PREFACEVI

INTRODUCTION 1

What is GIS? 1
 Concepts 1
 What is GIS? 1
 A history of GIS 3
 What can a GIS do? 4
 GIS project management 7
 Project case study: A thorny issue 9
 Types of GIS projects 12
 Planning a GIS project 13

Example of a GIS Project Proposal 16

CHAPTER 1. INTRODUCING ARCGIS 19

Mastering the Concepts..... 19
 Concepts 19
 Storing map data 19
 ArcGIS overview 23
 Data files in ArcGIS 25
 Properties of spatial data files 28
 Introduction to metadata 30
 Overview of the ArcGIS Interface 31
 Object Properties 32
 About ArcCatalog 33
 About ArcToolbox 34
 Summary 36
 Chapter Review Questions 37

Mastering the Skills 38
 Teaching Tutorial 38
 Exercises 56
 Skills Reference 57

CHAPTER 2. WORKING WITH ARCMAP 65

Mastering the Concepts..... 65
 Concepts 65
 Map documents 65
 ArcMap windows and menus 67
 Data frames 70
 Layers and layer files 70
 Working with symbols and styles 71
 The Help system 72
 Map scale concepts 72
 Labeling concepts 74

Summary 77
 Chapter Review Questions 78

Mastering the Skills 79
 Teaching Tutorial 79
 Exercises 93
 Skills Reference 95

CHAPTER 3. COORDINATE SYSTEMS AND MAP PROJECTIONS 109

Mastering the Concepts..... 109
 Concepts 109
 About coordinate systems and GIS 109
 Geographic coordinate systems 110
 Spheroids and datums 111
 Map projections 112
 Common projection systems 116
 Map projections in ArcMap 117
 Managing coordinate systems 119
 Projecting data 120
 Using ArcToolbox 121
 Summary 123
 Chapter Review Questions 124

Mastering the Skills 125
 Teaching Tutorial 125
 Exercises 138
 Skills Reference 139

CHAPTER 4. DRAWING AND SYMBOLIZING FEATURES 143

Mastering the Concepts..... 143
 Concepts 143
 Types of maps 143
 Classifying numeric data 147
 Using map layer files 150
 Editing symbols and using styles 150
 Displaying rasters 151
 Summary 153
 Chapter Review Questions 154

Mastering the Skills 155
 Teaching Tutorial 155
 Exercises 172
 Skills Reference 174

CHAPTER 5. WORKING WITH TABLES 179

Mastering the Concepts..... 179
 Concepts 179
 Overview of tables in ArcGIS 179
 Table formats 181
 Field types 182
 Queries on tables..... 184
 Joining and relating tables 184
 Getting statistics on tables 187
 Summarizing tables..... 188
 Editing and calculating fields 189
 Summary 191
 Chapter Review Questions 192

Mastering the Skills 193
 Teaching Tutorial 193
 Exercises..... 204
 Skills Reference..... 206

CHAPTER 6. QUERIES..... 219

Mastering the Concepts..... 219
 Concepts 219
 Using queries in GIS analysis..... 219
 What are queries?..... 220
 Creating layers from selected features... 220
 Interactive selection 220
 Selecting by attributes..... 221
 Selecting by location..... 224
 Choosing the selection method 226
 Selection states..... 227
 Summary 228
 Chapter Review Questions 229

Mastering the Skills 230
 Teaching Tutorial 230
 Exercises..... 240
 Skills Reference..... 241

CHAPTER 7. SPATIAL JOINS.. 247

Mastering the Concepts..... 247
 Concepts 247
 What is a spatial join?..... 247
 Types of spatial joins 248
 Setting up a spatial join..... 254
 Summary 259
 Chapter Review Questions 260

Mastering the Skills 261
 Teaching Tutorial 261
 Exercises..... 272

Skills Reference..... 273

CHAPTER 8. GEOPROCESSING..275

Mastering the Concepts..... 275
 Concepts 275
 Spatial analysis 275
 Map overlay 275
 Other spatial analysis functions 279
 What is geoprocessing? 282
 Summary 284
 Chapter Review Questions 285

Mastering the Skills 286
 Teaching Tutorial 286
 Exercises..... 302
 Skills Reference..... 303

CHAPTER 9. PRESENTING DATA 309

Mastering the Concepts..... 309
 Concepts 309
 Tips for making maps 309
 Maps and reports in ArcGIS 315
 Working with map elements..... 316
 The Layout toolbar..... 316
 Working with map scales..... 316
 Setting up scale bars 318
 Summary 319
 Chapter Review Questions 320

Mastering the Skills 321
 Teaching Tutorial 321
 Exercises..... 333
 Skills Reference..... 334

CHAPTER 10. GEOCODING ... 349

Mastering the Concepts..... 349
 Concepts 349
 What is geocoding?..... 349
 How does geocoding work?..... 350
 Available geocoding styles 354
 The geocoding process..... 355
 Setting up an address locator 356
 The reference data..... 358
 Adding *x-y* coordinates 359
 Summary 360
 Chapter Review Questions 361

Mastering the Skills 362
 Teaching Tutorial 362
 Exercises..... 373
 Skills Reference..... 373

CHAPTER 11. BASIC EDITING IN ARCMAP 379

Mastering the Concepts.....	379
Concepts	379
Editing overview	379
The Editor toolbar	379
General information about editing.....	380
Snapping features.....	381
Creating adjacent polygons.....	383
Editing features	383
Editing attributes.....	385
Saving work	386
Summary	387
Chapter Review Questions	388

Mastering the Skills	389
Teaching Tutorial	389
Exercises.....	405
Skills Reference.....	406

CHAPTER 12. MORE EDITING TECHNIQUES 417

Mastering the Concepts.....	417
Concepts	417
Using different sketch tools	417
Changing existing features	418
Combining features.....	419
Buffering features	420
Topology and shared features.....	421
Summary	423
Chapter Review Questions	423

Mastering the Skills	424
Teaching Tutorial	424
Exercises.....	441
Skills Reference.....	442

CHAPTER 13. WORKING WITH GEODATABASES 455

Mastering the Concepts.....	455
Concepts	455
About geodatabases	455
Creating geodatabases.....	456
Creating feature datasets.....	457
Using default values.....	458
Setting up domains.....	458
Split and merge policies.....	459
About subtypes	461
Summary	463
Chapter Review Questions	464

Mastering the Skills	465
Teaching Tutorial	465
Exercises.....	481
Skills Reference.....	482

CHAPTER 14. ANALYZING NETWORKS 489

Mastering the Concepts.....	489
Concepts	489
About networks.....	489
Types of networks.....	491
Network analysis.....	492
The Utility Network Analyst toolbar.....	493
Generic trace solvers.....	494
Utility trace solvers.....	496
Building networks.....	497
Summary	500
Chapter Review Questions	501

Mastering the Skills	502
Teaching Tutorial	502
Exercises.....	512
Skills Reference.....	513

CHAPTER 15. RASTER ANALYSIS 523

Mastering the Concepts.....	523
Concepts	523
About rasters	523
Raster analysis	526
Using Spatial Analyst	532
Summary	537
Chapter Review Questions	538

Mastering the Skills	539
Teaching Tutorial	539
Exercises.....	555
Skills Reference.....	557

GLOSSARY 567

SELECTED ANSWERS..... 579

INDEX 593

CONVERSION TABLE 610

Skills Reference List

Chapter 1 ArcCatalog

Starting ArcMap or ArcCatalog	57
Starting ArcToolbox	57
Connecting and disconnecting from folders ...	58
Connecting to an Internet service	58
Setting options	58
Viewing the contents of a folder	59
Creating and viewing thumbnails	59
Previewing a layer	59
Previewing a table	59
Using layer properties	61
Searching for data	61
Drag and drop files to ArcMap	63
Viewing metadata	63
Creating and deleting files	63

Chapter 2 Basic ArcMap

Starting ArcMap	95
Managing toolbars	96
Adding data	96
Saving an ArcMap document	96
Opening an ArcMap document	97
Controlling display of layers	97
Setting Map Tips	97
Grouping layers for display	98
Using the Zoom/Pan tools	99
Identifying features	100
Measuring features	100
Finding features by searching attributes	101
Setting data frame and layer properties	101
Defining symbols for a layer	101
Labeling features interactively	102
Setting the reference scale	104
Labeling features using dynamic labels	105
Converting dynamic labels to annotation	106
Creating a map from a template	107
Printing a map	108
Exporting a map as a picture file	108

Chapter 3 Coordinate Systems

Examining the coordinate system	139
Setting the data frame coordinate system	140
Defining coordinate systems of data sets	141
Projecting data	142

Chapter 4 Symbols and Layers

Using the Symbol Properties Editor	174
Creating a map based on an attribute	175
Classifying attributes for a map	176
Modifying the appearance of the legend	177

Creating a map layer	178
Creating a map group layer	178

Chapter 5 Tables

Adding or removing a table	206
Opening a table	206
Modifying a table's appearance	207
Selecting records using attributes	209
Getting statistics for a field	210
Summarizing on a field	211
Exporting a table	211
Adding or deleting fields	212
Calculating fields	214
Editing fields in a table and saving changes ..	214
Creating joins and relates	215
Creating a new table	216
Deleting a table	216
Importing Excel Data into ArcGIS	217

Chapter 6 Queries

Setting the selectable layers	241
Selecting features interactively	242
Selecting features using shapes	242
Clearing a selection	243
Using the Selection tab	243
Selecting by attributes	244
Selecting by location	245
Creating a layer from selected features	246
Changing the selection options	246

Chapter 7 Spatial Joins

Performing a spatial join	273
---------------------------------	-----

Chapter 8 Overlay

Using tools in ArcToolbox	304
Performing an intersection	305
Creating buffers	306
Clipping a layer	307
Appending layers	307
Dissolving	308

Chapter 9 Layouts

Setting up the map page	335
Using the Layout toolbar	336
Setting the scale or extent	337
Clipping to a layer	337
Composing the data frames	338
Adding a north arrow	338
Adding titles and text	338
Adding a legend	339
Changing the appearance of a legend	339
Adding a scale bar	342

Chapter 9 Layouts, cont.

Adding neatlines and backgrounds.....	343
Adding pictures.....	343
Adding graphics to layouts.....	344
Changing map elements.....	344
Creating a simple graph.....	345
Creating a report.....	346
Using a report.....	348

Chapter 10 Geocoding

Creating an address locator.....	374
Geocoding addresses.....	375
Reviewing and rematching addresses.....	376
Rematching a geocoding result.....	376
Interactive matching.....	377
Adding <i>x-y</i> data.....	378

Chapter 11 Basic Editing

Begin an editing session.....	406
Setting snapping options.....	407
Selecting features for editing.....	407
Moving features.....	408
Rotating features.....	408
Deleting features.....	409
Creating new features.....	409
Using sketch context menus.....	410
Creating multipart features.....	413
Creating features with square corners.....	413
Creating adjacent polygons.....	414
Using the Attribute Editor.....	415
Saving changes during an edit session.....	416
Stopping an edit session.....	416
Switching to another folder or geodatabase.....	416

Chapter 12 More Editing

Using the sketching tools.....	442
Modifying a feature.....	446
Reshaping a feature.....	447
Flipping a line.....	447
Mirroring features.....	448
Dividing a line.....	448
Splitting lines exactly.....	449
Moving a feature an exact distance.....	449
Using Copy Parallel.....	449
Trimming lines.....	450
Extending lines.....	450
Merging features.....	450
Union of features.....	451
Intersection of features.....	451
Clipping features.....	451
Creating donut polygons.....	452
Buffering features.....	453
Editing shared features.....	453

Chapter 13 Geodatabases

Creating a geodatabase.....	482
Deleting a geodatabase.....	482
Deleting feature classes.....	482
Deleting feature datasets.....	482
Creating a feature dataset.....	483
Creating a feature class.....	484
Importing feature classes into a geodatabase.....	485
Creating attribute domains.....	486
Setting default values or domains.....	487

Chapter 14 Network Analysis

Examining network properties.....	513
Performing a trace.....	514
Setting general tracing options.....	514
Changing the results format.....	515
Using weights when tracing.....	515
Viewing flow directions.....	516
Adding and clearing flags and barriers.....	517
Finding a path.....	518
Finding the shortest path.....	518
Finding connections and loops.....	519
Tracing upstream/downstream.....	519
Tracing with accumulation.....	519
Building a simple network.....	520

Chapter 15 Raster Analysis

Turning on Spatial Analyst.....	557
Managing grids.....	557
Setting the analysis environment.....	558
Converting between grids and features.....	559
Reclassifying a grid.....	560
Calculating cell statistics.....	561
Calculating neighborhood statistics.....	561
Calculating zonal statistics.....	562
Using surface functions.....	563
Calculating a viewshed.....	564
Creating a density map.....	564
Interpolating between points.....	565
Finding a least-cost path.....	566
