Preface ix

CHAPTER

1

What is Science? 1

Outline 1

- 1.1 Objects and Properties 2
 - 1.2 Quantifying Properties 4
 - 1.3 Measurement Systems 4
 - 1.4 Standard Units for the Metric System 5
 - Length 6
 - Mass 6
 - Time 6
 - 1.5 Metric Prefixes 6
 - 1.6 Understandings from Measurements 7
 - Data 7
 - Ratios and Generalizations 8
 - The Density Ratio 8
 - Symbols and Equations 10
 - 1.7 The Nature of Science 12
 - The Scientific Method 12
 - Explanations and Investigations 13
 - Scientific Laws 14
 - Models and Theories 15
 - 1.8 Science, Nonscience, And Pseudoscience 15
 - From Experimentation To Application 17
 - Science and Nonscience 17
 - Pseudoscience 18
- People Behind the Science: Florence Bascom** 20
- Limitations of Science 20

CHAPTER

2

Motion 24

Outline 24

- 2.1 Describing Motion 25
- 2.2 Measuring Motion 26
 - Speed 26
 - Velocity 27
 - Acceleration 28
- 2.3 Forces 29

- 2.4 Horizontal Motion On Land 31
- 2.5 Falling Objects 33
- A Closer Look: A Bicycle Racer's Edge** 33
- 2.6 Compound Motion 35
 - Vertical Projectiles 35
 - Horizontal Projectiles 35
- 2.7 Three Laws of Motion 36
 - Newton's First Law of Motion 37
 - Newton's Second Law of Motion 38
 - Weight and Mass 40
 - Newton's Third Law of Motion 41
- 2.8 Momentum 42
 - Conservation of Momentum 42
 - Impulse 43
- 2.9 Forces and Circular Motion 44
- 2.10 Newton's Law of Gravitation 45
- People Behind the Science: Isaac Newton** 47
 - Earth Satellites 48
 - Weightlessness 49
- A Closer Look: Gravity Problems** 49

CHAPTER

3

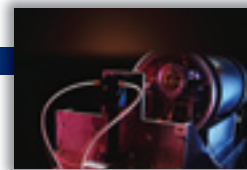

Energy 54

Outline 54

- 3.1 Work 55
 - Units of Work 56
- A Closer Look: Simple Machines** 57
 - Power 58
- 3.2 Motion, Position, and Energy 60
 - Potential Energy 60
 - Kinetic Energy 61
- 3.3 Energy Flow 62
 - Energy Forms 62
 - Energy Conversion 64
 - Energy Conservation 65
 - Energy Transfer 66
- 3.4 Energy Sources Today 66
 - Petroleum 67
 - Coal 67
- People Behind the Science: James Prescott Joule** 68
 - Moving Water 68
 - Nuclear 68
 - Conserving Energy 69
- 3.5 Energy Tomorrow 70
 - Solar Technologies 70
 - Geothermal Energy 71
 - Hydrogen 71

CHAPTER

4

Heat and Temperature 75

Outline 75

- 4.1 The Kinetic Molecular Theory 76
 - Molecules 77
 - Molecules Interact 77
 - Phases of Matter 77
 - Molecules Move 78
- 4.2 Temperature 79
 - Thermometers 79
 - Thermometer Scales 80
- 4.3 Heat 82
 - Heat As Energy Transfer 83
 - Measures of Heat 83
 - Specific Heat 84
 - Heat Flow 86
- 4.4 Energy, Heat, and Molecular Theory 88
- A Closer Look: Passive Solar Design** 88
 - Phase Change 89
 - Evaporation and Condensation 92
 - Relative Humidity 93
- 4.5 Thermodynamics 94
 - The First Law of Thermodynamics 95
 - The Second Law of Thermodynamics 95
 - The Second Law and Natural Processes 96
- People Behind the Science: Count Rumford (Benjamin Thompson)** 98

CHAPTER

5

Wave Motions and Sound 103

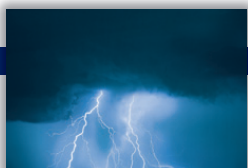

Outline 103

- 5.1 Forces and Elastic Materials 104
 - Forces and Vibrations 104
 - Describing Vibrations 105
- 5.2 Waves 106
 - Kinds of Waves 107
 - Waves In Air 107
 - Hearing Waves In Air 108
- 5.3 Describing Waves 110
- 5.4 Sound Waves 111
 - Velocity of Sound In Air 111

- A Closer Look: Hearing Problems** 111
 Refraction and Reflection 112
 Interference 114
 5.5 Energy and Sound 115
 Loudness 115
 Resonance 116
 5.6 Sources of Sounds 117
 Vibrating Strings 118
 Sounds from Moving Sources 119
People Behind the Science: Johann Christian Doppler 119

CHAPTER

6

Electricity 125

Outline 125

- 6.1 Electric Charge 126
 Measuring Electric Charge 128
 Measuring Electric Force 128
 6.2 Electric Current 129
 Resistance 130
A Closer Look: Hydrogen and Fuel Cells 131
 AC and DC 132
 6.3 The Electric Circuit 132
People Behind the Science: Benjamin Franklin (1706–1790) 133
 6.4 Electric Power and Work 134
A Closer Look: Household Circuits and Safety 136
 6.5 Magnetism 137
 Moving Charges and Magnetic Fields 140
 Magnetic Fields Interact 141
 A Moving Magnet Produces an Electric Field 142
A Closer Look: Solar Cells 147

CHAPTER

7

Light 152

Outline 152

- 7.1 Sources of Light 153
 7.2 Properties of Light 156
 Light Interacts With Matter 156
 Reflection 157
 Refraction 158
A Closer Look: Optics 161
 Dispersion and Color 163
 7.3 Evidence for Waves 164
 Interference 164
 Polarization 165
A Closer Look: The Rainbow 167

- 7.4 Evidence for Particles 168
 Photoelectric Effect 168
 Quantization of Energy 169
 7.5 The Present Theory 170
 7.6 Relativity 170
A Closer Look: The Compact Disc (CD) 171
 Special Relativity 172
 General Relativity 172
 Relativity Theory Applied 173
People Behind the Science: James Clerk Maxwell 173

CHAPTER

8

Atoms and Periodic Properties 178

Outline 178

- 8.1 Atomic Structure Discovered 179
 Discovery of the Electron 180
 The Nucleus 181
 8.2 The Bohr Model 183
 The Quantum Concept 183
 Atomic Spectra 183
 Bohr's Theory 184
 8.3 Quantum Mechanics 186
 8.4 The Periodic Table 188
 8.5 Metals, Nonmetals, and Semiconductors 190
A Closer Look: The Rare Earths 191
People Behind the Science: Dmitri Ivanovich 193

CHAPTER

9

Chemical Reactions 197

Outline 197

- 9.1 Compounds 198
 9.2 Elements 200
 9.3 Chemical Change 200
 9.4 Valence Electrons and Ions 202
 9.5 Chemical Bonds 203
 Ionic Bonds 204
 Covalent Bonds 205
A Closer Look: Name That Compound 208
 9.6 Composition of Compounds 209
 9.7 Chemical Equations 210
A Closer Look: How to Write a Chemical Formula 211
A Closer Look: On Balancing Equations 213
 9.8 Types of Chemical Reactions 214
 Combination Reactions 215

- Decomposition Reactions 215
 Replacement Reactions 216
 Ion Exchange Reactions 216
People Behind the Science: Linus Carl Pauling 218

CHAPTER

10

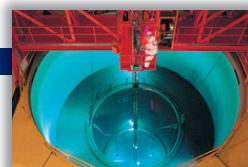

Water and Solutions 223

Outline 223

- 10.1 Household Water 224
 10.2 Properties of Water 225
 Structure of the Water Molecule 226
 The Dissolving Process 227
A Closer Look: Decompression Sickness 228
 Solubility 228
 10.3 Properties of Water Solutions 229
 Electrolytes 229
 Boiling Point 230
 Freezing Point 231
 10.4 Acids, Bases, and Salts 231
 Properties of Acids and Bases 232
 Explaining Acid-Base Properties 233
 Strong and Weak Acids and Bases 234
 The pH Scale 234
 Properties of Salts 235
 Hard and Soft Water 235
A Closer Look: Acid Rain 237
People Behind the Science: Johannes Nicolaus Brønsted 238

CHAPTER

11

Nuclear Reactions 241

Outline 241

- 11.1 Natural Radioactivity 242
 Nuclear Equations 243
 The Nature of the Nucleus 244
 Types of Radioactive Decay 246
 Radioactive Decay Series 247
 11.2 Measurement of Radiation 249
A Closer Look: How is Half-Life Determined? 249
 Measurement Methods 250
 Radiation Units 250
 Radiation Exposure 251
 11.3 Nuclear Energy 251
 Nuclear Fission 252

- Nuclear Power Plants 253
- Nuclear Fusion 256

A Closer Look: *Three Mile Island, Chernobyl, and Fukushima I* 257

A Closer Look: *Nuclear Waste* 259

People Behind the Science: *Marie Curie* 260

CHAPTER 12

The Universe 265

Outline 265

- 12.1 The Night Sky 266
- 12.2 Origin of Stars 267
- 12.3 Brightness of Stars 268
- 12.4 Star Temperature 268
- 12.5 Star Types 269
- 12.6 The Life of A Star 271
- 12.7 Galaxies 273

- The Milky Way Galaxy 274
- Other Galaxies 274
- The Life of A Galaxy 276

A Closer Look: *Extraterrestrials?* 277

A Closer Look: *Redshift and Hubble's Law* 278

A Closer Look: *Dark Matter* 279

People Behind the Science: *Jocelyn (Susan) Bell Burnell* 281

CHAPTER 13

The Solar System 285

Outline 285

- 13.1 Planets, Moons, and Other Bodies 286
 - Mercury 287
 - Venus 289
 - Earth's Moon 290
 - Mars 292
 - Jupiter 294
- A Closer Look:** *Planets and Astrology* 295
 - Saturn 297
 - Uranus and Neptune 299
- 13.2 Small Bodies of the Solar System 300
 - Comets 300
 - Asteroids 301
 - Meteors and Meteorites 302
- 13.3 Origin of the Solar System 303
 - Stage A 304
 - Stage B 304
 - Stage C 304

People Behind the Science: *Percival Lowell* 305

CHAPTER 14

Earth In Space 308

Outline 308

- 14.1 Shape and Size of Earth 309
- 14.2 Motions of Earth 311
- A Closer Look:** *The Celestial Sphere* 311
 - Revolution 312
 - Rotation 313
 - Precession 314
- 14.3 Place and Time 315
 - Identifying Place 315
 - Measuring Time 316
- 14.4 The Earth-Moon System 321
 - Phases of the Moon 322
 - Eclipses of the Sun and Moon 323
 - Tides 324

People Behind the Science: *Carl Edward Sagan* 325

CHAPTER 15

Earth 329

Outline 329

- 15.1 Earth Materials 330
 - Minerals 330
 - Rocks 333
- A Closer Look:** *Asbestos* 334
 - The Rock Cycle 337
- 15.2 Earth's Interior 337
 - The Crust 338
 - The Mantle 338
 - The Core 339
 - A More Detailed Structure 340
- 15.3 Plate Tectonics 340
 - Evidence from Earth's Magnetic Field 341
 - Evidence from the Ocean 341
 - Lithosphere Plates and Boundaries 343
 - Present-Day Understandings 345
- A Closer Look:** *Seismic Tomography* 346
- A Closer Look:** *Measuring Plate Movement* 346
- People Behind the Science:** *Frederick John Vine* 348

CHAPTER 16

Earth's Surface 351

Outline 351

- 16.1 Interpreting Earth's Surface 352
- 16.2 Processes That Build Up the Surface 353
 - Stress and Strain 353
 - Folding 354
 - Faulting 356
- 16.3 Earthquakes 357
- A Closer Look:** *Some Recent Earthquakes* 360
- 16.4 Origin of Mountains 360
- A Closer Look:** *Volcanoes Change the World* 361
- 16.5 Processes That Tear Down the Surface 363
 - Weathering 363
 - Erosion 366
- People Behind the Science:** *James Hutton* 371

CHAPTER 17

Earth's Weather 375

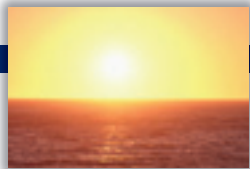

Outline 375

- 17.1 The Atmosphere 376
 - Composition of the Atmosphere 377
 - Atmospheric Pressure 378
 - Warming the Atmosphere 379
 - Structure of the Atmosphere 379
- A Closer Look:** *Hole In the Ozone Layer?* 380
- 17.2 The Winds 381
 - Local Wind Patterns 381
- A Closer Look:** *The Wind Chill Factor* 382
 - Global Wind Patterns 383
- 17.3 Water and the Atmosphere 385
 - Evaporation and Condensation 385
 - Fog and Clouds 388
 - Precipitation 391
- 17.4 Weather Producers 391
 - Air Masses 392
 - Weather Fronts 393
 - Waves and Cyclones 395
 - Major Storms 396
- 17.5 Weather Forecasting 400
- 17.6 Climate 401
 - Major Climate Groups 401
- A Closer Look:** *El Niño and La Niña* 404
 - Regional Climatic Influence 405
- People Behind the Science:** *Vilhelm Firman Koren Bjerknes* 406

Climate Change 406
Causes of Global Climate Change 407
Global Warming 409

CHAPTER

18

Earth's Waters 413

Outline 413

18.1 Water On Earth 414
Freshwater 415
Surface Water 416
Groundwater 417
Freshwater As A Resource 417

18.2 Seawater 419

A Closer Look *Wastewater Treatment* 420
Oceans and Seas 421

The Nature of Seawater 422
Movement of Seawater 424

A Closer Look: *Rogue Waves* 427

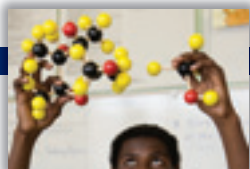

18.3 The Ocean Floor 429

A Closer Look: *Key Forecasting Tool for the Chesapeake Bay* 430

People Behind the Science: *Rachel Louise Carson* 431

CHAPTER

19

Organic and Biochemistry 434

Outline 434

Part I the Nature of Organic Compounds 436

19.1 Organic Chemistry 436

19.2 Hydrocarbons 436

People Behind the Science: *Roy J. Plunkett* 437

Hydrocarbons With Double Or Triple Bonds 438
Hydrocarbons That Form Rings 439

19.3 Petroleum 439

19.4 Hydrocarbon Derivatives 441

Functional Groups Generate Variety 442

19.5 Synthetic Polymers 446

A Closer Look: *Nonpersistent and Persistent Organic Pollutants* 448

Part II Organic Compounds of Life 449

19.6 Organisms and Their Macromolecules 449

Carbohydrates 449

Proteins 451

A Closer Look: *So You Don't Eat Meat! How To Stay Healthy* 451

Nucleic Acids 454

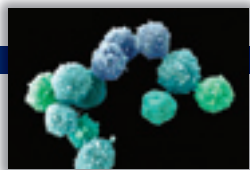

Lipids 456

A Closer Look: *Omega Fatty Acids and Your Diet* 459

A Closer Look: *Fat and Your Diet* 460

CHAPTER

20

The Nature of Living Things 464

Outline 464

Part I the Characteristics of Life 465

20.1 What Makes Something Alive? 465

20.2 The Cell Theory 467

20.3 Cell Membranes 470

People Behind the Science: *Matthias Jakob Schleiden and Theodor Schwann* 470

20.4 Getting Through Membranes 472

Diffusion 472

Osmosis 473

Controlled Methods of Transporting Molecules 475

20.5 Organelles Composed of

Membranes 478

20.6 Nonmembranous Organelles 481

20.7 Nuclear Components 482

20.8 Major Cell Types 482

The Prokaryotic Cell Structure 482

The Eukaryotic Cell Structure 483

A Closer Look: *How We Are Related* 483

A Closer Look: *Antibiotics and Cell Structural Differences* 484

Part II Energy Transformations in Cells 484

20.9 Respiration and Photosynthesis 484

The Energy Transfer Molecules of Living Things—Atp 485

Aerobic Cellular Respiration 486

Photosynthesis 487

Part III Cellular Reproduction 489

20.10 The Importance of Cell Division 489

A Closer Look: *Stem Cells* 489

20.11 The Cell Cycle 490

20.12 The Stages of Mitosis 490

Prophase 490

Metaphase 491

Anaphase 491

Telophase 492

CHAPTER

21

The Origin and Evolution of Life 496

Outline 496

Part I How Did Life Originate? 498

21.1 Early Attempts To Understand the Origin of Life 498

21.2 Current Thinking About the Origin of Life 499

Extraterrestrial Or Earth Origin? 499

Meeting Metabolic Needs 500

Summary of Ideas About the Origin of Life 501

21.3 Major Events In the Early Evolution of Living Things 502

Reproduction and the Origin of Genetic Material 502

The Development of an Oxidizing Atmosphere 502

The Establishment of Three Major Domains of Life 503

The Endosymbiotic Theory and the Origin of Eukaryotic Cells 503

A Summary of the Early Evolution of Life 504

Part II The Process of Evolution 504

21.4 The Development of Evolutionary Thought 504

21.5 Evolution and Natural Selection 506

Defining Evolution 506

The Role of the Environment In

Evolution 506

Natural Selection Leads To

Evolution 507

21.6 Genetic Diversity is Important for Natural Selection 507

A Closer Look *The Voyage of HMS Beagle, 1831–1836* 508

Genetic Diversity Resulting from

Mutation 509

Genetic Diversity Resulting from Sexual Reproduction 509

21.7 Processes That Drive Natural Selection 510

Differential Survival 510

Differential Reproductive Rates 511

Differential Mate Selection 512

21.8 Acquired Characteristics Do Not Influence Natural Selection 512

21.9 The Hardy-Weinberg Concept 513

21.10 Accumulating Evidence of Evolution 513

Part III Speciation 515

21.11 Species: A Working Definition 515

A Closer Look: *The Reemerging of Infectious Diseases* 515

- 21.12 How New Species Originate 518
A Closer Look: Human-Designed Organisms 518
 The Role of Geographic Isolation In Speciation 519
A Closer Look: Other Mechanisms That Cause Evolution 519
People Behind the Science: Ernst Mayr 520
 The Role of Natural Selection In Speciation 520
 Reproductive Isolation 521
 Speciation Without Isolation 521
 21.13 The Tentative Nature of the Evolutionary History of Organisms 521

CHAPTER

22

The History of Life On Earth 525

- Outline** 525
Part I Kinds of Organisms 526
 22.1 The Classification of Organisms 526
 The Problem With Common Names 526
 Taxonomy 527
 Phylogeny 528
 22.2 A Brief Survey of Biodiversity 531
 Domains Bacteria and Archaea 531
A Closer Look: Cladistics—A Tool for Taxonomy and Phylogeny 533
 Domain Eucarya 534
A Closer Look: The World's Oldest and Largest Living Organisms 538
People Behind the Science: Lynn (Alexander) Margulis 539
 22.3 Acellular Infectious Particles 539
 Viruses 539
 Viroids: Infectious RNA 540
 Prions: Infectious Proteins 540
Part II The Geologic History of Earth 541
 22.4 Geologic Time 541
 Early Attempts At Earth Dating 541
 Modern Techniques for Determining the Age of Earth 541
 Interpreting the Geologic Record 542
 22.5 Geologic Time and the Fossil Record 543
 Early Ideas About Fossils 543
 Types of Fossils 545
A Closer Look: What is Carbon-14 Dating? 547
 Using Fossils To Determine the Order of Geologic Events 548
 The Geologic Time Scale 549

- 22.6 Paleontology, Archaeology, and Human Evolution 553
A Closer Look: Another Piece of the Human Evolution Puzzle Unearthed? 555
 Ardipithecus and Other Early Hominins 556
 The Genera *Australopithecus* and *Paranthropus* 557
 The Genus *Homo* 557
 Where Did It All Start? 557

CHAPTER

23

Ecology and Environment 562

- Outline** 562
 23.1 A Definition of Environment 563
 23.2 The Organization of Ecological Systems 564
People Behind the Science: Dr. Jane Lubchenco 565
 23.3 Energy Flow In Ecosystems 566
 23.4 Community Interactions 568
 23.5 Types of Terrestrial Communities 569
 Temperate Deciduous Forest 570
 Temperate Grassland Or Prairie 570
 Savanna 570
 Desert 570
 Boreal Coniferous Forest 571
 Mediterranean Shrublands (Chaparral) 571
 Temperate Rainforest 571
 Tundra 572
 Tropical Rainforest 572
 Tropical Dry Forest 572
 23.6 Types of Aquatic Communities 572
 Marine Communities 573
 Freshwater Communities 573
 Estuaries 574
 23.7 Individual Species Requirements: Habitat and Niche 575
 Habitat 575
 Niche 575
A Closer Look: The Importance of Habitat Size 575
A Closer Look: Alien Invasion 576
 23.8 Kinds of Organism Interactions 577
 Predation 577
 Parasitism 577
 Commensalism 579
 Mutualism 579
 Competition 580
 Competition and Natural Selection 580
 23.9 The Cycling of Materials In Ecosystems 581
 The Carbon Cycle 581
 The Nitrogen Cycle 581

- The Phosphorus Cycle 582
 Nutrient Cycles and Geologic Time 584
 Bioaccumulation and Biomagnification 584
A Closer Look: Scientists Accumulate Knowledge About Climate Change 585
 23.10 Population Characteristics 586
 Genetic Differences 586
 Age Structure 586
 Sex Ratio 589
 Population Density 589
 23.11 The Population Growth Curve 589
 23.12 Population-Size Limitations 590
 23.13 Limiting Factors To Human Population Growth 591
 23.14 Human Population Growth and the Global Ecosystem 592

CHAPTER

24

Human Biology: Materials Exchange and Control Mechanisms 597

- Outline** 597
 24.1 Homeostasis 598
 24.2 Exchanging Materials: Basic Principles 598
 24.3 Transporting Materials: the Circulatory System 599
 The Nature of Blood 599
 The Heart 600
 Arteries, Veins, and Capillaries 602
 24.4 Skin: the Body's Container 604
 Primary Functions of the Skin 604
 The Structure of the Skin 605
 Other Features of the Skin 605
 24.5 Exchanging Gases: the Respiratory System 606
 Structure and Function of Lungs 606
 The Mechanism of Breathing 607
A Closer Look: Cigarette Smoking and Your Health 607
 Homeostasis and Breathing 608
 24.6 Obtaining Nutrients: the Digestive System 608
 Processing Food 608
People Behind the Science: Henry Molaison and William Beecher Scoville 609
 Nutrient Uptake 610
 24.7 Nutrition 610
 Kinds of Nutrients 610
 Guidelines for Obtaining Adequate Nutrients 612
A Closer Look: Body Mass Index 614
A Closer Look: The Dynamic Skeleton 617

Your Health and Body Weight 618

A Closer Look: Exercise: More Than Just Maintaining Your Weight 620

24.8 Waste Disposal: the Excretory System 621

24.9 Control Mechanisms 622

The Structure of the Nervous System 623

The Nature of the Nerve Impulse 623

Activities At the Synapse 625

Endocrine System Function 625

24.10 Sensory Input 626

Chemical Detection 626

Light Detection 627

Sound Detection 628

Touch 629

24.11 Output Mechanisms 629

Muscles 629

Glands 630

Growth Responses 630

A Closer Look: Which Type of Exercise Do You Do? 631

CHAPTER

25

Human Biology: Reproduction 635

Outline 635

25.1 Sexual Reproduction 636

25.2 The Mechanics of Meiosis 638

25.3 Human Sexuality from Different Points of View 639

A Closer Look The Sexuality Spectrum 640

25.4 Chromosomal Determination of Sex and Early Development 641

Chromosomal Abnormalities and Sexual Development 641

A Closer Look: Karyotyping and Down Syndrome 642

Fetal Sexual Development 643

A Closer Look: Cryptorchidism—Hidden Testes 644

25.5 Sexual Maturation of Young Adults 644

The Maturation of Females 646

The Maturation of Males 646

25.6 Spermatogenesis 647

25.7 Oogenesis 649

Hormonal Control of Female Sexual Cycles 651

25.8 Hormonal Control of Fertility 651

25.9 Fertilization, Pregnancy, and Birth 651

Twins 654

People Behind the Science: Robert Geoffrey Edwards and Patrick Christopher Steptoe 655

Birth 655

25.10 Contraception 657

Chemical Methods 657

Hormonal Control Methods 657

Timing Method 658

Barrier Methods 658

A Closer Look: Sexually Transmitted Diseases 659

Surgical Methods 660

25.11 Termination of Pregnancy 661

25.12 Changes In Sexual Function With Age 661

CHAPTER

26

Mendelian and Molecular Genetics 665

Part I Mendelian Genetics Updated 666

26.1 Genetics, Meiosis, and Cells 666

26.2 Single-Gene Inheritance Patterns 667

26.3 A Simple Model of Inheritance—Dominant and Recessive Alleles 668

A Closer Look: Geneticists Hard at Work 668

26.4 Mendel's Laws of Heredity 669

People Behind the Science: Gregor Johann Mendel 670

26.5 Steps In Solving Heredity Problems: Single-Factor Crosses 670

A Closer Look: Muscular Dystrophy and Genetics 671

26.6 More Complex Models of Inheritance 672

X-Linked Genes 672

Codominance 672

Incomplete Dominance 672

Multiple Alleles 673

A Closer Look: Blame That Trait On Your Mother! 673

Polygenic Inheritance 674

Pleiotropy 674

Environmental Influences On Gene Expression 676

Epigenetics and Gene Expression 677

Part II the Molecular Basis of Genetics 678

26.7 The Central Dogma 678

The Structure of DNA and RNA 678

DNA Replication 679

DNA Transcription 682

A Closer Look: Basic Steps of Translation 683

Translation Or Protein Synthesis 685

Alterations of DNA 686

26.8 Using DNA To Our Advantage 686

Strategy One: Genetic Modification of Organisms 686

Strategy Two: Sequencing 689

APPENDIX A Mathematical Review 698

A.1 Working With Equations 698

A.2 Significant Figures 700

A.3 Conversion of Units 701

A.4 Scientific Notation 702

APPENDIX B Solubilities Chart 704

APPENDIX C Relative Humidity Table

APPENDIX D Problem Solving 706

Example Problem 707

Solution 707

Tips On Taking A Multiple-Choice Exam 707

APPENDIX E Solutions for Second Example Exercises 708
