About the Author iii
Preface xi
Applying Human Genetics xiv
The Human Touch xv
The Lewis Guided Learning System xvi

PART 1 Introduction 1

CHAPTER 1 Overview of Genetics 1

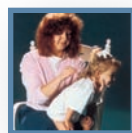

- 1.1 **Introducing Genes 2**
- 1.2 **Levels of Genetics 4**
- 1.3 **Genes and Their Environment 8**
- 1.4 **Applications of Genetics 9**

CHAPTER 2 Cells 18

- 2.1 **Introducing Cells 19**
- 2.2 **Cell Components 19**
- 2.3 **Cell Division and Death 30**
- 2.4 **Cell-Cell Interactions 35**
- 2.5 **Stem Cells 36**

PART 2 Transmission Genetics 69

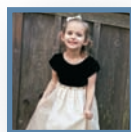

CHAPTER 4 Single-Gene Inheritance 69

- 4.1 **Following the Inheritance of One Gene 70**
- 4.2 **Single-Gene Inheritance Is Rare 73**
- 4.3 **Following the Inheritance of More Than One Gene 79**
- 4.4 **Pedigree Analysis 82**
- 4.5 **Family Genome Analysis 84**

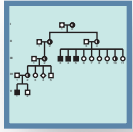

CHAPTER 3 Meiosis and Development 44

- 3.1 **The Reproductive System 45**
- 3.2 **Meiosis 46**
- 3.3 **Gamete Maturation 49**
- 3.4 **Prenatal Development 53**
- 3.5 **Birth Defects 60**
- 3.6 **Maturation and Aging 62**

CHAPTER 5 Beyond Mendel's Laws 89

- 5.1 **A New View of Mendelian Genetics 90**
- 5.2 **When Gene Expression Appears to Alter Mendelian Ratios 90**
- 5.3 **Mitochondrial Genes 98**
- 5.4 **Linkage 101**

CHAPTER 6 Matters of Sex 110

- 6.1 Our Sexual Selves 111
- 6.2 Traits Inherited on Sex Chromosomes 116
- 6.3 Sex-Limited and Sex-Influenced Traits 121
- 6.4 X Inactivation 122
- 6.5 Genomic Imprinting 124

CHAPTER 7 Multifactorial Traits 131

- 7.1 Genes and the Environment Mold Traits 132
- 7.2 Polygenic Traits Are Continuously Varying 132
- 7.3 Traditional Ways to Investigate Multifactorial Traits 137
- 7.4 Genome-Wide Association Studies 141
- 7.5 A Closer Look: Body Weight 144

CHAPTER 8 Genetics of Behavior 149

- 8.1 Genes and Behavior 150
- 8.2 Eating Disorders 151
- 8.3 Sleep 152
- 8.4 Intelligence 153
- 8.5 Drug Addiction 154
- 8.6 Mood Disorders 156
- 8.7 Schizophrenia 157
- 8.8 Autism 159
- 8.9 How Are Behavioral Disorders Related? 160

PART 3 DNA and Chromosomes 164

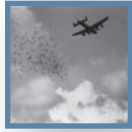

CHAPTER 9 DNA Structure and Replication 164

- 9.1 Experiments Identify and Describe the Genetic Material 165
- 9.2 DNA Structure 169
- 9.3 DNA Replication—Maintaining Genetic Information 171

CHAPTER 10 Gene Action: From DNA to Protein 179

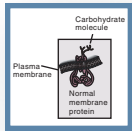

- 10.1 From DNA to Protein 180
- 10.2 Transcription 180
- 10.3 Translation of a Protein 185
- 10.4 Processing a Protein 191

CHAPTER 11

Gene Expression and Epigenetics 199

- 11.1 Gene Expression Through Time and Tissue 200
- 11.2 Control of Gene Expression 203
- 11.3 Maximizing Genetic Information 205
- 11.4 Most of the Human Genome Does *Not* Encode Protein 207

CHAPTER 12

Gene Mutation 211

- 12.1 The Nature of Mutations 212
- 12.2 Two Mutations 212
- 12.3 Causes of Mutation 216
- 12.4 Types of Mutations 219
- 12.5 The Importance of Position 225
- 12.6 DNA Repair 227

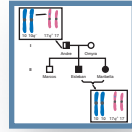

PART 4 Population Genetics 260

CHAPTER 14

Constant Allele Frequencies 260

- 14.1 Population Genetics Underlies Evolution 261
- 14.2 Constant Allele Frequencies 262
- 14.3 Applying Hardy-Weinberg Equilibrium 264
- 14.4 DNA Profiling Uses Hardy-Weinberg Assumptions 265

CHAPTER 13

Chromosomes 235

- 13.1 Portrait of a Chromosome 236
- 13.2 Visualizing Chromosomes 238
- 13.3 Atypical Chromosome Number 243
- 13.4 Atypical Chromosome Structure 250
- 13.5 Uniparental Disomy—A Double Dose from One Parent 255

CHAPTER 15

Changing Allele Frequencies 278

- 15.1 Nonrandom Mating 279
- 15.2 Migration 280
- 15.3 Genetic Drift 282
- 15.4 Mutation 285
- 15.5 Natural Selection 286
- 15.6 Putting It All Together: PKU 292
- 15.7 Eugenics 294

CHAPTER 16

Human Ancestry 301

- 16.1 Human Origins 302
- 16.2 Molecular Evolution 310
- 16.3 The Peopling of the Planet 317

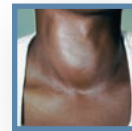

PART 5 Immunity and Cancer 325

CHAPTER 17

Genetics of Immunity 325

- 17.1 The Importance of Cell Surfaces 326
- 17.2 The Human Immune System 328
- 17.3 Abnormal Immunity 333
- 17.4 Altering Immunity 340
- 17.5 A Genomic View of Immunity—The Pathogen's Perspective 344

CHAPTER 18

Genetics of Cancer 348

- 18.1 Cancer Is Genetic, But Usually Not Inherited 349
- 18.2 Characteristics of Cancer Cells 352
- 18.3 Origins of Cancer Cells 354
- 18.4 Cancer Genes and MicroRNAs 356
- 18.5 Many Genes Contribute to Cancer 362
- 18.6 Environmental Causes of Cancer 364
- 18.7 The Personalization of Cancer Diagnosis and Treatment 366

PART 6 Genetic Technology 371

CHAPTER 19

Genetic Technologies: Amplifying, Modifying, and Monitoring DNA 371

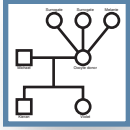

- 19.1 Patenting DNA 372
- 19.2 Amplifying DNA 373
- 19.3 Modifying DNA 375
- 19.4 Monitoring Gene Function 382
- 19.5 Silencing DNA 382

CHAPTER 20

Genetic Testing and Treatment 388

- 20.1 Genetic Counseling 389
- 20.2 Genetic Testing 391
- 20.3 Treating Genetic Disease 395

CHAPTER 21

Reproductive Technologies 406

- 21.1 Savior Siblings and More 407**
- 21.2 Infertility and Subfertility 407**
- 21.3 Assisted Reproductive Technologies 410**
- 21.4 Extra Embryos 417**

CHAPTER 22

Genomics 423

- 22.1 From Genetics to Genomics 424**
- 22.2 DNA Sequencing and Genome Synthesis 428**
- 22.3 Ways of Looking at Genomes 430**
- 22.4 Personal Genome Sequencing 434**
