

Contents

Preface xvi

PART I

Introduction 1

1 What Is Biology? 1

- 1.1 Why a Study of Biology Is Important 2
- 1.2 Science and the Scientific Method 3
 - Basic Assumptions in Science 3
 - Cause-and-Effect Relationships 3
 - The Scientific Method 3
- 1.3 Science, Nonscience, and Pseudoscience 7
 - Fundamental Attitudes in Science 7
 - Theoretical and Applied Science 8
 - Science and Nonscience 10
 - Pseudoscience 10
 - The Limitations of Science 11
- 1.4 The Science of Biology 12
 - What Makes Something Alive? 12
 - The Levels of Biological Organization 15
 - The Significance of Biology in Our Lives 15
 - The Consequences of Not Understanding Biological Principles 20
 - Future Directions in Biology 21

PART II

Cornerstones Chemistry, Cells, and Metabolism 23

2 The Basics of Life: Chemistry 23

- 2.1 Matter, Energy, and Life 24
 - The Law of Conservation of Energy 24
 - Forms of Energy 25
- 2.2 The Nature of Matter 25
 - Structure of the Atom 25
 - Elements May Vary in Neutrons but Not Protons 25
 - Subatomic Particles and Electrical Charge 27
 - The Position of Electrons 28
- 2.3 The Kinetic Molecular Theory and Molecules 29
 - The Formation of Molecules 29
- 2.4 Molecules and Kinetic Energy 29
- 2.5 Physical Changes—Phases of Matter 30
- 2.6 Chemical Changes—Forming New Kinds of Matter 30
 - Ionic Bonds and Ions 31
 - Covalent Bonds 32
- 2.7 Water: The Essence of Life 34
 - Mixtures and Solutions 34
- 2.8 Chemical Reactions 35
 - Oxidation-Reduction Reactions 37
 - Dehydration Synthesis Reactions 37
 - Hydrolysis Reactions 37
 - Phosphorylation Reactions 37
 - Acid-Base Reactions 38
- 2.9 Acids, Bases, and Salts 38

3 Organic Molecules—the Molecules of Life 45

- 3.1 Molecules Containing Carbon 46
 - Carbon: The Central Atom 47
 - Isomers 48
 - The Carbon Skeleton and Functional Groups 49
 - Macromolecules of Life 49
- 3.2 Carbohydrates 52
 - Simple Sugars 52
 - Complex Carbohydrates 53
- 3.3 Proteins 54
 - The Structure of Proteins 54
 - What do Proteins Do? 57
- 3.4 Nucleic Acids 58
 - DNA 59
 - RNA 60
- 3.5 Lipids 61
 - True (Neutral) Fats 61
 - Phospholipids 63
 - Steroids 65

4 Cell Structure and Function 69

- 4.1 The Development of the Cell Theory 70
 - Some History 70
 - Prokaryotic and Eukaryotic Cells 71
- 4.2 Cell Size 72
- 4.3 The Structure of Cellular Membranes 74
- 4.4 Organelles Composed of Membranes 75
 - Plasma Membrane 75
 - Endoplasmic Reticulum 77
 - Golgi Apparatus 78
 - Lysosomes 78
 - Peroxisomes 79
 - Vacuoles and Vesicles 79
 - Nuclear Membrane 80
 - The Endomembrane System—Interconversion of Membranes 80
 - Energy Converters—Mitochondria and Chloroplasts 80
- 4.5 Nonmembranous Organelles 82
 - Ribosomes 82
 - Microtubules, Microfilaments, and Intermediate Filaments 83
 - Centrioles 84
 - Cilia and Flagella 84
 - Inclusions 84
- 4.6 Nuclear Components 85

- 4.7 Exchange Through Membranes 87
 - Diffusion 87
 - Osmosis 88
 - Controlled Methods of Transporting Molecules 90
- 4.8 Prokaryotic and Eukaryotic Cells Revisited 92
 - Prokaryotic Cell Structure 92
 - Eukaryotic Cell Structure 93

5 Enzymes, Coenzymes, and Energy 99

- 5.1 How Cells Use Enzymes 100
- 5.2 How Enzymes Speed Chemical Reaction Rates 101
 - Enzymes Bind to Substrates 101
 - Naming Enzymes 103
- 5.3 Cofactors, Coenzymes, and Vitamins 103
- 5.4 How the Environment Affects Enzyme Action 104
 - Temperature 104
 - pH 104
 - Enzyme-Substrate Concentration 105
- 5.5 Cellular-Control Processes and Enzymes 105
 - Enzymatic Competition for Substrates 106
 - Gene Regulation 106
 - Inhibition 107
- 5.6 Enzymatic Reactions Used in Processing Energy and Matter 109
 - Biochemical Pathways 109
 - Generating Energy in a Useful Form: ATP 109
 - Electron Transport 111
 - Proton Pump 111

6 Biochemical Pathways—Cellular Respiration 115

- 6.1 Energy and Organisms 116
- 6.2 An Overview of Aerobic Cellular Respiration 117
 - Glycolysis 118
 - The Krebs Cycle 118
 - The Electron-Transport System (ETS) 119
- 6.3 The Metabolic Pathways of Aerobic Cellular Respiration 120
 - Fundamental Description 120
 - Detailed Description 122
- 6.4 Aerobic Cellular Respiration in Prokaryotes 126

- 6.5 Anaerobic Cellular Respiration 126
 - Alcoholic Fermentation 127
 - Lactic Acid Fermentation 127
- 6.6 Metabolic Processing of Molecules Other Than Carbohydrates 128
 - Fat Respiration 129
 - Protein Respiration 129

7 Biochemical Pathways— Photosynthesis 135

- 7.1 Photosynthesis and Life 136
- 7.2 An Overview of Photosynthesis 136
- 7.3 The Metabolic Pathway of Photosynthesis 138
 - Fundamental Description 138
 - Detailed Description 140
 - Glyceraldehyde-3-Phosphate: The Product of Photosynthesis 144
- 7.4 Other Aspects of Plant Metabolism 145
- 7.5 Interrelationships Between Autotrophs and Heterotrophs 146

PART III

Molecular Biology, Cell Division, and Genetics 151

8 DNA and RNA: The Molecular Basis of Heredity 151

- 8.1 DNA and the Importance of Proteins 152
- 8.2 DNA Structure and Function 152
 - DNA Structure 152
 - Base Pairing in DNA Replication 153
 - The Repair of Genetic Information 154
 - The DNA Code 154
- 8.3 RNA Structure and Function 155
- 8.4 Protein Synthesis 155
 - Step One: Transcription 156
 - Step Two: Translation 159
 - The Nearly Universal Genetic Code 160

- 8.5 The Control of Protein Synthesis 161
 - Controlling Protein Quantity 162
 - Different Proteins from One Gene 164
- 8.6 Mutations and Protein Synthesis 166
 - Point Mutations 166
 - Insertions and Deletions 167
 - Chromosomal Aberrations 168
 - Mutations and Inheritance 168

9 Cell Division—Proliferation and Reproduction 171

- 9.1 The Importance of Cell Division 172
 - Asexual Reproduction 172
 - Sexual Reproduction 172
- 9.2 The Cell Cycle and Mitosis 172
 - The G₁ of Interphase 173
 - The S Stage of Interphase 173
 - The G₂ Stage of Interphase 173
- 9.3 Mitosis—Cell Replication 174
 - Prophase 174
 - Metaphase 175
 - Anaphase 175
 - Telophase 176
 - Cytokinesis 176
 - Summary 176
- 9.4 Controlling Mitosis 178
- 9.5 Cancer 179
 - Treatment Strategies 180
- 9.6 Determination and Differentiation 181
- 9.7 Cell Division and Sexual Reproduction 182
- 9.8 Meiosis—Gamete Production 182
 - Meiosis I 184
 - Meiosis II 186
- 9.9 Genetic Diversity—The Biological Advantage of Sexual Reproduction 189
 - Mutation 190
 - Crossing-Over 190
 - Segregation 191
 - Independent Assortment 191
 - Fertilization 192
- 9.10 Nondisjunction and Chromosomal Abnormalities 193

10 Patterns of Inheritance 199

- 10.1 Meiosis, Genes, and Alleles 200
 - Various Ways to Study Genes 200
 - What Is an Allele? 200
 - Genomes and Meiosis 200
- 10.2 The Fundamentals of Genetics 201
 - Phenotype and Genotype 201
 - Predicting Gametes from Meiosis 202
 - Fertilization 202
- 10.3 Probability vs. Possibility 203
- 10.4 The First Geneticist: Gregor Mendel 204
- 10.5 Solving Genetics Problems 206
 - Single-Factor Crosses 206
 - Double-Factor Crosses 209
- 10.6 Modified Mendelian Patterns 210
 - Codominance 210
 - Incomplete Dominance 212
 - Multiple Alleles 213
 - Polygenic Inheritance 214
 - Pleiotropy 215
- 10.7 Linkage 216
 - Linkage Groups 216
 - Autosomal Linkage 217
 - Sex Determination 217
 - Sex Linkage 217
- 10.8 Other Influences on Phenotype 218

11 Applications of Biotechnology 223

- 11.1 Why Biotechnology Works 224
- 11.2 Comparing DNA 224
 - DNA Fingerprinting 224
 - Gene Sequencing and the Human Genome Project 225
- 11.3 The Genetic Modification of Organisms 236
 - Genetically Modified Organisms 236
 - Genetically Modified Foods 237
 - Gene Therapy 237
 - The Cloning of Organisms 239
- 11.4 Stem Cells 240
 - Embryonic and Adult Stem Cells 242
 - Personalized Stem Cell Lines 242
- 11.5 Biotechnology Ethics 242
 - What Are the Consequences? 243
 - Is Biotechnology Inherently Wrong? 243

**PART IV****Evolution and Ecology 247****12 Diversity Within Species and Population Genetics 247**

- 12.1 Genetics in Populations 248
- 12.2 The Biological Species Concept 249
 - Gene and Allele Frequencies 250
 - Subspecies, Breeds, Varieties, Strains, and Races 251
- 12.3 How Genetic Diversity Comes About 251
 - Mutations 251
 - Sexual Reproduction 252
 - Migration 252
 - The Importance of Population Size 253
- 12.4 Why Genetically Distinct Populations Exist 253
 - Adaptation to Local Environmental Conditions 253
 - The Founder Effect 255
 - Genetic Bottleneck 255
 - Barriers to Movement 255
- 12.5 Genetic Diversity in Domesticated Plants and Animals 255
 - Cloning 255
 - Selective Breeding 256
 - Genetic Engineering 257
 - The Impact of Monoculture 257
- 12.6 Is It a Species or Not? The Evidence 257
- 12.7 Human Population Genetics 259
- 12.8 Ethics and Human Population Genetics 260

13 Evolution and Natural Selection 267

- 13.1 The Scientific Concept of Evolution 268
- 13.2 The Development of Evolutionary Thought 268
 - Early Thinking About Evolution 269
 - The Theory of Natural Selection 269
 - Modern Interpretations of Natural Selection 271
- 13.3 The Role of Natural Selection in Evolution 271
- 13.4 Common Misunderstandings About Natural Selection 272

- 13.5 What Influences Natural Selection 274
 - The Mechanisms That Affect Genetic Diversity 274
 - The Role of Gene Expression 275
 - The Importance of Excess Reproduction 276
- 13.6 The Processes That Drive Selection 276
 - Differential Survival 277
 - Differential Reproductive Rates 278
 - Differential Mate Choice—Sexual Selection 278
- 13.7 Patterns of Selection 279
 - Stabilizing Selection 279
 - Directional Selection 279
 - Disruptive Selection 280
- 13.8 Evolution Without Selection—Genetic Drift 280
- 13.9 Gene-Frequency Studies and the Hardy-Weinberg Concept 281
 - Determining Genotype Frequencies 282
 - Why Hardy-Weinberg Conditions Rarely Exist 282
 - Using the Hardy-Weinberg Concept to Show Allele-Frequency Change 284
- 13.10 A Summary of the Causes of Evolutionary Change 285

14 The Formation of Species and Evolutionary Change 289

- 14.1 Evolutionary Patterns at the Species Level 290
 - Gene Flow 290
 - Genetic Similarity 291
- 14.2 How New Species Originate 291
 - Speciation by Geographic Isolation 291
 - Polyploidy: Instant Speciation 292
 - Other Speciation Mechanisms 292
- 14.3 The Maintenance of Reproductive Isolation Between Species 293
- 14.4 Evolutionary Patterns Above the Species Level 295
 - Divergent Evolution 295
 - Extinction 296
 - Adaptive Radiation 296
 - Convergent Evolution 298
 - Homologous or Analogous Structure 299
- 14.5 Rates of Evolution 300
- 14.6 The Tentative Nature of the Evolutionary History of Organisms 301
- 14.7 Human Evolution 301
 - The Australopiths 306
 - The Genus *Homo* 306
 - Two Points of View on the Origin of *Homo sapiens* 307

15 Ecosystem Dynamics: The Flow of Energy and Matter 311

- 15.1 What Is Ecology? 312
 - Biotic and Abiotic Environmental Factors 312
 - Levels of Organization in Ecology 312
- 15.2 Trophic Levels and Food Chains 313
 - Producers 314
 - Consumers 314
 - Decomposers 314
- 15.3 Energy Flow Through Ecosystems 316
 - The Pyramid of Energy 316
 - The Pyramid of Numbers 317
 - The Pyramid of Biomass 317
- 15.4 The Cycling of Materials in Ecosystems—Biogeochemical Cycles 319
 - The Carbon Cycle 319
 - The Hydrologic Cycle 322
 - The Nitrogen Cycle 323
 - The Phosphorus Cycle 324
- 15.5 Human Use of Ecosystem 325
 - The Conversion of Ecosystems to Human Use 327
 - The Energy Pyramid and Human Nutrition 328

16 Community Interactions 331

- 16.1 The Nature of Communities 332
 - Defining Community Boundaries 332
 - Complexity and Stability 333
 - Communities Are Dynamic 334
- 16.2 Niche and Habitat 334
 - The Niche Concept 334
 - The Habitat Concept 334
- 16.3 Competition Kinds of Organism Interactions 336
 - Competition 336
 - Competition and Natural Selection 336
 - Predation 337
 - Symbiotic Relationships 338
 - Parasitism 338
 - Special Kinds of Predation and Parasitism 340
 - Commensalism 340
 - Mutualism 341
- 16.4 Types of Communities 342
 - Temperate Deciduous Forest 342
 - Temperate Grassland (Prairie) 344
 - Savanna 344
 - Mediterranean Shrubland (Chaparral) 345
 - Tropical Dry Forest 345
 - Desert 346
 - Boreal Coniferous Forest 346
 - Temperate Rainforest 346
 - Tundra 348

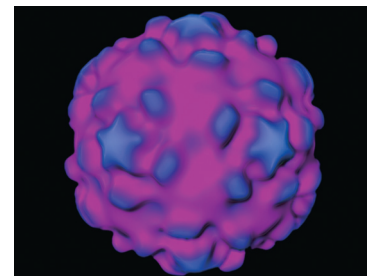

- Tropical Rainforest 346
- The Relationship Between Elevation and Climate 350
- 16.5 Major Aquatic Ecosystems 350
 - Marine Ecosystems 350
 - Freshwater Ecosystems 353
- 16.6 Succession 354
 - Primary Succession 355
 - Secondary Succession 355
 - Succession and Human Activity 357
- 16.7 The Impact of Human Actions on Communities 358
 - Introduced Species 358
 - Predator Control 358
 - Habitat Destruction 360
 - Pesticide Use 361
 - Biomagnification 362

17 Population Ecology 373

- 17.1 Population Characteristics 374
 - Gene Frequency and Gene Flow 374
 - Age Distribution 375
 - Sex Ratio 376
 - Population Distribution 376
 - Population Density 377
- 17.2 Reproductive Capacity 377
- 17.3 The Population Growth Curve 378
 - The Lag Phase 378
 - The Exponential Growth Phase 378
 - The Deceleration Phase 379
 - The Stable Equilibrium Phase 379
 - Alternate Population Growth Strategies 380
- 17.4 Limits to Population Size 380
 - Extrinsic and Intrinsic Limiting Factors 380
 - Density-Dependent and Density-Independent Limiting Factors 380
- 17.5 Categories of Limiting Factors 381
 - The Availability of Raw Materials 381
 - The Availability of Energy 381
 - The Accumulation of Waste Products 381
 - Interaction with Other Organisms 382
- 17.6 Carrying Capacity 382
- 17.7 Limiting Factors to Human Population Growth 383
 - Availability of Raw Materials 384
 - Available Energy 384
 - Accumulation of Wastes 386
 - Interaction with Other Organisms 387
- 17.8 The Control of the Human Population—a Social Problem 389

18 Evolutionary and Ecological Aspects of Behavior 393

- 18.1 Interpreting Behavior 394
 - Discovering the Significance of Behavior 394
 - Behavior Is Adaptive 394
- 18.2 The Problem of Anthropomorphism 394
- 18.3 Instinctive and Learned Behavior 395
 - The Nature of Instinctive Behavior 395
 - The Nature of Learned Behavior 398
- 18.4 Kinds of Learning 398
 - Habituation 398
 - Association 398
 - Exploratory Learning 400
 - Imprinting 400
 - Insight 401
- 18.5 Instinct and Learning in the Same Animal 402
- 18.6 Human Behavior 403
- 18.7 Selected Topics in Behavioral Ecology 405
 - Communication 405
 - Reproductive Behavior 406
 - Territorial Behavior 408
 - Dominance Hierarchy 409
 - Behavioral Adaptations to Seasonal Changes 410
 - Navigation and Migration 410
 - Social Behavior 411

PART V

The Origin and Classification of Life 417

19 The Origin of Life and the Evolution of Cells 417

- 19.1 Early Thoughts About the Origin of Life 418
- 19.2 Current Thinking About the Origin of Life 419
 - An Extraterrestrial Origin for Life on Earth 419
 - An Earth Origin for Life on Earth 420
- 19.3 The “Big Bang” and the Origin of the Earth 420

- 19.4 The Chemical Evolution of Life on Earth 422
 - The Formation of the First Organic Molecules 422
 - The Formation of Macromolecules 424
 - RNA May Have Been the First Genetic Material 424
 - The Development of Membranes 424
 - The Development of a Genetic System 425
 - The Development of Metabolic Pathways 425
- 19.5 Major Evolutionary Changes in Early Cellular Life 427
 - The Development of an Oxidizing Atmosphere 427
 - The Establishment of Three Major Domains of Life 427
 - The Origin of Eukaryotic Cells 428
 - The Development of Multicellular Organisms 431
- 19.6 The Geologic Time Line and the Evolution of Life 431

20 The Classification and Evolution of Organisms 437

- 20.1 The Classification of Organisms 438
 - The Problem with Common Names 438
 - Taxonomy 438
 - Phylogeny 441
- 20.2 A Brief Survey of the Domains of Life 444
 - The Domain Eubacteria 444
 - The Domain Archaea 444
 - The Domain Eucarya 446
- 20.3 Acellular Infectious Particles 451
 - Viruses 451
 - Viroids: Infectious RNA 454
 - Prions: Infectious Proteins 455

21 The Nature of Microorganisms 459

- 21.1 What Are Microorganisms? 460
- 21.2 The Domains Eubacteria and Archaea 460
 - The Domain Eubacteria 460
 - The Domain Archaea 465
- 21.3 The Kingdom Protista 468
 - Algae 469
 - Protozoa 472
 - Funguslike Protists 475
- 21.4 Multicellularity in the Protista 476
- 21.5 The Kingdom Fungi 476
 - The Taxonomy of Fungi 477
 - The Significance of Fungi 478

22 The Plant Kingdom 483

- 22.1 What Is a Plant? 484
- 22.2 Alternation of Generations 484
- 22.3 The Evolution of Plants 485
- 22.4 Nonvascular Plants 485
 - The Moss Life Cycle 485
 - Kinds of Nonvascular Plants 486
- 22.5 The Significance of Vascular Tissue 488
- 22.6 The Development of Roots, Stems, and Leaves 489
 - Roots 489
 - Stems 490
 - Leaves 491
- 22.7 Seedless Vascular Plants 492
 - The Fern Life Cycle 492
 - Kinds of Seedless Vascular Plants 494
- 22.8 Seed-Producing Vascular Plants 494
 - Gymnosperms 494
 - Angiosperms 498
- 22.9 The Growth of Woody Plants 501
- 22.10 Plant Responses to Their Environment 503
 - Tropisms 503
 - Seasonal Responses 504
 - Responses to Injury 504
- 22.11 The Coevolution of Plants and Animals 504

23 The Animal Kingdom 507

- 23.1 What Is an Animal? 508
- 23.2 The Evolution of Animals 509
- 23.3 Temperature Regulation 510
- 23.4 Body Plans 510
 - Symmetry 511
 - Embryonic Cell Layers 511
 - Body Cavities 511
 - Segmentation 512
 - Skeletons 513
- 23.5 Marine Lifestyles 514
 - Zooplankton 514
 - Nekton 514
 - Benthic Animals 514
- 23.6 Primitive Marine Animals 515
 - Porifera—Sponges 515
 - Cnidaria—Jellyfish, Corals, and Sea Anemones 515
 - Ctenophora—Comb Jellies 516

- 23.7 Platyhelminthes—Flatworms 517
- 23.8 Nematoda—Roundworms 520
- 23.9 Annelida—Segmented Worms 520
- 23.10 Mollusca 522
- 23.11 Arthropoda 523
- 23.12 Echinodermata 524
- 23.13 Chordata 525
- 23.14 Adaptations to Terrestrial Life 527
 - Terrestrial Arthropods 528
 - Terrestrial Vertebrates 530

PART VI

Physiological Processes 537

24 Materials Exchange in the Body 537

- 24.1 The Basic Principles of Materials Exchange 538
- 24.2 Circulation: The Cardiovascular System 538
 - The Nature of Blood 538
 - The Heart 540
 - Blood Vessels: Arteries, Veins, and Capillaries 543
- 24.3 The Lymphatic System 544
- 24.4 Gas Exchange: The Respiratory System 545
 - Breathing System Regulation 546
 - Lung Function 547
- 24.5 Obtaining Nutrients: The Digestive System 550
 - Mechanical and Chemical Processing 550
 - Nutrient Uptake 552
 - Chemical Alteration: The Role of the Liver 553
- 24.6 Waste Disposal: The Excretory System 554
 - Kidney Structure 554
 - Kidney Function 554

25 Nutrition: Food and Diet 561

- 25.1 Living Things as Chemical Factories: Matter and Energy Manipulators 562
- 25.2 The Kinds of Nutrients and Their Function 562
 - Carbohydrates 562

- Lipids 564
- Proteins 564
- Vitamins 565
- Minerals 565
- Water 565
- 25.3 Dietary Reference Intakes 568
- 25.4 The Food Guide Pyramid 568
 - Grains 568
 - Fruits 568
 - Vegetables 569
 - Milk 571
 - Meat and Beans 571
 - Oils 571
 - Exercise 572
- 25.5 Basal Metabolic Rate, Diet, and Weight Control 572
 - Basal Metabolic Rate (BMR) 572
 - Body Mass Index (BMI) 574
 - Weight Control 575
- 25.6 Eating Disorders 576
 - Obesity 576
 - Bulimia 576
 - Anorexia Nervosa 577
- 25.7 Deficiency Diseases 578
- 25.8 Nutrition Through the Life Cycle 579
 - Infancy 579
 - Childhood 579
 - Adolescence 580
 - Adulthood 581
 - Old Age 581
 - Pregnancy and Lactation 581
- 25.9 Nutrition for Fitness and Sports 582
 - Aerobic and Anaerobic Exercise 582
 - Diet and Training 583

26 The Body's Control Mechanisms and Immunity 587

- 26.1 Coordination in Multicellular Animals 588
- 26.2 Nervous System Function 589
 - The Structure of the Nervous System 589
 - The Nature of the Nerve Impulse 589
 - Activities at the Synapse 590
 - The Organization of the Central Nervous System 592
- 26.3 Endocrine System Function 593

- 26.4 The Integration of Nervous and Endocrine Function 596
- 26.5 Sensory Input 598
 - Chemical Detection 598
 - Vision 600
 - Hearing and Balance 601
 - Touch 602
- 26.6 Output Coordination 602
 - Muscular Contraction 602
 - The Types of Muscle 604
 - The Activities of Glands 605
 - Growth Responses 605
- 26.7 The Body's Defense Mechanisms—Immunity 606
 - Nonspecific Defenses 606
 - Specific Defenses 607
 - Allergic Reactions 610
 - Autoimmune and Immunodeficiency Diseases 610
- 27 Human Reproduction, Sex, and Sexuality 615**
- 27.1 Sexuality from Various Points of View 616
- 27.2 A Spectrum of Human Sexuality 616
 - Sexual Attraction, Sex, and Sexual Response 616
 - Moving Across the Spectrum 618
- 27.3 Chromosomal Determination of Sex and Early Development 619
 - Chromosomal Abnormalities and Sex 620
 - Fetal Development and Sex 620
- 27.4 The Sexual Maturation of Young Adults 622
 - The Maturation of Females 622
 - The Maturation of Males 623
- 27.5 Spermatogenesis 624
- 27.6 Oogenesis 625
- 27.7 The Hormonal Control of Fertility 630
- 27.8 Fertilization, Pregnancy, and Birth 630
 - Twins 632
 - Birth 633
- 27.9 Contraception 634
 - Chemical Methods 634
 - Hormonal Control Methods 634
 - The Timing Method 635
 - Barrier Methods 635
 - Surgical Methods 637
- 27.10 Termination of Pregnancy—Abortion 637
- 27.11 Changes in Sexual Function with Age 638
- Glossary 645
- Credits 667
- Index 669
