

## **Target Your Reading**

Use this to focus on the main ideas as you read the chapter.

- **Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
  - Write an **A** if you **agree** with the statement.
  - Write a **D** if you **disagree** with the statement.
- **After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
  - If any of your answers changed, explain why.
  - Change any false statements into true statements.
  - Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	Osmosis is the movement of water into and out of a cell.	
	2	All substances can easily pass through a cell's cell membrane.	
	3	Photosynthesis produces oxygen and a sugar.	
	4	Proteins are organic compounds that are important for storing energy.	
	5	lons play an important role in many life processes.	
	6	Diffusion continues until equilibrium occurs.	
	7	Matter is anything that has mass and takes up space.	
	8	Only plant cells can transform energy.	
	9	Water is the most abundant compound in a cell.	
	10	Cellular respiration requires oxygen and releases energy for a cell.	

Read a paragraph containing a vocabulary word from beginning to end. Then, go back to determine the meaning of the word.
