - Rates of Motion
 - Hot Spots
- 3.6 History of the Continents
 - The Breakup of Pangaea
 - Before Pangaea
 - Terranes
- 3.7 Research Projects and Plans
 - Project FAMOUS
 - Seafloor Spreading and Hydrothermal Vents
- Boxed Reading: Recovery of Black Smokers
 - Hydrothermal Vent Communities
 - The Ocean Drilling Program
- Summary

Chapter 4 The Sea Floor and Its Sediments

- 4.1 Measuring the Depths
 - Boxed Reading: Bathymetrics
- 4.2 Bathymetry of the Sea Floor
 - Continental Margin
 - Ocean Basin Floor
- Field Notes box: Giant Hawaiian Landslides
 - Ridges, Rises, and Trenches
- 4.3 Sediments
 - Particle Size
 - Location
 - Rates of Deposit
 - Source and Chemistry
 - Patterns of Deposit on the Sea Floor
 - Formation of Rock
 - Sampling Methods
 - Sediments as Historical Records

- 4.4 Seabed Resources
 - Sand and Gravel
 - Phosphorite
 - Sulfur
 - Coal
 - Oil and Gas
 - Gas Hydrates
 - Manganese Nodules
 - Sulfide Mineral Deposits
 - Laws and Treaties

Summary

Chapter 5 The Physical Properties of Water

- 5.1 The Water Molecule
- 5.2 Temperature and Heat
- 5.3 Changes of State
- 5.4 Heat Capacity
- 5.5 Cohesion, Surface Tension, and Viscosity
- 5.6 Density
 - The Effect of Pressure
 - The Effect of Temperature
 - The Effect of Salt
- 5.7 Dissolving Ability
- 5.8 Transmission of Energy
 - Heat
 - Light
 - Sound
- Boxed Reading: Acoustic Thermometry of Ocean Climate
- 5.9 Ice and Fog
 - Sea Ice
 - Icebergs
 - Fog

Boxed Reading: Green Icebergs

Summary

Chapter 6 The Chemistry of Seawater

- 6.1 The pH of Seawater
- 6.2 Salts
 - Units of Concentration
 - Ocean Salinities
 - Dissolved Salts
 - Sources of Salt
 - Regulating the Salt Balance
 - Residence Time
 - Constant Proportion
 - Determining Salinity
- 6.3 Gases
 - Distribution with Depth
 - The Carbon Dioxide Cycle
 - The Oxygen Balance
 - Measuring the Gases
- 6.4 Other Substances
 - Nutrients
 - Organics
- Boxed Reading: Messages in Polar Ice
- 6.5 Practical Considerations: Salt and Water

Chemical Resources

Desalination

Summary

Chapter 7 The Structure and Motion of the Atmosphere

- 7.1 Heating and Cooling Earth's Surface
 - Distribution of Solar Radiation
 - Heat Budget
 - Annual Cycles of Solar Radiation
 - Heat Capacity
- 7.2 The Atmosphere
 - Structure of the Atmosphere
 - Composition of Air
 - Atmospheric Pressure
- 7.3 Greenhouse Gases
 - Carbon Dioxide and Greenhouse Effect
 - The Ozone Problem
- 7.4 The Role of Sulfur Compounds
- 7.5 The Atmosphere in Motion
 - Winds on a Nonrotating Earth
 - The Effects of Rotation
- Boxed Reading: Ship Emissions
- Wind Bands
- 7.6 Modifying the Wind Bands
 - Seasonal Changes
- Boxed Reading: Clouds and Climate
 - The Monsoon Effect
 - The Topographic Effect
 - Jet Streams
- 7.7 Hurricanes
- 7.8 El Niño–Southern Oscillation
- 7.9 Practical Considerations: Storm Tides and Storm Surges

Summary

Chapter 8 Circulation and Ocean Structure

- 8.1 Density Structure
 - Surface Processes
 - Changes with Depth
 - Density-Driven Circulation
- 8.2 Upwelling and Downwelling
- 8.3 The Layered Oceans
 - The Atlantic Ocean
 - The Pacific Ocean
 - The Indian Ocean
 - Comparing the Major Oceans
 - The Arctic Ocean
- Boxed Reading: Arctic Ocean Studies
- Bordering Seas
- Internal Mixing
- 8.4 Measurement Techniques
- 8.5 Practical Considerations: Ocean Thermal Energy Conversion
- Boxed Reading: Ocean Gliders
- Summary

Chapter 9 The Surface Currents

- 9.1 Surface Currents
 - The Ekman Spiral and Ekman Transport
 - Ocean Gyres
 - Geostrophic Flow
- 9.2 Wind-Driven Ocean Currents
 - Pacific Ocean Currents
 - Atlantic Ocean Currents
 - Indian Ocean Currents
 - Arctic Ocean Currents
- 9.3 Current Flow
 - Current Speed
 - Western Intensification
- 9.4 Eddies
- 9.5 Convergence and Divergence
 - Langmuir Cells
 - Permanent Zones
- Boxed Reading: Ocean Drifters
 - Seasonal Zones
- 9.6 Changing Circulation Patterns
 - Global Currents
 - North Pacific Oscillations
 - North Atlantic Oscillations
- 9.7 Measuring the Currents
- 9.8 Practical Considerations: Energy from the Currents
- Summary

Chapter 10 The Waves

- 10.1 How a Wave Begins
- 10.2 Anatomy of a Wave
- 10.3 Wave Motion
- 10.4 Wave Speed
- 10.5 Deep-Water Waves
 - Storm Centers
 - Dispersion
 - Group Speed
 - Wave Interaction
- 10.6 Wave Height
 - Episodic Waves
 - Wave Energy
 - Wave Steepness
 - Universal Sea State Code
- 10.7 Shallow-Water Waves
 - Refraction
 - Reflection
 - Diffraction
 - Navigation from Wave Direction
- 10.8 The Surf Zone
 - Breakers
 - Water Transport
 - Energy Release
- 10.9 Tsunami
- Boxed Reading: Tsunami Warning Systems
- 10.10 Internal Waves
- 10.11 Standing Waves
- 10.12 Practical Considerations: Energy from Waves

Summary

Going to Sea

Chapter 11 The Tides

- 11.1 Tide Patterns
- 11.2 Tide Levels
- 11.3 Tidal Currents
- 11.4 Equilibrium Tidal Theory
 - The Moon Tide
 - The Tidal Day
 - The Tide Wave
 - The Sun Tide
 - Spring Tides and Neap Tides
 - Declinational Tides
 - Elliptical Orbits
- 11.5 Dynamic Tidal Analysis
 - The Tide Wave
 - Progressive Wave Tides
 - Standing Wave Tides
 - Tide Waves in Narrow Basins
- 11.6 Tidal Bores
- 11.7 Predicting Tides and Tidal Currents
 - Tide Tables
- Boxed Reading: Measuring Tides from Space
 - Tidal Current Tables
- 11.8 Practical Considerations: Energy from Tides
- Summary

Chapter 12 Coasts, Beaches, and Estuaries

- 12.1 Major Zones
- 12.2 Types of Coasts
 - Primary Coasts
 - Secondary Coasts
- 12.3 Anatomy of a Beach
- 12.4 Beach Dynamics
 - Natural Processes
 - Coastal Circulation
- 12.5 Beach Types
- 12.6 Modifying Beaches
 - Coastal Structures
- Boxed Reading: National Marine Sanctuaries
 - The Santa Barbara Story
 - The History of Ediz Hook
- 12.7 Estuaries
 - Types of Estuaries
 - Circulation of Patterns
 - Temperate-Zone Estuaries
- 12.8 High Evaporation Rates
- Boxed Reading: Rising Sea Level
- 12.9 Flushing Time
- 12.10 Practical Considerations: Case Histories
 - The Development of San Francisco Bay
 - The Situation in Chesapeake Bay
- Summary

Chapter 13 Environmental Issues and Concerns

- 13.1 Water and Sediment Quality
 - Solid Waste Dumping
 - Sewage Effluent
 - Toxicants
- 13.2 Gulf of Mexico Dead Zone
- 13.3 Plastic Trash
- 13.4 Ocean Waste Management Proposals
- 13.5 Oil Spills
- 13.6 Marine Wetlands
- Boxed Reading: Spartina: Valuable and Productive or Invasive and Destructive?
- 13.7 Biological Invaders
- Field Notes box: Ecological Nowcasting of Sea Nettles in Chesapeake Bay
- 13.8 Overfishing and Incidental Catch
- 13.9 Afterthoughts
- Summary

Chapter 14 The Living Ocean

- 14.1 Ocean Biology
- 14.2 Groups of Organisms
- 14.3 Environmental Zones
- 14.4 Facts of Ocean Life
 - Buoyancy, Flotation, and Viscosity
 - Salinity and Osmosis
 - Temperature
 - Pressure
 - Gases
 - Nutrients
 - Light and Color
 - Circulation Patterns
- 14.5 Bottom Environments
- 14.6 Close Associations
- 14.7 Barriers and Boundaries
- 14.8 Practical Considerations: Modification and Mitigation
- Boxed Reading: Biodiversity in the Oceans
- Summary

Chapter 15 Production and Life

- 15.1 Primary Production
 - Gross and Net
 - Standing Crop
- 15.2 Controls on Primary Production
 - Light
 - Nutrients
 - Nutrient Cycles
- 15.3 Global Primary Production
- 15.4 Measuring Primary Production
 - Direct Methods
 - Remote Methods
- 15.5 Total Production
 - Food Chains and Food Webs
 - Trophic Pyramids
 - Other Photosynthetic Systems

- Primary Production and Chemosynthesis
- 15.6 Practical Considerations: Human Concerns
- Boxed Reading: CalCOFI – Fifty Years of Coastal Ocean Data
- Summary

Chapter 16 The Plankton: Drifters of the Open Ocean

- 16.1 Kinds of Plankton
 - Phytoplankton
 - Zooplankton
- 16.2 Bacteria and Archaea
 - The Microbial Loop
- 16.3 Viruses
- 16.4 Classification Summary of the Plankton
- 16.5 Sampling the Plankton
- Boxed Reading: Discovery of the Role of Picoplankton
- 16.6 Practical Considerations: Marine Toxins
 - Harmful Algal Blooms
 - Pfiesteria*-Like Dinoflagellates
 - Ciguatera Poisoning
 - Toxic Diatom Blooms
 - Cholera
- Boxed Reading: Extremophiles
- Summary

Chapter 17 The Nekton: Free Swimmers of the Sea

- 17.1 Mammals
 - Whales and Whaling
 - Dolphins and Porpoises
 - Seals and Sea Lions
- Boxed Reading: Whale Falls
- Sea Otters
- Walrus
- Sea Cows
- Polar Bears
- Marine Mammal Protection Act
- Communication
- 17.2 Marine Birds
- 17.3 Marine Reptiles
 - Sea Snakes
 - Sea Turtles
- 17.4 Squid
- 17.5 Fish
 - Sharks and Rays
 - Commercial Species of Bony Fish
 - Deep-Sea Species of Bony Fish
- 17.6 Classification Summary of the Nekton
- 17.7 Practical Considerations: Commercial Fisheries
 - Anchovies
 - Tuna
 - Salmon
 - Atlantic Cod
 - Sharks
 - Fish Farming
- Field Notes box: Biofouling

Summary

Chapter 18 The Benthos: Dwellers of the Sea Floor

18.1 Algae and Plants

General Characteristics of Benthic Algae
Kinds of Seaweeds
Other Marine Plant Communities

18.2 Animals

Animals of the Rocky Shore
Tide Pools
Animals of the Soft Substrates
Animals of the Deep-Sea Floor
Fouling and Boring Organisms

18.3 Classification Summary of the Benthos

18.4 High-Energy Environments

18.5 Coral Reefs

Tropical Corals
Tropical Coral Reefs
Coral Bleaching
Predation and Disease
Human Activities

Deep-Water Corals

18.6 Deep-Ocean Chemosynthetic Communities

Hot Vents

Cold Seeps

Boxed Reading: Deep-Sea Ice Worms

18.7 Sampling the Benthos

18.8 Practical Considerations: Harvesting the Benthos

The Animals

The Algae

Biomedical Products

Boxed Reading: Genetic Manipulation of Fish and Shellfish

Summary

Appendix A Scientific (or Exponential) Notation

Appendix B SI Units

Appendix C Equations and Quantitative Relationships

Glossary
