

## Where's The Error?

Careless Carol is preparing to administer medication to a patient who is having difficulty swallowing. In order to help the patient take the medication, she has crushed them up and mixed them with applesauce. According to the patient's chart, she is to administer one tablet of each of the following medications:

Levothroid 137 mcg  
 Oxycontin 10 mg  
 Concerta 36 mg

The following labels are the medications that Carol has selected. Where's the error?

NDC 17314-5851-2 100 tablets  
**CONCERTA®**  
 (methylphenidate HCl)  
 Extended-release tablets  
**36 mg**  
 Rx only

Each tablet contains 36 mg methylphenidate hydrochloride in a controlled-release formulation. Usual dosage: Once daily. See package insert for dosage information. Store at 25°C (77°F); excursions permitted between 15°-30°C (59°-86°F). Protect from humidity.
