Part 1 Introduction	1
Chapter 1 Economics and the economy	3
1.1 Economic issues	4
1..2 Scarcity and th competing use of resources	7
1.3 The role of the market	9
1.4 Positive and normative	11
1.5 Micro and macro	12
Summary	14
Review questions	14
Chapter 2 Tools of economic analysis	17
2.1 Economic data	18
2.2 Index numbers	19
2.3 Nominal and real variables	21
2.4 Measuring changes in economic variables	22
2.5 Economic models	23
2.6 Models and data	24
2.7 Diagrams, lines, and equations	25
2.8 Another look at 'other things equal'	28
2.9 Theories and evidence	28
2.10 Some popular criticisms of economics and economists	29
Summary	31
Review questions	31
Chapter 3 Demand, supply, and the market	33
3.1 The market	33
3.2 Demand, supply, and equilibrium	34
3.3 Demand and supply curves	35
3.4 Behind the demand curve	36
3.5 Shyifts in the demand curve	38
3.6 Behind the supply curve	39
3.7 Shifts in the supply curve	41
3.8 Free markets and price controls	41
3.9 What, how, and for whom	44
Summary	45
Review questions	96

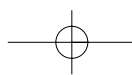

Part 2 Positive microeconomics	49
Chapter 4 Elasticities of demand and supply	51
4.1 The price responsiveness of demand	51
4.2 Price, quantity demanded, and total expenditure	56
4.3 Further examples of demand elasticity	58
4.4 Short run and long run	59
4.5 The cross price elasticity of demand	60
4.6 The effect of income on demand	61
4.7 Inflation and demand	64
4.8 Elasticity of supply	64
4.9 Who really pays the tax?	65
Summary	67
Review questions	68
Chapter 5 Consumer choice and demand decisions	69
5.1 Demand by a single consumer	69
5.2 Adjustment to income changes	77
5.3 Adjustment to price changes	78
5.4 The market demand curve	84
5.5 Complements and substitutes	85
5.6 Transfers in kind	85
Summary	86
Review questions	87
Appendix: Consumer choice with measurable utility	85
Chapter 6 Introducing supply decisions	91
6.1 Business organization	91
6.2 A firm's accounts	92
6.3 Firms and profit maximization	96
6.4 Corporate finance and corporate control	97
6.5 The firm's supply decision	99
6.6 Marginal cost and marginal revenue	100
6.7 Marginal cost and marginal revenue curves	104
Summary	106
Review questions	107
Chapter 7 Costs and supply	109
7.1 Input and output	109
7.2 Costs and the choice of technique	110
7.3 Long-run total, marginal, and average costs	112
7.4 Returns to scale	113
7.5 Average cost and marginal cost	117
7.6 The firm's long-run output decision	118
7.7 Short-run costs and diminishing marginal returns	119
7.8 A firm's output decision in the short run	124
7.9 Short-run and long-run costs	125
Summary	126
Review questions	127

Chapter 8 Perfect competition and pure monopoly	129
8.1 Perfect competition	130
8.2 A perfectly competitive firm's supply decision	131
8.3 Industry supply curves	134
8.4 Comparative statics for a competitive industry	137
8.5 Global competition	139
8.6 Pure monopoly: the opposite limiting case	141
8.7 Profit-maximizing output for a monopolist	141
8.8 Output and price under monopoly and competition	144
8.9 a monopoly has no supply curve	146
8.10 Monopoly and technical change	149
Summary	150
Review questions	151
Chapter 9 Market structure and imperfect competition	152
9.1 Why market structures differ	153
9.2 Monopolistic competition	156
9.3 Oligopoly and interdependence	158
9.4 Game theory and interdependent decisions	160
9.5 Reaction functions	162
9.6 Entry and potential competition	166
9.7 Strategic entry deterrence	167
9.8 Summing up	169
Summary	170
Review questions	171
Chapter 10 The labour market	172
10.1 The firm's demand for factors in the long run	173
10.2 The firm's demand for labour in the short run	174
10.3 The industry demand curve for labour	179
10.4 The supply of labour	180
10.5 Industry labour market equilibrium	184
10.6 Transfer earnings and economic rent	186
10.7 Do labour markets clear?	187
10.8 UK wages and employment	190
Summary	191
Review questions	192
Appendix: Isoquants and the choice of production technique	193
Chapter 11 Different types of labour	196
11.1 Productivity differences	197
11.2 Discrimination	203
11.3 Trade unions	206
Summary	210
Review questions	211
Chapter 12 Factor markets and income distribution	213
12.1 Physical capital	214
12.2 Rentals, interest rates, and asset prices	215

12.3	Saving, investment, and the real interest rate	220
12.4	The demand for capital services	221
12.5	The supply of capital services	222
12.6	Equilibrium and adjustment in the market for capital services	224
12.7	The price of capital assets	226
12.8	Land and rents	227
12.9	Allocating a fixed land supply between competing uses	228
12.10	The facts again	230
12.11	Income distribution in the UK	230
	Summary	233
	Review questions	234
	Appendix: The simple algebra of present values and discounting	235
Chapter 13 Risk and information		236
13.1	Individual attitudes to risk	236
13.2	Insurance and risk	238
13.3	Uncertainty and asset returns	241
13.4	Portfolio selection	243
13.5	Efficient asset markets	248
13.6	More on risk	251
	Summary	253
	Review questions	254
Chapter 14 The information economy		256
14.1	E-products	256
14.2	Consuming information	257
14.3	Distributors of information	262
14.4	Setting standards	265
14.5	Recap	266
14.6	Boo m and bust of the dot.com companies	266
	Summary	269
	Review questions	270
Part 3 Welfare economics		273
Chapter 15 Welfare economics		275
15.1	Equity and efficiency	275
15.2	Perfect competition and Pareto efficiency	277
15.3	Distortions and the second best	280
15.4	Market failure	282
15.5	Externalities	283
15.6	Environmental issues	287
15.7	Other missing markets: time and risk	290
15.8	Quality, health, and safety	291
	Summary	292
	Review questions	294

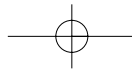

Chapter 16 Government spending and revenue	296
16.1 Taxation and government spending	298
16.2 The government in the market economy	299
16.3 The principles of taxation	303
16.4 Taxation and supply-side economics	307
16.5 Local government	308
16.6 Economic sovereignty	309
16.7 Political economy: how governments decide	311
Summary	314
Review questions	315
Chapter 17 Industrial policy and competition policy	316
17.1 Industrial policy	317
17.2 Economic geography	320
17.3 The social cost of monopoly power	321
17.4 Competition policy	326
17.5 mergers	329
Summary	352
Review questions	333
Chapter 18 Natural monopoly: public or private?	334
18.1 Natural monopoly	335
18.2 Nationalized industries	336
18.3 Public versus private	341
18.4 Privatization in practice	343
18.5 Regulating private monopolies	344
18.6 The private finance initiative	347
Summary	349
Review questions	350
Part 4 Macroeconomics	353
Chapter 19 Introduction to macroeconomics	355
19.1 The big issues	356
19.2 The facts	356
19.3 An overview	358
19.4 National income accounting	360
19.5 What GNP measures	368
Summary	372
Review questions	373
Chapter 20 Output and aggregate demand	374
20.1 Components of aggregate demand	376
20.2 Aggregate demand	379
20.3 Equilibrium output	379
20.4 Another approach: planned saving equals planned investment	381
20.5 A fall in aggregate demand	382
20.6 The multiplier	384
20.7 The paradox of thrift	385

Summary	387
Review of questions	388
Chapter 21 Fiscal policy and foreign trade	389
21.1 Government and the circular flow	390
21.2 The government and aggregate demand	391
21.3 The government budget	393
21.4 Deficits and the fiscal stance	397
21.5 Automatic stabilizers and discretionary fiscal policy	398
21.6 The national debt and the deficit	399
21.7 Foreign trade and income determination	401
Summary	405
Review questions	406
Chapter 22 Money and banking	408
22.1 Money and its functions	408
22.2 Modern banking	410
22.3 How banks create money	412
22.4 The monetary base and the money multiplier	414
22.5 Measures of money	416
22.6 Competition between banks	418
22.7 The demand for money	418
Summary	422
Review questions	423
Chapter 23 Interest rates and monetary transmission	425
23.1 The Bank of England	425
23.2 The Bank and the money supply	426
23.3 Lender of last resort	428
23.4 Equilibrium in financial markets	429
23.5 Monetary control	432
23.6 Targets and instruments of monetary policy	433
23.7 The transmission mechanism	434
Summary	440
Review questions	441
Chapter 24 Monetary and fiscal policy	443
24.1 Monetary policy rules	443
24.2 The <i>IS-LM</i> model	445
24.3 The <i>IS-LM</i> model in action	447
24.4 Shocks for money demand	449
24.5 The policy mix	450
24.6 The effect of future taxes	452
24.7 Demand management revisited	454
Summary	455
Review questions	455
Chapter 25 Aggregate supply, prices, and adjustment to shocks	457
25.1 Inflation and aggregate demand	458
25.2 Aggregate supply	460
25.3 Equilibrium inflation	461

25.4	The labour market and wage behaviour	466
25.5	Short-run aggregate supply	467
25.6	The adjustment process	468
25.7	Sluggish adjustment to shocks	470
25.8	Trade-offs in monetary objectives	474
	Summary	475
	Review questions	476
Chapter 26	Inflation, expectations, and credibility	477
26.1	Money and inflation	478
26.2	Inflation and interest rates	479
26.3	Inflation, money, and deficits	480
26.4	Inflation, unemployment, and output	484
26.5	The costs of inflation	489
26.6	Defeating inflation	493
26.7	The Monetary Policy Committee	495
	Summary	498
	Reivew questions	499
Chapter 27	Unemployment	500
27.1	The labour market	501
27.2	Analysing unemployment	503
27.3	Explaining changes in unemployment	506
27.4	Cyclical fluctuations in unemployment	511
27.5	The cost of unemployment	512
	Summary	514
	Review questions	515
Chapter 28	Exchang rates and the balance of payments	517
28.1	The foreign exchange market	517
28.2	Exchange rate regimes	520
28.3	The balance of payments	521
28.4	The real exchange rate	524
28.5	Determinants of the current account	525
28.6	The financial account	526
28.7	Internal and external balance	528
28.8	The long-run equilibrium real exchange rate	529
	Summary	532
	Review questions	533
Chapter 29	Open economy macroeconomics	534
29.1	Fixed exchange rates	534
29.2	Macroeconomic policy under fixed exchange rates	538
29.3	Devaluation	539
29.4	Floating exchange rates	541
29.5	Monetary and fiscal policy under floating exchange rates	545
29.6	The pound since 1980	547
	Summary	548
	Review questions	549

Chapter 30 Economic growth	551
30.1 Economic growth	552
30.2 Growth: an overview	553
30.3 Technical knowledge	555
30.4 Growth and accumulation	557
30.5 Growth through technical progress	560
30.6 Growth in the OECD	561
30.7 Endogenous growth	565
30.8 The costs of growth	566
Summary	567
Review questions	568
Chapter 31 Business cycles	570
31.1 Trend and cycle: statistics or economics?	571
31.2 Theories of the business cycle	573
31.3 Real business cycles	576
31.4 An international business cycle?	579
31.5 UK recovery after 1992	581
31.6 The odyssey after 2001	581
Summary	582
Review questions	583
Chapter 32 Macroeconomics: taking stock	585
32.1 Areas of disagreement	586
32.2 New Classical macroeconomics	590
32.3 Gradualist monetarists	592
32.4 Moderate Keynesians	593
32.5 Extreme Keynesians	595
32.6 A summing up	596
Summary	597
Review questions	598
Part 5 The world economy	601
Chapter 33 International trade	603
33.1 Trade patterns	604
33.2 Comparative advantage	607
33.3 Intra-industry trade	612
33.4 Gainers and losers	614
33.5 The economics of tariffs	615
33.6 Good and bad arguments for tariffs	617
33.7 Tariff levels: not so bad?	622
33.8 Other trade policies	623
Summary	624
Review questions	625
Chapter 34 Exchange rate regimes	627
34.1 The gold standard	629
34.2 An adjustable peg	629
34.3 Floating exchange rates	631
34.4 Speculative attacks on pegged exchange rates	632

34.5	Fixed versus floating	634
34.6	International policy co-ordination	635
34.7	The European Monetary System	637
	Summary	640
	Review questions	641
Chapter 35	European integration	643
35.1	The Single Market	643
35.2	benefits of the Single Market	644
35.3	From EMS to EMU	646
35.4	The economics of EMU	648
35.5	Central and Eastern Europe	652
	Summary	658
	Review questions	659
Chapter 36	Less developed countries	660
36.1	World income distribution	660
36.2	Obstacles to development	661
36.3	Development through trade in primary products	663
36.4	Industrialization	667
36.5	Borrowing to grow	670
36.6	Development through structural adjustment	672
36.7	Aid	673
	Summary	674
	Review questions	675
	Appendix: Answers to review questions	677
	Glossary	690
