Preface xv
Acknowledgements xvi

Chapter 1 Introduction to Limnology 2

- Limnology Defined 3
- Early Landmarks in Limnology 4
 - Key Early Inventions and Techniques 7
 - Aquatic Organisms* 8
 - Plankton Nets* 8
 - Vertical Temperature Profile* 8
 - Oxygen Concentration* 10
 - Contour Maps* 10
 - Limnological Textbooks 10
- Names of Bodies of Inland Water 11
- Environmentalism and/or Traditional Science in Limnology 14
- The Role of Modeling and Statistical Thinking in Limnology 15
 - Modeling 15
 - Descriptive Models 15
- Predictive Models 16
- Hypothesis Testing 19
- Mesocosms and Whole-Lake Experiments 20
- The Role of Field Stations 20
- The Role of Journals and Associations 21
- The Organizational Scheme of the Presentation of Limnology in This Text 22
- Measuring Units Used in Limnology 22
- Study Guide 24

Chapter 2 Setting the Stage: Water as an Environment 28

- The Diversity of Limnological Organisms 29
- Fundamental Characteristics of Water as a Substance 30
 - Molecular Shape 30
 - Polarity 30
 - Viscosity 30
 - Surface Tension 31
 - Solvent 32
 - Solubility of Gases* 32
 - Dissociation and pH* 33
 - Redox Potential* 35
 - Chemicals Dissolved in Water* 36
 - Density 38
 - Heat 38
 - Cooling and Evaporation 39
 - Summary of Critical Limnological Numbers 39
- Vertical Stratification in Lakes 39
 - Vertical Profiles of Temperature 40
 - Measurement of Temperature in Lakes* 40
 - Patterns of Vertical Temperature Profiles* 40
 - Annual Mixing Patterns* 43
 - Ice Cover and Lake Size* 44
 - Vertical Profiles of Oxygen 44
 - Measurement of Oxygen in Lakes* 44
 - Patterns of Vertical Oxygen Profiles* 45
 - Vertical Profiles of Light 46
 - Measurement of Light in Lakes* 46
 - Pigments* 46
 - Scattering* 46
 - Absorbance* 47
- Vertical Profiles of Living Organisms 47
 - Algae Patterns* 47
 - Macrophyte Patterns* 48
 - Bacteria Patterns* 48
 - Zoobenthos Patterns* 48
 - Zooplankton Patterns* 48
 - Fish Patterns* 48
- Vertical Profiles of Primary Productivity 48
- Interaction of Heat and Light with Organisms 50
- Water Movements 50
 - Diffusion 50
 - Mass Transport 50
 - Laminar Flow and Zero Flow* 50
 - Turbulent Flow* 50
 - Reynolds Number* 51
 - Horizontal Currents* 52
 - Periodic Movements 53
 - Surface (Progressive) Waves* 53
 - Seiches (Standing Waves)* 55
 - Lunar Tides* 56
- Study Guide 57

Chapter 3 Diversity of Aquatic Organisms: The Single-Celled and Colonial Organisms 64

The Diversity of Limnological Organisms 65
 Taxonomy and Diversity 66
 External Structure, Appearance, and Anatomy 66
 Habitat 66
 Swimming and Escape Behavior 67
 Feeding Preferences and Behavior 67
 Life Cycle and Diapause 67
 Economic Importance and Management 67

Size 67

Prokaryotes (Bacteria and Archaea) 68
 Taxonomy and Diversity 68
 External Structure, Appearance, and Anatomy 68
 Habitat 69
 Swimming and Escape Behavior 70
 Feeding Preferences and Behavior 71
 Life Cycle and Diapause 72
 Economic Importance and Management 72

Protista 73
 Taxonomy and Diversity 73
 External Structure, Appearance, and Anatomy 74
Ciliophora 75
Rhizopoda 75

Actinopoda 75
Zoomastigophora 75
Euglenophyta 76
Chlorophyta (Green Algae) 76
Cryptophyta (Cryptomonads) 76
Dinoflagellata 76
Chrysophyta (Golden-Brown Algae) 76
Apicomplexa 76

Habitat 77
 Swimming and Escape Behavior 77
 Feeding Preferences and Behavior 77
 Life Cycle and Diapause 78
 Economic Importance and Management 78

Fungi 79
 Taxonomy and Diversity 79
 External Structure, Appearance, and Anatomy 79
 Habitat 79
 Swimming and Escape Behavior 79
 Feeding Preferences and Behavior 79
 Life Cycle and Diapause 80
 Economic Importance and Management 80

Study Guide 81

Chapter 4 Diversity of Aquatic Organisms: Rotifers, Annelids, and Arthropods 84

The Small Invertebrates 85
 Rotifers 85
 Taxonomy and Diversity 85
 External Structure, Appearance, and Anatomy 86
 Habitat 88
 Swimming and Escape Behavior 88
 Feeding Preferences and Behavior 89
 Life Cycle and Diapause 89
 Economic Importance and Management 90

Annelida (Oligochaeta) 90
 Taxonomy and Diversity 90
 External Structure, Appearance, and Anatomy 90
 Habitat 91
 Swimming and Escape Behavior 91
 Feeding Preferences and Behavior 91
 Life Cycle and Diapause 92
 Economic Importance and Management 92

Branchiopods 92
 Taxonomy and Diversity 93
 External Structure, Appearance, and Anatomy 93
 Habitat 96
 Swimming and Escape Behavior 97
 Feeding Preferences and Behavior 98
 Life Cycle and Diapause 99
 Economic Importance and Management 100

Copepods 100
 Taxonomy and Diversity 100

External Structure, Appearance, and Anatomy 101
 Habitat 103
 Swimming and Escape Behavior 103
 Feeding Preferences and Behavior 104
 Life Cycle and Diapause 105
 Economic Importance and Management 106

Malacostracans 107
 Taxonomy and Diversity 107
 External Structure, Appearance, and Anatomy 107
 Habitat 108
 Swimming and Escape Behavior 108
 Feeding Preferences and Behavior 108
 Life Cycle and Diapause 108
 Economic Importance and Management 108

Insects 109
 Taxonomy and Diversity 109
 External Structure, Appearance, and Anatomy 109
 Habitat 109
 Swimming and Escape Behavior 110
 Feeding Preferences and Behavior 110
 Life Cycle and Diapause 111
 Economic Importance and Management 112

Study Guide 116

Chapter 5 Diversity of Aquatic Organisms: Larger Organisms 120

The Larger Aquatic Animals and Plants 121

Mollusks—Phylum Mollusca 121

- Taxonomy and Diversity 121
- External Structure, Appearance, and Anatomy 122
- Habitat 122
- Swimming and Escape Behavior 123
- Feeding Preferences and Behavior 123
- Life Cycle and Diapause 123
- Economic Importance and Management 123

Fishes—Phylum Chordata, Subphylum

Vertebrata 124

- Taxonomy and Diversity 124
- External Structure, Appearance, and Anatomy 125
- Habitat Swimming, and Feeding Preferences 128
- Life Cycle and Diapause 129
- Economic Importance and Management 130

Other Vertebrates—Classes Amphibia, Reptilia, Aves, and Mammalia 130

- Taxonomy and Diversity 130
- External Structure, Appearance, and Anatomy 130
- Habitat 130
- Swimming and Escape Behavior 131
- Feeding Preferences and Behavior 131
- Life Cycle and Diapause 131
- Economic Importance and Management 131

Plants—Aquatic Macrophytes 131

- Taxonomy and Diversity 131
- External Structure, Appearance, and Anatomy Habitat 134
- Swimming and Escape Behavior 136
- Feeding Preferences and Behavior 136
- Life Cycle and Diapause 136
- Economic Importance and Management 137

Study Guide 139

Chapter 6 Population Dynamics in Limnology: Population Size Changing with Time 142

Change in Limnology 143

Definition of Population Dynamics 143

- Distribution of a Population 144
- Estimating Population Size 145
- Stability 146
- Models of Population Dynamics 148
- Individual-Based Models 149

The Exponential Population Growth

Model 149

- Population Data Calculation 150
 - Don Hall's Surprise* 151
- Age-Specific Models 152
- Exponential Population Growth and Invasion 153

The Egg (or Seed) Bank Population Growth

Model 153

Biological Fitness and Population Growth Rate 154

Life-History Strategy 154

- Seasonal Timing of Life History, Including Reproduction 154
- Size and Number of Offspring 154
- Age-Specific Energy Allocation Patterns—Reproduction, Growth, and Body Maintenance 155
- Rate of Population Growth versus Resting Egg Production 155
- Age of First Reproduction and Size- or Age-Selective Predation 156
- Life Span 156
- Life-History Adaptations 156

Transition 157

Study Guide 158

Chapter 7 Community Ecology: Species Interactions and Community Structure 160

- The Community Concept 161
 - General Community Definitions 161
 - Community Building Blocks 161
 - Guild Concept* 162
 - Functional Species Group Concept* 162
 - Morphological Species Concept* 162
 - Biological Species Concept* 162
 - Molecular Species Concept* 162
 - Clone Concept* 163
- Major Aquatic Communities 163
 - Lake Communities 164
 - Stream Communities 164
 - Food Web Models 165
- Community Interactions 165
 - Competition for Limited Resources 165
 - General Concepts* 165
 - Competition Avoidance* 166
 - Predator-Prey Interactions 168
 - Selective Predation Strategies* 169
 - Defenses Against Predation* 172
 - Chemical Induction of Predator Defenses* 175
- Comparison of Ecological Importance of Competition and Predation 176
 - Indirect Effects of Predation* 176
 - Keystone Predation* 176
- Mutualisms and Symbiosis 178
- Community Structure 178
 - Diversity 178
 - Species Area Curves* 178
 - Pesticides and Diversity* 179
 - Spatial Heterogeneity and Diversity* 181
 - Community Composition 181
 - Species Associations* 181
 - Size-Spectrum 183
- Study Guide 184

Chapter 8 Community Ecology: Freshwater Communities Changing Through Time 188

- Community Origins 189
- Community Dynamics 190
 - Community Dynamics on a Daily Basis 190
 - Diel Vertical Migration (DVM) of Zooplankton* 190
 - Other Groups that Show Diel Vertical Migration* 192
 - Stream Drift* 192
 - Seasonal Ecological Succession in the Pelagic (Peg Model) 193
 - Long-Term Changes in Communities 194
 - "Island" Biogeography* 194
 - Extinctions 195
 - Invasion 195
 - Fish Invasions of the Laurentian Great Lakes* 197
 - A Molluscan Invader in Aquatic Communities* 197
 - A Plant Invader in Aquatic Communities* 199
 - Resistance 200
 - Resilience 200
- Bio-manipulation-Trophic Cascades 200
 - Cultural Eutrophication 201
 - Bio-manipulation 202
- Alternate Stable States 203
- Study Guide 206

Chapter 9 Aquatic Ecosystems and Physiology: Energy Flow 208

- The Ecosystem Concept 209
 - Models of Energy Flow 209
 - Space-Time Diagrams 211
- Primary Productivity 212
 - Photosynthetic Organisms 212
 - Light Inhibition of Photosynthesis 214
 - Primary Productivity in Lakes and Streams 214
 - Measuring Primary Productivity 216
 - Tropical Productivity 217
 - Energy Inputs Other than Sunlight 217
 - Nonphotosynthetic Primary Productivity* 217
 - Wave Energy and Productivity* 217
- Secondary Production 217
 - Ecological Efficiencies 218
 - Fishes and Primary Productivity 218
 - Microbial Loop 218
 - Allochthonous Inputs 219
- Introduction to Physiological Ecology 219
 - Surface-to-Volume Ratios 219
 - Metabolic Rate and Body Size 220
 - Metabolic Rate and Temperature 221
 - Scope for Growth and Temperature Preferences 222
 - Interaction of Temperature and Body Size 223
 - Metabolic Rate and Other Factors 223
- Balanced Bioenergetic Model 224
- Study Guide 226

Chapter 10 Aquatic Ecosystems: Chemical Cycles 230

Chemical Cycles in Water and Biogeochemical Cycles 231

The Carbon Cycle in Water 232

- Forms of Carbon 232
- Carbon Reservoirs 233
- The CO₂, Bicarbonate, Carbonate Equilibrium 234
- pH, Inorganic Carbon Equilibrium, and Photosynthesis 235
- Acid Deposition 235
 - Buffers* 235
 - Titration* 235
- The Dark Side of CO₂ 237

The Oxygen Cycle in Water 237

- Forms of Oxygen 237
- Oxygen Reservoirs 238
- Metabolic Adaptations to Low Oxygen Concentrations 238
 - Breathing in Water* 238
 - Circulatory Systems* 239
 - Behavioral Adaptations to Low Oxygen Concentrations* 239
 - Hemoglobin* 239

The Phosphorus Cycle in Lakes 239

- Forms of Phosphorus 239
- Reservoirs of Phosphorus 241
- Phosphate as a Limiting Nutrient 242
- Stratification 242

- Luxury Consumption 243
- Recycling 243
- Limiting Nutrient 243
- Cultural Eutrophication 244
- Environmental Protection 245

The Nitrogen Cycle in Water 245

- Forms of Nitrogen 245
- Reservoirs of Nitrogen 246
- Nitrogen Fixation 247
- Nitrification 248
- Denitrification 248
- Assimilation 248
- Nitrogen Excretion 249
- Ecosystem Manipulations and the Nitrogen Cycle 250

Silicon in Water 250

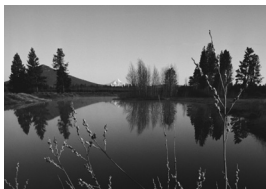

Ecological Stoichiometry 250

Toxic Chemicals 252

- Heavy Metals in Freshwater Systems 252
- Anthropogenic Organic Chemicals in Freshwater Systems 253
- Ecological Effects of Toxic Chemicals 253
- Bioaccumulation and Biomagnification 254
 - Clear Lake Example: Bioaccumulation and Evolution of Pesticide Resistance* 257

Study Guide 259

Chapter 11 Water in Landscapes 264

The Landscape Concept 265

Shapes and Sizes of Lakes and Streams 265

- Shape 265
- Shore Length 266
- Area 267
- Depth 267
- Volume 267
- Watershed or Catchment Basin 267

Stream Morphometry 268

- Velocity 268
- Gradient 268
- Cross-Sectional Area 268
- Discharge 269

Landscape Position 269

- Lake Position 270
- Stream Order and River Continuum Concept 271

Interactions Between Surface and Ground

Waters: The Hydrological Cycle 272

- Ground Water 273
- Lakes 274
- Streams 276
- Reservoirs 276
- Wetlands 276
- Estuaries 277
- Atmosphere 277

Lake Origins: How Lakes Are Made 277

- Glaciation 278

- Alpine Glaciation* 278
- Glacial Dams and Moraines* 278
- Kettle Pond* 278
- Alluvial Dam* 280
- Plunge Basin* 280
- Glacial Scouring* 281

Oxbow Lakes 283

Sinkholes in Karst Regions 284

Rock Pools 284

Frost Polygons 284

Tectonic Activity 285

Volcanic Activity 285

Meteorites 286

Biological Activity 286

- Beaver Ponds* 286

- Wallows* 287

- Human Activity* 287

Stream Origins 287

Development of Lakes and Streams Over Time 287

Sedimentation 288

Stream Development 288

Dam Removal 288

Dam Failure 289

Paleolimnology 290

Study Guide 292

Chapter 12 The Citizen Limnologist 298

Limnology and Society 299

Observation 300

An Observation Model 300

Citizen Perspectives 301

Sense of Place 302

Contrasting Cultural Perspectives 304

The Limnological Perspective 305

Freshwater Management 305

Biological Integrity 306

Adaptive Management 306

Step 1-Assembly 307

Step 2-Monitoring 307

Step 3-Adaptation 308

Lake Powell Example 308

Restoration of Aquatic Communities 309

Study Guide 312

Chapter 13 Field and Laboratory Exercises 316

Background 317

Statistical Analysis Supplement 317

Supplemental Reading 317

Field Exercise Protocol 318

Lab 1: Vertical Patterns in a Lake 319

Lab 2: Zooplankton in a Lake 323

Lab 3: Becoming Familiar with Rotifers 326

Lab 4: Becoming Familiar with

Cladocerans 329

Lab 5: Becoming Familiar with
Copepods 333

Lab 6: Aquatic Insects in a Stream 338

Lab 7: Aquatic Macrophytes and Multivariate
Techniques 341

Lab 8: Fishes in Lakes and Streams 344

Lab 9: Chemistry and Productivity of a
Sewage Pond 346

Lab 10: Aquatic Resource Integrity 348

Appendix 1 Spearman Rank Correlation Test 353

Appendix 2 The X^2 Test of Independence, with Emphasis on the X^2 Median Test 355

Literature Cited 359

Index 379
