

A Note from the Author

Welcome to the *Applying AutoCAD 2007* Web site. I hope you find it useful.

AutoCAD has stood the test of time, having been used in industry, government, and education for more than 23 years. Likewise, I'm happy to report that the *Applying AutoCAD* textbook series has been in print for more than two decades.

It is my wish that you benefit a great deal from the time you spend with the software and book. I firmly believe that learning how to use AutoCAD will make you more attractive to a range of employers across many industrial sectors.

With hard work, the right attitude, a sense of determination, and a bit of creativity, you can achieve many great things in life . . . and your knowledge of AutoCAD can help you get there.

Good luck to you in the future!

A handwritten signature in blue ink, consisting of a large, stylized 'T' followed by a series of loops and a long horizontal stroke.
