

Brief Contents

Chapter 1	Laboratory Equipment and Safety	1	Core Competency D	Obtaining Vital Signs and Measurements	254
Chapter 2	Introduction to Microbiology	32	Core Competency E	Medical Assisting Externships and Preparing to Find a Position	281
Chapter 3	HIV, Hepatitis, and Other Bloodborne Pathogens	68	Appendix A	End-of-Book Exercises	306
Chapter 4	Collecting, Processing, and Testing Urine Specimens	95	Prefixes, Suffixes, and Word Roots in Commonly Used Medical Terms		325
Chapter 5	Collecting, Processing, and Testing Blood Specimens	126	Abbreviations and Symbols Commonly Used in Medical Notations		327
Chapter 6	X-Rays and Diagnostic Radiology	166	Credits		329
Core Competency A	Principles of Asepsis	193	Index		331
Core Competency B	Preparing the Exam and Treatment Areas	212			
Core Competency C	Interviewing the Patient, Taking a History, and Documentation	229			

Contents

Chapter 1 Laboratory Equipment and Safety 1

The Role of Laboratory Testing in Patient Care 3

The Medical Assistant's Role 4

Use of Laboratory Equipment 4

Career Opportunities/Clinical Laboratory Technicians 6

PROCEDURE 1-1 Using a Microscope 8

Safety in the Laboratory 10

Caution: Handle with Care/Care and Maintenance of the Microscope 11

Quality Assurance Programs 20

PROCEDURE 1-2 Disposing of Biohazardous Waste 21

Caution: Handle with Care/Operating a Reliable Certificate of Waiver Laboratory 23

Caution: Handle with Care/Troubleshooting Problems in a Physician's Office Laboratory 26

Communicating with the Patient 27

Record Keeping 29

Chapter 2 Introduction to Microbiology 32

Microbiology and the Role of the Medical Assistant 35

How Microorganisms Cause Disease 35

Classification and Naming of Microorganisms 35

Viruses 36

Bacteria 36

Protozoans 39

Fungi 39

Multicellular Parasites 40

How Infections Are Diagnosed 40

Specimen Collection 43

PROCEDURE 2-1 Obtaining a Throat Culture Specimen 51

Educating the Patient/Collecting a Stool Sample 52

Transporting Specimens to an Outside Laboratory 53

PROCEDURE 2-2 Preparing Microbiologic Specimens for Transport to an Outside Laboratory 54

Direct Examination of Specimens 54

Preparation and Examination of Stained Specimens 55

PROCEDURE 2-3 Preparing a Microbiologic Specimen Smear 56

Culturing Specimens in the Medical Office 57

PROCEDURE 2-4 Performing a Gram's Stain 58

Points on Practice/Obtaining Additional Training in Microbiology 62

Determining Antimicrobial Sensitivity 63

Quality Control in the Medical Office 63

Points on Practice/Guidelines for a Quality Control Program in a Microbiology Laboratory 64

Chapter 3 HIV, Hepatitis, and Other Bloodborne Pathogens 68

Transmission of Bloodborne Pathogens 70

Universal Precautions 71

Disease Profiles 72

Career Opportunities/HIV/AIDS Instructor 73

PROCEDURE 3-1 Applying Universal Precautions 74

Caution: Handle with Care/Preventing Transmission of Viruses in the Health-Care Setting 75

AIDS Patients 79

Other Bloodborne Infections 84

Reporting Guidelines 85

PROCEDURE 3-2 Notifying State and County Agencies About Reportable Diseases 86

Reflecting On . . . HIPAA/HIPAA and Public Health 89

Patient Education 89

Educating the Patient/Obtaining Information About AIDS and Hepatitis 91

Special Issues with Terminal Illness 91

Chapter 4 Collecting, Processing, and Testing Urine Specimens 95

- The Role of the Medical Assistant 98
- Anatomy and Physiology of the Urinary System 98
- Obtaining Specimens 98
- PROCEDURE 4-1 Collecting a Clean-Catch Midstream Urine Specimen 101**
- Educating the Patient/How to Collect a 24-Hour Urine Specimen 103
- Reflecting On . . . Age Consideration—Geriatrics/Collecting Urine Specimens from Elderly Patients 104
- Reflecting On . . . Age Consideration—Pediatrics/Collecting a Urine Specimen from a Pediatric Patient 105
- PROCEDURE 4-2 Collecting a Urine Specimen from a Pediatric Patient 106**
- Urinalysis 107
- PROCEDURE 4-3 Establishing Chain of Custody for a Urine Specimen 108**
- PROCEDURE 4-4 Measuring Specific Gravity with a Refractometer 114**
- PROCEDURE 4-5 Performing a Reagent Strip Test 115**
- PROCEDURE 4-6 Pregnancy Testing Using the EIA Method 117**
- PROCEDURE 4-7 Processing a Urine Specimen for Microscopic Examination of Sediment 119**
- Educating the Patient/Preventing Urinary Tract Infections 122

Chapter 5 Collecting, Processing, and Testing Blood Specimens 126

- The Role of the Medical Assistant 129
- The Functions and Composition of Blood 129
- Career Opportunities/Phlebotomist 131
- Collecting Blood Specimens 132
- Caution: Handle with Care/Phlebotomy and Personal Protective Equipment 136
- PROCEDURE 5-1 Quality Control Procedures for Blood Specimen Collection 137**
- PROCEDURE 5-2 Performing Venipuncture Using an Evacuation System 139**
- Responding to Patient Needs 144
- PROCEDURE 5-3 Performing Capillary Puncture 145**
- Reflecting On . . . Age Consideration—Pediatrics/Blood Drawing Procedures and Children 147
- Reflecting On . . . Age Consideration—Geriatrics/Blood Drawing Procedures and the Elderly 148

- Caution: Handle with Care/Venipuncture Complications 149
- Performing Common Blood Tests 149
- PROCEDURE 5-4 Preparing a Blood Smear Slide 156**
- PROCEDURE 5-5 Measuring Hematocrit Percentage After Centrifuge 158**
- PROCEDURE 5-6 Measuring Blood Glucose Using a Handheld Glucometer 161**
- Educating the Patient/Managing Diabetes 162

Chapter 6 X-Rays and Diagnostic Radiology 166

- Brief History of the X-Ray 168
- Diagnostic Radiology 168
- The Medical Assistant's Role in Diagnostic Radiology 169
- Educating the Patient/Providing Patient Instruction for Radiologic Procedures 170
- Points on Practice/Verifying Insurance for Radiologic Procedures 170
- PROCEDURE 6-1 Assisting with an X-Ray Examination 170**
- Common Diagnostic Radiologic Tests 171
- Career Opportunities/Radiographer/Sonographer 177
- Educating the Patient/Preprocedure Care for Mammography 182
- Common Therapeutic Uses of Radiation 184
- Radiation Safety and Dose 185
- Educating the Patient/Safety with X-Rays 186
- Storing and Filing X-Rays 187
- PROCEDURE 6-2 Documentation and Filing Techniques for X-Rays 187**
- Electronic Medicine 188

Core Competency A Principles of Asepsis 193

- History of Infectious Disease Prevention 195
- Microorganisms and Disease 196
- Infectious Diseases 196
- Points on Practice/Preventing the Spread of Tuberculosis 200
- Drug-Resistant Microorganisms 201
- The Disease Process 201
- The Body's Defenses 202
- The Cycle of Infection 206
- Breaking the Cycle 208

Core Competency B Preparing the Exam and Treatment Areas 212

The Medical Assistant's Role in Preparing the Exam Room 214

The Exam Room 214

Cleanliness in the Exam Room 215

Room Temperature, Lighting, and Ventilation 216

PROCEDURE B-1 Guidelines for Disinfecting Exam Room Surfaces 217

Caution: Handle with Care/Storing Biohazardous Materials 218

Caution: Handle with Care/Refrigerator Temperature Control 218

Medical Instruments and Supplies 219

Physical Safety in the Exam Room 222

PROCEDURE B-2 Making the Exam Room Safe for Patients with Visual Impairments 224

Core Competency C Interviewing the Patient, Taking a History, and Documentation 229

The Patient Interview and History 231

Your Role as an Observer 234

PROCEDURE C-1 Using Critical Thinking Skills During an Interview 236

Reflecting On . . . Communication Issues/
Communicating with Professionalism 237

Caution: Handle with Care/Signs of Depression,
Substance Abuse, and Addiction in
Adolescents 238

Documenting Patient Information 240

Reflecting On . . . Age Consideration—Pediatrics/
The Interview and Abuse 240

Reflecting On . . . Age Consideration—Geriatrics/
The Interview and Abuse 240

Recording the Patient's Medical History 244

PROCEDURE C-2 Using a Progress Note 249

PROCEDURE C-3 Obtaining a Medical History 251

Core Competency D Obtaining Vital Signs and Measurements 254

Vital Signs 256

Points on Practice/Math for Measurements 258

PROCEDURE D-1 Measuring and Recording Temperature 261

Reflecting On . . . Age Consideration—Pediatrics/
Special Considerations 263

Caution: Handle with Care/Tympanic Thermometers:
What You Need to Know 264

PROCEDURE D-2 Measuring and Recording Pulse and Respirations 266

PROCEDURE D-3 Taking the Blood Pressure of Adults and Older Children 269

Body Measurements 271

PROCEDURE D-4 Measuring Adults and Children 274

PROCEDURE D-5 Measuring Infants 275

Core Competency E Medical Assisting Externships and Preparing to Find a Position 281

Externships 283

Preparing to Find a Position 289

Reflecting On . . . Professionalism/Make a Good
Impression 290

PROCEDURE E-1 Résumé Writing 297

Interviewing 297

PROCEDURE E-2 Writing Thank-You Notes 301

On the Job 302

Appendix A End-of-Book Exercises 306

Prefixes, Suffixes, and Word Roots in Commonly Used Medical Terms 325

Abbreviations and Symbols Commonly Used in Medical Notations 327

Credits 329

Index 331
