GETTING THE MOST FROM THIS BOOK

We're tired of people saying that accounting is deadly boring. So we wrote this textbook to show just how interesting it can be. Here are a few tips to help you get the most from this book and this course.

- **Read the book.** Seriously.
- **Get the point.** Even though you're going to read all the assigned chapters (right?), you'll want to know what's important and likely to be on your test. The learning objectives tell you. Find them in the first exhibit in each chapter.
- **Consult the coach.** Each coach in Coach's Corner will walk you through tough problems and give you advice on improving your game.
- **Keep on track.** The self-study quizzes gauge whether you've been thinking hard enough as you read. There's no point in blasting through the chapter just to finish. Cover the self-study quiz answers with your thumb and give the questions a try.
- **Practice, practice, practice.** We can't say it enough. You can't just read about accounting, you have to do it. So be sure to do all the questions that you've been assigned. If you're assigned the Group A problems, you can do the Group B problems for extra practice and use the coached problems when reviewing for tests and exams.
- **Get extra help.** The Online Learning Centre is full of digital tools that will help you pull it all together.

One last tip. Enjoy yourself. Ask questions. Share the cartoons with friends who aren't even taking this course. Discover for yourself that accounting isn't boring.

about the authors

Fred Phillips

Fred Phillips is a Professor and the George C. Baxter Chartered Accountants of Saskatchewan Scholar at the University of Saskatchewan, where he teaches introductory financial accounting. He also has taught introductory accounting at the University of Texas at Austin and the University of Manitoba. Fred has an undergraduate accounting degree, a professional accounting designation, and a PhD from the University of Texas at Austin. He previously worked as an audit manager at KPMG.

Fred's main interest is accounting education. He has won eight teaching awards, including two na-

tional case-writing competitions. He has published instructional cases and numerous articles in journals such as *Issues in Accounting Education*, *Journal of Accounting Research*, and *Organizational Behavior and Human Decision Processes*. Fred currently serves as an associate editor of *Issues in Accounting Education*, and he is a member of the Teaching & Curriculum and Two-Year College sections of the American Accounting Association. In his spare time, he likes to work out, play video games, and drink iced cappuccino.

Robert Libby

Robert Libby is the David A. Thomas Professor of Management at the Johnson Graduate School of Management at Cornell University, where he teaches the introductory financial accounting course. He previously taught at the University of Illinois, Pennsylvania State University, the University of Texas at Austin, the University of Chicago, and the University of Michigan. He received his BS from Pennsylvania State University and his MAS and PhD from the University of Illinois; he is also a CPA.

Bob is a widely published author specializing in behavioural accounting. He was selected as the AAA Outstanding Educator in 2000. One of his prior

texts, *Accounting and Human Information Processing* (Prentice Hall, 1981), was awarded the AICPA/AAA Notable Contributions to the Accounting Literature Award. He received this award again in 1996 for a paper. He has published numerous articles in the *Journals of Accounting Research*, *Accounting, Organizations, and Society*, and other accounting journals. He is Vice President-Publications of the American Accounting Association and is a member of the American Institute of CPAs and the editorial boards of *Accounting, Organizations, and Society*, *Journal of Accounting Literature*, and *Journal of Behavioral Decision Making*.

Patricia A. Libby

Patricia Libby is Associate Professor of Accounting and Coordinator of the MBA in Professional Accountancy Program at Ithaca College, where she teaches the undergraduate financial accounting course. She previously taught graduate and undergraduate financial accounting at Eastern Michigan University and the University of Texas at Austin. Before entering academe, she was an auditor with Price Waterhouse (now PricewaterhouseCoopers) and a financial administrator at the University of Chicago. She re-

ceived her BS from Pennsylvania State University, her MBA from DePaul University, and her PhD from the University of Michigan; she is also a CPA.

Pat conducts research on using cases in the introductory course and other parts of the accounting curriculum. She has published articles in *The Accounting Review*, *Issues in Accounting Education*, and *The Michigan CPA*. She has also conducted seminars nationwide on active learning strategies, including cooperative learning methods.

Teresa Anderson

M. Teresa Anderson, PhD, FCA is a professor of accounting at the University of Ottawa. She received her bachelor's degree from Loyola of Montreal, her master's degree from the University of Ottawa, and her doctorate from Queen's University. She worked as a chartered accountant in public practice in both Montreal and Bermuda. Professor Anderson's research interests encompass various aspects of financial reporting and audit services and she has written articles for both academic and professional journals. Professor Anderson has actively served the Institute of

Chartered Accountants of Ontario, primarily on its examination subcommittee and as an elected member of its governing council. She has been a vice-president of the Canadian Academic Accounting Association and a director for a number of private organizations. Professor Anderson has been active in curriculum review and course development and has been nominated by the School of Management three times for the University of Ottawa Excellence in Teaching Award. In 2006, Professor Anderson was named a Fellow of the Institute of Chartered Accountants of Ontario.

PHILLIPS, LIBBY, LIBBY & ANDERSON'S

Fundamentals of **FINANCIAL ACCOUNTING**

Canadian Edition

What does it mean to have a great coach? When you're approaching a subject for the first time, especially a subject as technical as Financial Accounting, having a great coach means having the ongoing support, direction, and motivation necessary to ensure your success.

If you agree that the cover of this book depicts a great coach who is leading the individual participants to victory, then we have successfully captured the essence of Phillips, Libby, Libby, and Anderson's *Fundamentals of Financial Accounting Canadian Edition*. Through unparalleled pedagogy and the most engaging writing style on the market, this text will act as a personal coach outside the classroom, working to ensure every student's success.

Fundamentals of Financial Accounting Canadian Edition provides students with the tools they will need to make sense of business activities, and to prepare and interpret financial information in an accurate and relevant way. Consider the cover shot of the rowers more closely. To the untrained eye, each rower appears to be a mirror image of the others. Each is simply pushing on the oars as hard as he can to reach the finish line. But is it really so straightforward? Look closer at the oars and you will see they are not exactly in line with each other. Each stroke is slightly different from the one next to it. In reality, each rower is playing a unique part based largely on individual strength and position in the boat.

Insert cover

Understanding the intricacies of a rowing team is not unlike understanding a business. On the surface, a business seems like a hive of hectic activity, defying comprehension. Look closer and order emerges: people at different levels of the organization are working with one another (and hoping to do so with the winning precision of our rowing team!). Business activities occurring in one department are analyzed and their financial effects are captured by the accounting department which, in turn, reports these results to decision makers both inside and outside the business. Financial accounting is the thread tying these roles together. Like the variations between each rower's stroke, the subtle messages conveyed by financial statements become useful after examination by a trained and careful eye. Put another way, the closer you look at financial accounting data, the more you understand.

WHAT MAKES THIS BOOK CANADIAN?

This Canadian adaptation revolved around three key areas.

First, the Canadian edition reflects our unique standard-setting environment, generally accepted accounting practices, national accounting bodies, and regulatory agencies.

Second, this edition discusses dozens of Canadian companies, either as focus, comparison, or demo companies, or in the end-of-chapter material. What could be more Canadian than problems on Tim Hortons or the National Hockey League?

Third, this edition benefited from the valuable suggestions of Canadian accounting instructors. In response to reviewers' comments, some areas were expanded, others were deleted or moved to chapter supplements or the Online Learning Centre, and problem material was increased in many chapters. These changes were made to ensure that this edition is well-suited to the needs of Canadian colleges and universities.

THE COACH IS IN THE ICONS

A *Fundamentals of Financial Accounting Canadian Edition* reader is never alone. Several of this book's innovative and student-friendly pedagogical features are represented by icons students will encounter as they read—it's a visual shorthand that makes it a breeze to find additional help or insight.

COACH'S CORNER

COACH'S CORNER

Coach's Corner: Virtually every student has been inspired by a great coach at some point or another. Throughout the chapters, Coach's Corner provides students with tips, advice, and guidance on learning the material. Coach's Corner appears again at the end of the chapter to offer encouragement as students work to reinforce what they've learned.

POINT OF INTEREST

Points of Interest: It always helps to take a little break now and then and Points of Interest provide attention-grabbing diversions for students as they read. From the origins of the Hudson's Bay Company to bogus investment opportunities, Points of Interest illuminate the topic at hand with amusing and unusual facts that introduce a breath of fresh air into students' reading.

ETHICAL ISSUES

Ethical Issues: We've seen all too plainly what can happen when accounting data are distorted or used inappropriately. *Fundamentals of Financial Accounting Canadian Edition* ensures your students start off with a solid grounding in ethics. Ethical Issues in each chapter prompt your students to think about tough ethical decisions and to practice making these decisions in the end-of-chapter cases.

OUTSIDE LOOKING IN

INSIDE LOOKING OUT

Outside Looking In/Inside Looking Out: Different people use accounting information in different ways: those within the firm must choose when and how to report events, while those outside it rely on those reports to make their own decisions. Instances of this dual nature of accounting information are highlighted in the Outside Looking In/Inside Looking Out feature, using an analogy from students' own experiences to highlight the personal relevance of the chapter's topics.

HIGHLIGHTS OF THE STUDENT-CENTRED APPROACH

Phillips, Libby, Libby, and Anderson's *Fundamentals of Financial Accounting Canadian Edition* arms Canadian students with a secret weapon for success in financial accounting: the best personal coach on the market. The following are highlights of Phillips' innovative student-centred approach:

Writing that students can read. What does it mean to say that a book is "readable"? In the case of *Fundamentals of Financial Accounting Canadian Edition*, it simply means the most enjoyable accounting textbook your students have ever read. Through a mix of conversational wording, humour, and everyday examples, *Fundamentals of Financial Accounting Canadian Edition* achieves a style that maintains rigour while never sacrificing student engagement. Open this textbook to any page and read for yourself: *Fundamentals of Financial Accounting Canadian Edition* offers **the most engaging read** of any financial text.

Focus companies. In an approach pioneered by co-authors Robert Libby and Patricia Libby, each chapter of *Fundamentals of Financial Accounting Canadian Edition* makes financial accounting come alive by using a real-world focus company to teach fundamental concepts. Students learn why accounting is important and how businesses use financial accounting information to make smart decisions. All of the focus companies featured in *Fundamentals of Financial Accounting Canadian Edition* are **real companies whose products and services are popular with students**, such as Sony and Oakley. Even better, the list includes **eight Canadian companies**, such as First Choice Haircutters.

A framework students can USE. The **USER Framework** works as a roadmap for each chapter and ensures a balance between preparer and user concepts. Students learn to **Understand** the business decisions made every day by managers, **Study** the methods used by financial accountants, **Evaluate** the reported results from the viewpoint of financial statement users, and **Reconsider** how accounting methods affect the evaluation of results, which indicate the quality of business decisions that managers have made.

Student-friendly coverage of difficult topics. Written with students in mind, *Fundamentals of Financial Accounting Canadian Edition* handles difficult concepts in a way that reflects the balance of preparer and user concepts and keeps students from being overwhelmed.

- **Financial statement analysis** is covered in two chapters (5 and 13) rather than one.
- **Ratios** are introduced throughout the chapters and then pulled together at the end.
- **Individual concepts** are introduced throughout the text as needed to explain specific accounting practices, and then pulled together at the end.
- **The Accounting Process** is covered in three chapters (2, 3, and 4) rather than two.
- The purpose of a **Statement of Cash Flows** is introduced at the beginning of the text, but the mechanics of preparing one are studied at the end.

By taking the most student-oriented approach on the market, *Fundamentals of Financial Accounting Canadian Edition* shows students that the closer they look at financial accounting data, the more they will understand it.

KEEP YOUR CLASS FOCUSED ON THE REAL WORLD

The best way to learn to prepare and use financial statements is to study accounting in real business contexts. This is the key idea behind *Fundamentals of Financial Accounting, Canadian Edition's* focus company approach, which is introduced in the first chapter and which integrates each chapter's material around a focus company, its decisions, and its financial statements.

CHAPTER

9

Reporting and Interpreting Long-Lived Tangible and Intangible Assets

There were 845,000 rounds of golf played on

- U**nderstand the types of long-lived assets used in
 - L01** Define, classify, and explain the nature of long-lived assets.
- S**tudy how to account for long-lived assets.
 - L02** Apply the cost principle to the acquisition of long-lived assets.
 - L03** Apply various amortization methods as future economic benefits are used up over time.
 - L04** Explain the effect of asset impairment on the financial statements.
 - L05** Analyze the disposal of long-lived tangible assets.
 - L06** Analyze the acquisition, use, and disposal of long-lived intangible assets.
 - L07** (Supplement) Analyze changes in amortization.
- E**valuate the effectiveness of long-lived asset management decisions.
 - L08** Interpret the fixed asset turnover ratio.
- R**econsider how reporting decisions affect analysis.
 - L09** Describe factors to consider when comparing a company's performance to its industry.

In choosing *Fundamentals of Financial Accounting Canadian Edition's* focus companies, we took care that our companies' products and services are used by students and will appeal to their curiosity. We further heighten student engagement by injecting our discussions with issues and questions that actually matter in the real world. *What decisions does ClubLink make when investing in and reporting its golf courses and other long-lived assets? How does Magnotta Winery monitor and manage its fluctuating cash flows during the pre- and post-harvest seasons?* These are but a couple of the companies and issues discussed over the course of this book.

A WARM WELCOME IN EVERY CHAPTER

Students often feel they lack the real-world experience needed to understand accounting, a subject they believe has little impact on their daily lives. *Fundamentals of Financial Accounting, Canadian Edition's* chapter openers provide entertaining analogies that illustrate how accounting principles can inform even the most seemingly mundane things, from making peanut-butter sandwiches to catching a roommate stealing snacks. There's no better way to help students feel comfortable with accounting topics and to trigger an interest that invites them into the chapter. (To see how peanut-butter sandwiches relate to amortization, take a look at Chapter 9.)

A BOOK WITH ITS OWN

Fundamentals of Financial Accounting, Canadian Edition is loaded with so many innovative pedagogical features, you'd swear we shrinkwrapped a TA with the book. From quick review tools to head-scratching ethical dilemmas, *Fundamentals of Financial Accounting, Canadian Edition's* pedagogy gives students every opportunity to reinforce and expand on what they're learning.

COACHED PROBLEMS

CP1-1 Preparing an Income Statement and Balance Sheet
 Assume that you are the president of Nuclear Company. At the end of the first year of operations (December 31, 2007), the following financial data for the company are available:

Cash	\$ 25,000
Accounts receivable from customers	12,000
Inventories	90,000
Equipment owned	45,000
Accounts payable to suppliers	47,370
Notes payable	2,000
Total sales revenue	140,000
Expenses, including the cost of goods sold (excluding income taxes)	89,100
Income tax expense	15,270
Contributed capital, 7,000 shares outstanding	87,000
No dividends were declared or paid during 2007.	

Required (show computations):

- Prepare an income statement for the year 2007.
- Prepare a balance sheet at December 31, 2007.

COACH'S CORNER

1. Dig in to classifying each account as asset, liability, shareholder's equity, revenue, or expense. Then use the formulas shown in the chapter for preparing an income statement and balance sheet. You'll need the net income of the current year to calculate the retained earnings at the end of the year, so do the income statement first.

2. Because this is the first year of operations and there were no dividends, the balance in retained earnings will include only the current year's net income.

Problems With (and Without) the Coach's Help

Instructors tell us how important decision-making skills are for students entering the accounting profession, and *Fundamentals of Financial Accounting, Canadian Edition* recognizes this through an innovative approach to problem-solving. Every chapter includes three problem sets: Coached Problems, Group A, and Group B problems. The Coached Problems go beyond the traditional check figures to advise students on the *process* of solving a problem rather than just its outcome. This feature will save students the inefficient and frustrating experience of having to work

backwards from solutions to develop their own (possibly erroneous) problem-solving rules. When students can solve the coached problems, they'll be ready to tackle the Group A or Group B problems, which echo the content without the advice offered by the Coached Problems.

L02 GROUP A PROBLEMS

PA1-1 Preparing an Income Statement and Balance Sheet
 Assume that you are the president of McClaren Corporation. At the end of the first year of operations (June 30, 2007), the following financial data for the company are available:

Cash	\$13,150
Accounts receivable from customers	9,500
Inventories	57,000
Equipment owned	36,000

HOW'S IT GOING? A Self-Study Quiz

The following transactions are typical monthly operating activities for your First Choice Haircutters Salon. Indicate the amount of revenue, if any, that should be reported in September's income statement.

Operating Activity	Amount of Revenue in September (if any)
(a) Provided haircut services in September to customers for \$15,000 cash.	
(b) Sold \$300 of gift certificates at the beginning of September.	
(c) Customers used \$100 of gift certificates to pay for haircuts in the third week of September.	
(d) Provided \$500 of hair styling services to employees of a local TV station, which is billed every month.	
(e) The TV station paid \$300 on its account.	

After you're done, check your answers with the solutions in the margin.

Quick Answers

(a) \$15,000—This revenue is earned during the month.
 (b) \$0—No revenue has been earned because no services have been provided.
 (c) \$0—No revenue has been earned because the revenue is earned when the services are provided, not when the certificate is used.
 (d) \$500—No revenue has been earned because the revenue is earned when the services are provided, not when the certificate is used.
 (e) \$0—The revenue was earned when services were provided.

"How's It Going?"

Nothing helps like a quiz for mastering tricky subjects, so *Fundamentals of Financial Accounting, Canadian Edition* provides plenty of these innovative review boxes throughout each chapter. "How's It Going?" boxes pose a review question about the recent material and provide the answer right there on the page, printed sideways so that students don't accidentally read it before answering the question.

ETHICAL ISSUES

L01-L04 C&DSS-4 Ethical Decision Making: A Real-Life Example

On February 18, 2000, the board of directors of Aurora Foods Inc.—the maker of Duncan Hines® and Mrs. Butterworth® products—issued a press release announcing that a special committee had been formed to conduct an investigation into the company's accounting practices. During the financial statement audit for the year ended December 31, 1999, Aurora's auditors had discovered documents that raised questions about how the company accounted for marketing costs incurred to entice grocery stores to promote Aurora's products. The company's stock price fell by 50 percent in the week following this announcement.

After nearly a year of investigation, Aurora filed revised quarterly reports with the Securities and Exchange Commission (SEC) in the United States, showing that the company had not accrued adequately for liabilities and expenses that had been incurred during the third and fourth quarter of 1998 and during the first three quarters of 1999. Key financial figures for these quarters as initially reported and as later restated are shown below.

(in millions of U.S. dollars)	1998 Q3 (September 30)		1998 Q4 (December 31)		1999 Q1 (March 31)		1999 Q2 (June 30)		1999 Q3 (September 30)	
	Initial Report	Restated Report	Initial Report	Restated Report	Initial Report	Restated Report	Initial Report	Restated Report	Initial Report	Restated Report
Assets	\$1,457	\$1,456	\$1,434	\$1,448	\$1,474	\$1,463	\$1,568	\$1,521	\$1,614	\$1,553
Liabilities	869	879	830	868	862	882	937	944	983	972
Revenues	220	219	280	277	261	254	222	214	238	231
Net income (loss)	1	(12)	16	5	8	0	8	(4)	11	4

The SEC also investigated and filed a legal claim alleging that Aurora's 36-year-old chief financial officer (CFO) had violated federal securities laws by instructing accounting staff to make false journal entries and prepare two sets of records—one for the company's internal use and another to be provided to the auditors. The SEC alleged that her actions allowed Aurora to meet

Ethics Cases

The last five years have seen controversies that brought the ethics of the accounting profession to the forefront of public debate. Young people entering the business world, whether as accountants or other business majors, simply must have a strong ethical grounding, so *Fundamentals of Financial Accounting, Canadian Edition* includes **two ethics cases in every chapter**.

TEACHING ASSISTANT INCLUDED

A Good Accountant DECIDES

The DECIDES decision model provides students the structure they need to tackle challenging topics. This model helps students to decide on the accounting effects of transactions by thinking through the following steps:

1. Does a transaction exist? Go to step 2 only if your answer is “yes.”
2. Examine it for the accounts affected. Put a name on what is given and received.
3. Classify each account as asset (A), liability (L), or shareholders’ equity (SE).
4. Identify the direction and amount of the effects. By how much does each asset, liability, and shareholders’ equity account increase or decrease?
5. Ensure the basic accounting equation still balances and that debits = credits.
6. Summarize the transaction effects in T-accounts.

The DECIDES model is introduced in Chapter 2, expanded in Chapter 3, and reinforced throughout the remaining chapters.

Understand key inventory management decisions.

LO1 Describe inventory management goals.

Study inventory costing and reporting decisions.

LO2 Describe the different types of inventory.

LO3 Compute costs using four inventory costing methods.

LO4 (Supplement A) Compute costs using a perpetual inventory system.

LO5 Explain why inventory is reported at the lower of cost or market.

LO6 (Supplement B) Compute the effects of inventory errors.

Evaluate inventory management practices.

LO7 Compute and interpret the inventory turnover ratio.

Reconsider how inventory reporting decisions affect analyses.

LO8 Explain how accounting methods affect evaluations of inventory management.

The USER Framework

The USER framework uses the cover illustration as a “roadmap” to each chapter, delineating how accounting functions work at all levels of the firm. Students learn to Understand the business decisions that managers make, Study the accounting methods used, Evaluate the reported results from the viewpoint of financial statement users, and Reconsider how the accounting methods affect the evaluation of results, which indicate the quality of managers’ decisions.

THE FINEST END-OF-CHAPTER MATERIAL TO BE FOUND.

The end-of-chapter material is traditionally where students go from reading to doing: answering review questions, solving problems, and wrestling with issues that help them to assimilate the material and apply it in a realistic context. While *Fundamentals of Financial Accounting, Canadian Edition* doesn't see reading as a passive process—our pedagogy does more to maintain student interest and engagement than any competing book—the end-of-chapter material offers a wealth of opportunities for students to connect to the material, and for you to enliven your class with a variety of assignments and discussion questions.

CASES & DISCUSSION STARTERS

FINANCIAL REPORTING AND ANALYSIS CASES

C&DS-1 Finding Financial Information

Refer to the financial statements of High Liner's financing in Appendix A at the end of this book, or download the annual report from the Cases section of the text's website at www.mcgrawhill.ca/collge/philips.

Required:

- Calculate the debt-to-assets ratio for 2004 and 2003. Based on these calculations, has High Liner financing become more or less risky in 2004 than in 2003?
- Calculate the asset turnover ratio for 2004 and 2003. (Total assets at December 31, 2002 were \$207 million.) Based on these calculations, has High Liner used its assets more or less efficiently in 2004 than in 2003?
- Calculate the net profit margin ratio for 2004 and 2003. Based on these calculations, has High Liner generated more or less profit per dollar of sales in 2004 than in 2003?

C&DS-2 Comparing Financial Information

Refer to the financial statements of Sam Rippe by downloading the annual report from the Cases section of the text's website at www.mcgrawhill.ca/collge/philips.

Required:

Annual Report Cases

There's no substitute for working on real-world data, so FFA comes complete with an annual report for High Liner Foods reproduced in Appendix A. The end-of-chapter cases make extensive use of these data, showing students how to draw information from an annual report and providing them with a valuable perspective on how financial accounting information is used in decision making.

Team Cases

Every chapter also includes a team case that directs groups to search the Internet for companies to analyze, using the tools covered in that chapter. Students not only learn useful research skills but gain valuable practice solving accounting problems in group settings.

TEAM CASE

L01-L03 C&DS1-3 Internet-Based Team Research: Examining an Annual Report

As a team, select an industry to analyze. Go to the website for the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com to search for information about Canadian public companies. The Canadian Securities Administrators (CSA) and CDS INC., a subsidiary of The Canadian Depository for Securities Limited, have operated the SEDAR website since 1997 to make Canadian public securities filings easily accessible. Click on Search Database and Public Company and run your search by industry group to find companies in your chosen industry. Each group member should acquire the annual report for one Canadian publicly traded company in the industry, with each member selecting a different company. In addition to SEDAR's and the company's own websites, corporate and industry information can be found on a number of other websites, such as www.bever.com and www.fish-info.com. The United States runs a service similar to SEDAR called EDGAR. For American company data, go to www.edgar.com.

Required:

- On an individual basis, each team member should write a short report that lists the following information:
 - What type of business organization is it?
 - What types of products or services does it sell?
 - On what day of the year does it fiscal year end?
 - For how many years does it present complete balance sheets? Income statements? Cash flow statements?
 - Are its financial statements audited by independent auditors? If so, by whom?
 - Did its total assets increase or decrease over the last year?
 - Did its net income increase or decrease over the last year?
- Then, as a team, write a short report comparing and contrasting your companies using these attributes. Discuss any patterns across the companies that you as a team observe and, in particular, compare the level of reporting detail. Provide potential explanations for any differences discovered.

Simplify with Spreadsheets

Why do the same calculations over and over again when you can enter them once, and then just copy and paste? Every chapter includes at least one spreadsheet problem that allows students to skip the tedium of repetitious number-crunching and focus instead on "what if" analyses and interpretations. And don't worry if your students haven't had formal training with spreadsheets: each problem includes relaxed, student-friendly advice on the steps needed to perform basic spreadsheet calculations.

Chapter 3 Reporting Investing and Financing Results on the Balance Sheet

SIMPLIFY WITH SPREADSHEETS

SS2-1 Analyzing Transactions and Preparing a Balance Sheet

Assume you recently obtained a post-transaction system at the corporate headquarters of CHEM Limited in Toronto. CHEM is one of Canada's leading media companies. It owns more than 40 radio and television stations and operates channels, serving the popular Citytv in Toronto, Montreal, and Vancouver. The following table represents selected and final balances in thousands of dollars for CHEM as of August 31, 2004.

Cash	11,200	Accounts Payable	61,204
Accounts Receivable	95,202	Other Current Liabilities	83,214
Other Current Assets	79,206	Long-Term Debt	131,261
Property, Plant, and Equipment	182,247	Other Long-Term Liabilities	81,292
Other Noncurrent Assets	300,677	Contributed Capital	128,242
		Retained Earnings	200,009

Discontinue from the balance sheet of CHEM would change if the company were to enter into the following transaction (assume no discounts) during September:

- Purchase an additional broadcasting facility at a cost of \$12,000, by issuing a promissory note that becomes payable in three years.
- Use \$4,000 cash to repay a short-term loan.
- Issue additional shares for \$40,000 cash.
- Use cash to buy back \$40,000.

Required:

- There are no transactions on CHEM's list of accounts. Explain why not.
- The controller at CHEM has asked you to create a spreadsheet in which to display (a) the account balances in August 31, 04 of the trial balance of the September transactions, and (b) total debit credits for August 31 balances with the September transactions. You feel like you might be back to back with the assignment. Just put to rest your fear about Excel! For advice, here's his reply:

Subject: Excel Help

Wow, I can't believe you landed that great job at CHEM!

My thinking is that you'll really impress your boss if you set up the spreadsheet to look like a balance of Transactions, open books system. To do this, use the first column for date, the second column for the debiting account for the balance sheet accounts. Use two columns for each balance sheet account (with the account name spanning the two columns) to make it look just like a T-account. This is important! Now, in the cell range command to make a header (see last column), right? Well, check the last several I have you there is a command of those one part of the left-hand side of your worksheet right? Look just before you enter the September transactions.

Multiple-Choice Questions

Students are likely to see these kinds of questions on tests and exams, so give them some practice with these quick checks of basic concepts.

MULTIPLE CHOICE

Select the one alternative that best answers the question or completes the sentence.

- If total assets increase but total liabilities remain the same, what is the impact on the debt-to-assets ratio?
 - Increases.
 - Decreases.
 - Remains the same.
 - Cannot be determined without additional information.

LYRYX ASSESSMENT FOR FUNDAMENTALS OF FINANCIAL ACCOUNTING CANADIAN EDITION

A COMPLETE ONLINE ASSESSMENT SYSTEM

Lyryx Assessment for *Fundamentals of Financial Accounting Canadian Edition* is a web-based teaching, learning, and assessment tool that has captured the attention of post-secondary institutions across the country while improving student success in financial accounting. The assessment takes the form of a homework assignment called a **Lab, which corresponds to the chapters in the text.**

The Labs are **algorithmically generated and automatically graded**, so students get instant scores and feedback—no need to wait until the next class to find out how well they did!

New Labs are randomly generated each time, providing the student with unlimited opportunities to try a type of question. After they submit a Lab for marking, students receive **extensive feedback** on their work, thus promoting their learning experience. Student motivation is high with these Labs because they can be **tied to assessment** and because they can try as many times as they want prior to the due date, with only their best grade being recorded.

After registering their course with us, instructors can create Labs of their choice by selecting problems from our test bank, and setting a deadline for each one. Instructors have access to all the students' marks and can view their best Labs. In addition, they can download the class grades at any time to analyze individual and class performance.

If students do their financial accounting practice and homework, they *will* improve their performance in the course. Recent research regarding the use of Lyryx has shown that when Labs are tied to assessment, even if worth only a small percentage of the total grade for the course, students will do their homework—and more than once. *The result is improved student success.*

{Catch iStudy Logo – to come}

iStudy Many students find study guide materials to be indispensable in helping to understand the course material. *iStudy* (the interactive study guide) will help students meet their goals by testing their cumulative understanding of the material as they go; this will help students assess their mastery of the concepts while they are learning.

iStudy features for *Fundamentals of Financial Accounting Canadian Edition*, such as quizzes, audio tips, crossword puzzles, and tutorials, are designed to allow students to interact with the course material in a way that makes learning the difficult concepts of Financial Accounting fun and interesting. *iStudy* is the next step forward in textbook supplements.

iStudy comprises a superb “tutor” for students. Full access can be purchased through the online learning centre or by purchasing a pin code card through the campus bookstore. Please contact your *iLearning* Sales Specialist for additional information regarding packaging *iStudy* access with the student text.

THE BEST IN DIGITAL STUDY AND COURSE MANAGEMENT TOOLS

Online Learning Centre

Fundamentals of Financial Accounting Canadian Edition includes an Online Learning Centre (OLC) that follows the book chapter by chapter. It doesn't require any building or maintenance on your part; it's ready to go the moment your students type in the address.

www.mcgrawhill.ca/olc/phillips

As your students study, they can visit the OLC and work with a multitude of helpful tools:

- Updates
- Chapter Objectives
- Chapter Overview
- Focus Company Links
- Excel Template Assignments

A secured Instructor Resource Centre stores your essential course materials to save you prep time before class. Everything you need to run a lively classroom and an efficient course is included:

- Instructors Manual
- Sample Syllabi
- Updates
- PageOut link
- Solutions to Excel Template Assignments
- Solutions Manual
- PowerPoint Presentations
- Focus Company Links

PageOut®

Visit www.mhhe.com/pageout to create a Web page for your course using our resources. **PageOut** is the McGraw-Hill Ryerson Web site development centre. This Web-page generation software is free to adopters and is designed to help faculty create an online course, complete with assignments, quizzes, links to relevant Web sites, and more—all in a matter of minutes.

Content cartridges are available for the course management systems **WebCT** and **Blackboard**. These platforms provide instructors with user-friendly, flexible teaching tools. Please contact your local McGraw-Hill Ryerson *i*Learning Sales Specialist for details.

SUPPLEMENTS FOR INSTRUCTORS

INSTRUCTOR'S RESOURCE CD-ROM

This is your all-in-one in-class resource. Create stimulating custom presentations from your own materials or from the many text-specific materials provided in the CD's asset library:

- Instructor's Resource Manual
- Solutions Manual
- Computerized Test Bank (see right)
- Microsoft PowerPoint® Slides, a multimedia lecture slide package that illustrates chapter concepts and procedures. It allows revision of lecture slides and includes a viewer, allowing screens to be shown with or without the software.
- Excel Template Exercises
- Link to PageOut

POWERPOINT SLIDES

Available on the Instructor's CD-ROM and online. These offer a great visual complement to your lectures. A complete set of slides covers the key concepts presented in each chapter.

COMPUTERIZED TEST BANK

This electronic test-generating engine is stocked with hundreds of true/false, multiple choice, and short answer questions; generating quizzes and tests is as easy as clicking a mouse.

CHECK FIGURES

Available only online, these provide key answers for selected exercises and problems.

acknowledgments

TO THE CANADIAN EDITION

Adapting this unique text to the Canadian market was a rewarding and pleasurable experience, due in large part to the talents, commitment and professionalism of the team at McGraw-Hill Ryerson, from the sponsoring editors, Nicole Lukach and Colleen Henderson, to the developmental editors, Suzanne Simpson Millar and Sarah Fulton, and the production staff under the leadership of Graeme Powell. I am grateful to our copy editor, Erin Moore, and our technical checkers, Jennifer Carson and Don Smith, whose careful attention to detail was so valuable and to our illustrator, Rose Zgodzinski, whose playful illustrations give the text a special appeal. I am deeply grateful to all of you for your insights, your patience, and your dedication. Working with you was a real treat.

TO THE U.S. EDITION

We are deeply indebted to the following individuals who helped develop, critique, and shape the extensive ancillary package: Cheryl Bartlett, Albuquerque TVI Community College; Jon Booker, Tennessee Technological University; Charles Caldwell, Tennessee Technological University; Rita Kingery Cook, University of Delaware; Philip Fink, University of Toledo; Jeanne Franco, Paradise Valley Community College; Susan Galbreath, Tennessee Technological University; Mark Holtzman, Seton Hall University; Harry Hooper, Santa Fe Community College; Ken Johnson, Drury University; Barbara Schnathorst, The Write Solution; and Kimberly Temme, Maryville University.

We also received invaluable input and support from present and former colleagues and students, in particular Jocelyn Allard, Anders Bergstrom, Shari Boyd, Kara Chase, Shana M. Clor, Nicole Dewan, Erin Ferguson, Aaron Ferrara, Robin Harrington, Lee Harris, Blair Healy, Carrie Hordichuk, Lorraine Hurst, Nancy Kirzinger, Alan Koop, Deborah Loran, Diana Mark, Roger Martin, Jason Matshes, Jennifer Millard, Kimberley Olfert, Ryan Olson, David Pooler, Jessica Pothier, Emery Salahub, Bailey Schergevitch, and Marie Tait.

We thank the extraordinary efforts of a talented group of individuals at McGraw-Hill/Irwin, including Brent Gordon, our editorial director; Stewart Mattson, our publisher; Rich Kolasa, our marketing manager; Charlie Fisher, our project manager; Sessa Bolisetty, our production supervisor; Carol Loreth, our supplements producer; Jeremy Cheshareck, our photo research coordinator; and David Tietz, our photo researcher. We are especially grateful to Steve DeLancey, senior sponsoring editor, for his foresight and vision; Kimberly Hooker, senior developmental editor, for her unwavering support through all aspects of the project; Glenn Turner at Burrston House, developmental editor, for his sage advice; Tracey Douglas, our permissions researcher, for her persistence; Adam Rooke, our designer, for his endless patience; David Bartholomew at Cenveo, our artist, for his diligence and creativity; and Daniel Wiencek, senior copywriter, for all of his creative efforts.

We also want to recognize the valuable input of all those who helped guide our developmental decisions:
